

Scientific Name <i>Achillea millefolium</i>	Common Name and description Yarrow	Number as of 8/11/2021
	<p>Easy, will spread at a reasonable rate. About 1" high, white flowers. Wants some water. Perennial flower</p>	<p>48 tp</p>
<i>Achnaherum hymenoides</i> 	Indian Rice Grass <p>Grows 4 to 24 inches tall and up to 24 inches wild. Can grow in partial shade and is tolerant of other soils but prefers sandy soil. . It is and important food for wildlife. It has been cultivated in Montana under the trade name "Montina" as a gluten-free grain.</p>	
<i>Ambrosia dumosa</i> 	Burro Bush <p>Shrub that grows to 3ft. tall. Flowers in the winter and grows at elevations from 245' to 6184. Easy to grow likes sandy well drained soil and full sun.</p>	
<i>Amelanchier utahensis</i> 	Utah serviceberry <p>Is a 3-15 ft. deciduous shrub. It has white bark and small oval gray-green leaves. The white flowers are fragrant and the small dark purple berries are eaten by birds. It is a good browse plant so protect it from deer until it is big.</p>	
<i>Anemopsis californica</i> 	Yerba mansa <p>A beautiful white coneflower. Likes water so plant near a stream or water a lot. Spreads by rhizomes. Dies back in fall but the big fleshy leaves come back in the spring. The dry leaves have a lovely fragrance.</p>	<p>16 tp</p>
<i>Angelica lineariloba</i> 	Soda Straw <p>Parts of this plant are poisonous. It flowers in mid summer and grows to be 24-48" tall. Attracts bees, butterflies and birds. It needs full to partial sun and regular water, but don't overwater.</p>	

<p><i>Aquilegia formosa</i></p> 	<p>Crimson columbine Pretty-red/yellow flowers once in spring/early summer. A perennial flower. Part to full shade. Wants water-either a watered garden or by a creek. Will reseed, but not too weedy. About 1-2' tall. This will bloom its second year</p>	<p>94 tp</p>
<p><i>Arabis pulchra</i></p> 	<p>Beautiful rockcress A 3 foot tall perennial with purple flowers. It likes full sun. It is a lot like wallflower but with purple flowers.</p>	
<p><i>Artemisia tridentata</i></p> 	<p>Great Basin Sagebrush An evergray shrub 4 feet tall and wide. Its form is stately and it stands out in a landscaping situation. It is a nitrogen fixing plant. Needs full sun and good drainage, very drought tolerant.</p>	<p>16 tp 5 gallon</p>
<p><i>Asclepias fascicularis</i></p> 	<p>Narrow leaf milkweed Easy and invasive! Don't plant this where you don't want it to spread. Needs very little water, the more water, the faster it spreads. Full sun. About 3' tall and as wide as you let it spread. Butterflies like it. Butterflies prefer this to the broad leaf milkweed.</p>	<p>34 tp</p>
<p><i>Asclepias speciosa</i></p> 	<p>Broad leaf milkweed Easy and invasive! Don't plant this where you don't want it to spread. Very pretty in bloom and into the fall and winter. Needs very little water, the more water, the faster it spreads. Full sun. About 3' tall and as wide as you let it spread. Butterflies like it.</p>	<p>64 tp</p>
<p><i>Astragalus lentiginosus</i></p> 	<p>Paper locoweed Has a stunning rose-purple flowers with white tips. The plant can be sprawling or bushy. The seedpods are papery and inflated. They are usually mottled red or purplish. Likes gravel soil and full sun. Is found between 4,000 and 8,000 feet.</p>	

Astragalus newberryi

Newberry's milkvetch

Produces flowers that are pink-purple in color. It flowers between April and June. It likes gravelly soil and grows between 4300 and 7700 feet.

Astragalus purshii

Wollypod locoweed

Is a ground hugging plant that can spread and cover a slope. Likes dry, sandy or gravelly habitat. Can grow from the Mojave to timberline. The 1-inch flowers are pink-purple and the white seedpods resemble cotton balls.

Baileya multiradiata

Desert marigold

12-18 inch biennial. The daisy like flowers form impressive mounds of solid yellow. Blooms all summer. Like dry well drained soil and will self seed.

13 tp

Cercis occidentalis

California Red Bud

A deciduous shrub that grows to about 12 feet. Has magenta flowers in spring. Likes full sun and regular water in our dry area. Young plants need to have their roots protected from freezing, but older plants do fine.

15 tp

Betula occidentalis

Water birch

Likes moist situations. Grows to 20 feet, with many trunks. Has beautiful fall foliage and smooth reddish bark.

Calystegia longipes

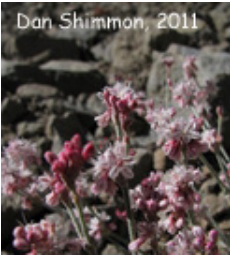

Desert morning glory

A vine that likes dry, rocky places. It has showy flowers that are cream to pale pink. Grows to about 1 foot high and wants full sun.

<p><i>Castilleja</i></p> 	<p>Indian paintbrush Most paintbrush are hemi-parasites, which means they need to live with their host plants. These plants are growing with their sage hosts</p>	<p>4 tall tree</p>
<p><i>Ceanothus greggi</i></p> 	<p>Desert ceanothus A shrub that grows to 6' tall. The clusters of white flowers exude a sweet fragrance. Plant in full sun and well-drained soil. Water in spring and fall but not in summer!</p>	
<p><i>Ceanothus leucodermis</i></p> 	<p>Chaparral Whitethorn A shrub that grows 8 ft. tall and 6 ft. wide. It has white bark and azure blue flowers, which cover the plant in spring. Plant in full sun and well-drained soil. Water in spring and fall but not in summer!</p>	
<p><i>Ceanothus velutinus</i></p> 	<p>Tobacco Brush Shrub that grows 3-6' high. Has clusters of small white fragrant flowers. The broad shiny leaves give off a spicy sent when crushed. The sent is caused by a flammable oil. This plant likes dry open slopes.</p>	
<p><i>Cercocarpus ledifolius</i></p> 	<p>Mountain mahogany Extremely slow going evergreen that will eventually get quite large so give it room. Easy care, water monthly on the valley floor. Likes well drained soil. Full sun to part shade. Needs no pruning and very little care. A great evergreen for around here</p>	<p>30 tp</p>
<p><i>Chamaebatiaria millefolium</i></p> 	<p>Fern bush Has an aromatic herbage and a pretty white flower. Likes full sun and good drainage.</p>	<p>4 tall tree</p>

<p><i>Chilopsis linearis</i></p> 	<p>Desert willow is a large deciduous tree. Can grow to 20 feet- so give it room. Its leaves look like a willow and the flowers like an azalea. It is the last tree to leaf out but will flower until frost. Hummingbirds love it.</p>	<p>43 tp</p>
<p><i>Clematis ligusticifolia</i></p> 	<p>Virgin's bower Likes full sun and regular water. It spreads along the roots so gets a little "weedy" but looks nice on a fence or arbor.</p>	
<p><i>Cryptantha confertiflora</i></p> 	<p>Golden forget-me-not Has beautiful yellow flowers, blooms in June. Likes dry rocky soils and full sun. After it flowers it is a nice boarder plant with grey green foliage</p>	<p>32 tp</p>
<p><i>Datura wrightii</i></p> 	<p>Jimson weed Gets really big, 2 feet high by 2 feet wide by 3 feet long. Dies back completely in the fall. Likes the alkali soil of the valley floor and needs very little water. The seeds are poisonous.</p>	<p>8 tp</p>
<p><i>Encelia actoni</i></p> 	<p>Bush sunflower Beautiful round shaped bush with long stemmed flowers. They like full blazing sun. and very well-drained soil. A nice perennial I think they may be a short lived plant that reseeds itself easily.</p>	<p>32 tp</p>
<p><i>Ephedra nevadensis</i></p> 	<p>Nevada ephedra A bluer green than <i>Epedra viridis</i>. If you get the female plant, it can have lots of small yellow flowers in the spring. This plant is used for its evergreen vertical foliage. I see it as the juniper for the Eastside.</p>	<p>45 tp</p>

<p><i>Ephedra viridis</i></p> 	<p>Green ephedra A beautiful bush with a strong vertical evergreen presence. A nice background plant for the garden. Likes full sun and well-drained soil.</p>	<p>1 tp</p>
<p><i>Eriastrum densifolium</i></p> 	<p>Heavenly blue A showy plant that grows 1/2 - 2' tall. The flowers grow in dense clusters that catch your eye. Blooms in June. Likes dry gravel and full sun.</p>	<p>11 tp</p>
<p><i>Ericameria nauseosa</i></p> 	<p>Rubber rabbitbrush A 2-3 foot shrub with feathery grey-green foliage. Grows in poor alkali meadow soil from 2500-8500 feet. A nice addition to the garden as it blooms in the fall.</p>	
<p><i>Ericameria tetrafolia</i></p> 	<p>Green rabbitbrush A small shrub that grows about a foot high. Stays evergreen throughout the year and blooms very late in the year, or very early in the spring. Resinous sent reminds me of Christmas.</p>	
<p><i>Erysimum capitatum</i></p> 	<p>Wall flower Usually 6-8 inch plant with thin, erect stems growing from a basal rosette and topped with dense bunches of yellow colored flowers. Likes well drained soil and full sun.</p>	
<p><i>Eriogonum elatum</i></p> 	<p>Tall buckwheat This plant has low-growing wide leaves. Throws up a 3 foot flower stalk that will have bunches of small white flowers typical to buckwheats. It is very hardy. Full sun and well-drained soil.</p>	

<p><i>Eriogonum fasciculatum</i></p> 	<p>California buckwheat A small shrub with white flowers. Likes well-drained soil and very little water. Its flowers, leaves and seeds are all used by butterflies and small birds. White flowers come on in late spring, gradually turn pink in summer, then rust colored in fall. Flowers stay on until the next fall.</p>	<p>48 tp</p>
<p><i>Eriogonum nudum</i></p> 	<p>Nude buckwheat A slender spike of white, pink or yellow flowers. This plant has a 3 inch (6 cm) base of small leaves from which it grows up into a 3 to 6 foot stem with small flower clusters near the top. It attracts bees, needs full sun and good drainage.</p>	<p>30 tp</p>
<p><i>Eriogonum umbelatum</i></p> 	<p>Sulphur buckwheat Has yellow flowers, grey foliage. Sulphur Buckwheat needs good drainage to the point of living in gravel. It's very drought tolerant but best with a little water.</p>	<p>9 tp</p>
<p><i>Eriogonum wrightii</i></p> 	<p>Wright's buckwheat Is a low growing form with slender pale pink flowers from higher elevations. The buckwheats are very important butterfly plants.</p>	<p>47 tp</p>
<p><i>Frangula californica</i></p> 	<p>Coffee berry An evergreen shrub that grows fast to 6-8 ft. Coffeeberry likes sun to part shade and has low water requirements. The berries turn red, then black. This plant is almost always deer proof.</p>	
<p><i>Forestiera pubescens</i></p> 	<p>Desert Olive A beautiful tree that can grow to 10 feet. It has attractive fruit that the birds like. It likes to grow along the stream banks and canyons in the valley. Likes full sun and good drainage.</p>	<p>19 tp</p>

Grayia spinosa

Spiney hopsage

Is a common shrub of the high desert that can grow to 5 feet. The leaves are gray-tipped and the stems end in whitish, spine tips twigs. This plant's flower has no petals but bracts, which can be either rosy pink or a whitish cream. It flowers from April to July. It is an evergreen

15 tp
1 gallon

Helianthus nuttallii

Nuttall's sunflower

A beautiful and very tall flower - about 8 foot stalks. Has yellow flowers that bloom in August. It likes full sun and needs occasional deep watering. A shrub that u

16 tp

Stipa comata

Needle and thread grass

A beautiful bunch grass with seed heads with long bracts that dance in the wind. Grows about 3 feet tall. The narrow inflorescence can get up to 11 inches long. It grows in grasslands and pine forests. Protect it from hungry rabbits.

Iris missouriensis

Blue Flag Iris

Each 1-2' stem bears 1-2 flowers. The grass like leaves reach as high as the flowers. Found in grazed fields because livestock doesn't eat it. Likes damp, grassy fields and will grow to 10,000 feet. It spreads by rhizomes and blooms May to July.

Krascheninnikovia lanata

Winterfat

This has an unexciting flower, but when in full bloom gives the illusion that it is glowing. It is a beautiful dome shaped bush. It makes a nice gray-green backdrop in your garden. An important graze plant for wildlife in the winter.

Lepidium fremontii

Desert alyssum

Is an one foot perennial. It needs perfect drainage and full sun. The fragrant white flowers are on a plant that resembles a large garden alyssum. Desert Alyssum an excellent border plant for desert gardens. Full sun, good drainage; summer dormant.

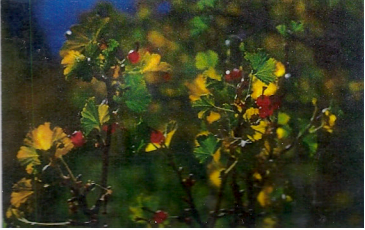

<p><i>Elymus cinereus (Leymus)</i></p> 	<p>Great basin wild rye One of the easiest of the desert grasses to grow. Does well with regular watering or less. Likes well-drained soil and full sun. The first grass to get growing in spring. Grows to 3 feet tall. Nice golden seeds in fall. Doesn't seem to self seed itself all over the yard.</p>	<p>16 tp</p>
<p><i>Linum lewisii</i></p> 	<p>Blue flax Grows about a foot high. Blooms in early June. The flowers open in the morning. It will reseed itself and spread. Will tolerate watering.</p>	<p>38 tp</p>
<p><i>Lonicera involucrata</i></p> 	<p>Twinberry A shrub that grows to 4 feet. Is found along the streams in the Sierra. Likes moist sandy soil, sun to partial shade. Blooms in the summer and is winter deciduous.</p>	<p>2 gallon</p>
<p><i>Lupinus excubitus</i></p> 	<p>Inyo bush lupine A little tricky, but worth it. If it lives, it will be around for years as a perennial. Gorgeous purple/white flower spikes in spring. Well-drained soil and some water, but too much will rot it.</p>	<p>27 tp</p>
<p><i>Lupinus polyphllus</i></p> 	<p>Broadleaf lupine Is one of the showiest lupines. The stems can reach 5 feet tall and are at least 3 feet tall with 18-inch flower spikes. It likes moist soil.</p>	
<p><i>Mentzelia laevicaulis</i></p> 	<p>Blazing star Is a flashy yellow flower that can grow up to 6 inches across. The flowers occur only at the tips of the branches and main stem. It likes gravelly well-drained soil. It is found in elevations from 5,000 to 9,000 feet.</p>	<p>11 tp</p>

<p><i>Erythranthe (Mimulus guttatus)</i></p> 	<p>Common monkey flower Is a 6-8 inch plant that likes wet soil. It blooms from spring to summer and is well liked by hummingbirds. It goes completely dormant in the winter but comes back in the spring. It does well in shaded areas with a little sun.</p>	<p>15 tp</p>
<p><i>Mirabilis bigelovii</i></p> 	<p>Biglow's Desert four-o'clock Grows in the deserts below 7500'. It is 2-3' high. It can be an evergreen and bloom all summer with supplemental water. It will go summer dormant if there is not enough water. Like full to partial sun and well drained soil.</p>	
<p><i>Mirabilis multiflora</i></p>  <p>2003 Charles E. Jones</p>	<p>Large four-o'clock Can grow 15 inches tall and 6 feet wide. It opens its blooms in the afternoon and keeps its flowers most of the summer. Is tolerant of most soils. Plant it where it will get plenty of heat and sun. Once established, this plant needs no extra water. Butterflies like it.</p>	
<p><i>Monardella linoides</i></p> 	<p>Flax leaf mountain balm Flaxleaf Monardella, is a mounding perennial that grows in gravelly soil that is wet in winter and dry in summer. It is a delicate-leaved, lemon scented mint. It likes morning sun and afternoon shade. Flowers are a light pink and attract lots of butterflies.</p>	
<p><i>Monardella odoratissima</i></p> 	<p>Mountain pennyroyal Pretty light purple flowers in early summer. Low growing-about 10" tall and wide. Nice peppermint fragrance. Wants well drained soil, some water okay, but pretty tough. Full sun to partial shade.</p>	<p>17 tp</p>
<p><i>Oenothera cespitosa ssp. marginata</i></p> 	<p>Large white evening primrose A short-lived perennial. It has white-pink 3" flowers that fade to pink. The 12" leaves are from base only. The delightful fragrance is from the flowers. It needs regwater with good drainage. Protect from deer unless you like stumps.</p>	<p>23 tp</p>

<p><i>Oenothera californica ssp. avita</i></p> 	<p>White desert primrose Clumps 3 ft. by 10 feet across of 2 inch pink-white flowers are common. Really pretty flush of white flowers in late spring. Small and compact plant about 1' high and across. They like really well drained soil or they will rot out.</p>	<p>1 tp</p>
<p><i>Oenothera elata</i></p> 	<p>Tall evening primrose This plant can grow to 5 feet in height. The flowers open in the evening and wilt by the next morning. It likes moist soil but can become weedy as it self seeds easily. The seeds of this plant were an important food source for the local Paiutes.</p>	<p>14 tp</p>
<p><i>Opuntia basilaris</i></p> 	<p>Beavertail cactus Plants form clumps 6 to 12 inches high and 1 to 6 feet in diameter. The red flowers are about 2 to 3 inches in diameter. It likes full sun and well drained soil, very little water.</p>	<p>1 gallon</p>
<p><i>Cylindropuntia echinocarpa</i></p> 	<p>Silver cholla Is a medium size cholla. It blooms with chartreuse flowers in the spring. The stems arise from one main trunk. when the sun hits this cholla, it illuminates its outline very attractively.</p>	<p>3 gallon 5, 5gallon</p>
<p><i>Opuntia polyacantha var. erinacea</i></p> 	<p>Old man cactus Plants form clumps 6 to 12 inches high and 1 to 6 feet in diameter. The yellow flowers are about 2 to 3 inches in diameter. It likes full sun and well drained soil, very little water.</p>	<p>9 catus pots 7 gallons</p>
<p><i>Penstemon eatonii</i></p> 	<p>Firecracker penstemon Easy, seems to be long lived for a penstemon. Likes some water during the summer, but don't let the base of the plant stay wet or it will rot. Fairly tolerant and very nice show of red blooms in spring.</p>	<p>39 tp</p>

<p><i>Penstemon floridus</i></p> 	<p>Rose penstemon Beautiful tall flower spike about 2 feet tall. Likes sandy well-drained soil. If you overwater it, it will look great for a year and then rot out. Attracts hummingbirds.</p>	<p>5 tp</p>
<p><i>Penstemon fruticiformis</i></p> 	<p>Death Valley beardtongue. A beautiful shrub with grey foliage. Fragrant white snapdragon like flowers. Needs full sun, very good drainage and occasional water.</p>	<p>16 tp</p>
<p><i>Penstemon heterodoxus</i></p> 	<p>Whorled penstemon A penstemon that is 2" tall with purple flowers in clusters covering the plant. Grows at 8,000-12,000 ft. although can easily be grown at lower elevations. Likes regular water. The dense foliage makes a nice ground cover.</p>	
<p><i>Penstemon incertus</i></p> 	<p>Western desert penstemon A showy sky blue perennial that has 2 feet of light green (with a little silver) foliage with 2 foot spikes of blue above it. Needs full sun and good drainage.</p>	<p>31 tp</p>
<p><i>Penstemon palmeri</i></p> 	<p>Palmer's penstemon A showy plant that grows about 2' high and sends out 3' flower spikes. The flowers are sented. Needs full sun and well drained soil.</p>	<p>13 tp</p>
<p><i>Penstemon rostriflorus</i></p>  <p>2003 Christopher Christie</p>	<p>Scarlet penstemon When in bloom you can hardly see the stems for the flowers! This is a hardy penstemon that will last many years, as long as you don't water it too much. Likes dry soil and full sun.</p>	<p>63 tp</p>

<p><i>Penstemon speciosus</i></p> 	<p>Showy penstemon A 2' perennial with 1-2" sky blue flowers, May-July. Do not water after the first summer in all sites but the desert.</p>	
<p><i>Penstemon pseudospectabilis</i></p> 	<p>Desert Penstemon Grows to 2 to 3 feet. Has evergreen leaves and beautiful magenta flower. Humingbirds love it. Likes full sun, well drained soil. Grows in the deserts below 4,000 ft.</p>	77 tp
<p><i>Populus fremontii</i></p> 	<p>Fremont cottonwood A tree that grows to about 39 to 115 feet. Has pretty green leaves in summer which turn a vibrant yellow in fall. It likes to be in a regularly watered spot.</p>	
<p><i>Prunus andersonii</i></p> 	<p>Desert peach A deciduous shrub that grows to 3-6 feet. It has rose flowers in early spring. It likes sun, dry conditions, and good drainage. It has a beautiful flower show. It spreads by rhizomes so plant it where it can spread.</p>	41 tp
<p><i>Psoralea polyadenia</i></p> 	<p>Nevada dalea Likes well drained soil. Wants absolute full blazing sun, the hotter the better. Very little water while it gets established, then don't water it ever again! Blooms in mid spring and late summer. Has very pretty dark purple flowers. The odor of this plant is disagreeable to some people. Slow grower.</p>	4 tp
<p><i>Psoralea arborescens</i></p> 	<p>Indigo bush Seems to be happy in any well drained soil. Wants absolute full blazing sun, the hotter the better. Very little water while it gets established, then don't water it ever again! Blooms in mid spring with very pretty dark purple flowers. The odor of this plant is disagreeable to some people. Slow grower.</p>	2 tp

<p><i>Quercus wislizeni</i></p> 	<p>Interior live oak Grows 6-20 ft. evergreen tree. Will grow to elevations up to 11000'. Likes afternoon shade to get started and weekly water. Prefers the sandy soils of the fans, doesn't grow in alkali soils. Protect from deer when young.</p>	
<p><i>Ribes cereum</i></p> 	<p>Wax currant A small-med shrub, deciduous. Nice red berries by late summer-good for birds. Full sun to partial shade. Wants some water. Spiny branches.</p>	
<p><i>Rosa woodsii</i></p> 	<p>Mountain rose A fragrant rose that needs some summer water and will tolerate a little shade. It has great hips for tea and is an important plant for birds. It grows between 3500 - 11000 feet.</p>	<p>7 tp 2, 5 gallon 2, 10 gallon</p>
<p><i>Rudbeckia californica</i></p> 	<p>California coneflower Likes meadows and riparian areas. It has showy long-lasting bright yellow flowers. Needs full sun to partial shade.</p>	<p>42 tp</p>
<p><i>Scutellaria mexicana</i></p> 	<p>Bladder sage Is a rather spiny 3-foot tall bush with 1 inch purple flowers. This plant grows on the valley floor. It is found in the open gravelly soils. Likes full sun and good drainage. Don't water it after it gets established.</p>	<p>16 tp</p>
<p><i>Salvia dorii</i></p> 	<p>Purple sage Likes well-drained soil, full sun and a little water. Blooms in June with fun pagoda-like flowers. Attracts insects and has fragrant foliage.</p>	<p>36 tp</p>

<p><i>Senegalia greggii</i></p> 	<p>Cat claw acacia An 8 foot shrub that grows to 7763' in elevation. Can withstand temps down to 15 F. Likes Rocky, sandy or decomposed granite and very well drained soil. Full sun. Blooms in the spring and is Semi-deciduous in the summer.</p>	
<p><i>Solidago candaensis</i></p> 	<p>Canada goldenrod A spectacular yellow flowered perennial that is very showy in the late summer and fall. It needs sun to partial shade. Plant in areas where the ground is wet in the spring and almost dry in the summer. Spreads from underground roots so give it room to grow.</p>	
<p><i>Sphaeralcea ambigua</i></p> 	<p>Apricot mallow Easy, wants some water in the summer. Likes well-drained soil. Nice flush of orange flowers early in the summer. Looks ragged by the fall so cut it back in the spring before new growth starts. Full sun is best. I water mine about once a week. Slowly spreads out to the sides. About 2' tall.</p>	<p>45 tp</p>
<p><i>Sporobolus airoides</i></p> 	<p>Alkali sacaton A beautiful bunch grass that grows about 2.5 feet tall. Has delicate inflorescence. It is easy to grow, needs full sun and regular water. Slower to grow than Great Basin Wild Rye.</p>	<p>24 tp</p>
<p><i>Stanleya elata</i></p> 	<p>Panamint plume Full sun and well-drained soil. Nice yellow spikes in the spring. Doesn't really need water, but a little will make it look better.</p>	<p>10 tp</p>
<p><i>Stanleya pinnata</i></p> 	<p>Desert plume Full sun and well-drained soil. Nice yellow spikes in the spring. Doesn't really need water, but a little will make it look better. Blooms May through June and if you cut the spent flowers it will give you another bloom in fall.</p>	<p>10 tp</p>

<p><i>Stipa speciosa</i></p> 	<p>Desert needlegrass A low growing bunchgrass about 1 foot tall. Reseeds itself easily and spreads. The silvery seeds in June backlit by afternoon sun are beautiful. It looks good in groups and you will have a lot of them in a few years with its reseeding qualities.</p>	<p>24 tp</p>
<p><i>Stipa comata</i></p> 	<p>Needle and thread grass A low growing bunch grass that has 3 foot stem that produces a flower cluster with mature awns that are 7 in. in length. It tolerates sandy soil and seasonal flooding, likes full sun. Looks really good in a cluster planting and reseeds easily.</p>	
<p><i>Yucca brevifolia</i></p> 	<p>Josua tree Needs sun and well drained soil. Little or no summer water. It will grow 3" a year for the first 3 and then slow down to 1" a year. It is an important wildlife plant.</p>	<p>2 tp</p>
<p><i>Yucca whipli</i></p> 	<p><i>Our Lords candle</i> Is an evergreen shrub. It likes well drained soil but will tolerate partial shade. Plant it where you won't have to work around it as the leaves are quite sharp. It can take up to 5 years to bloom.</p>	
<p><i>Zauschneria californica</i> <i>Epilobium californica</i></p> 	<p>Desert fuschia This is a nice plant for fall flowers. It blooms late August until it freezes. Likes well-drained soil. It will tolerate regular watering, but containerize it or it will spread all over. Less water will help hold it in check. The hummingbirds like it.</p>	<p>73 tp</p>
