- We guarantee every plant to be in a Healthy condition, up to grade in every respect when leaving our hands. We Guarantee Satisfaction. STATE INSPECTED.

- We are not responsible for more than the initial cost of plants involved. All claims must be made within 5 days after receipt of plants.

- All quotations are cash and carry at the Nursery, unless otherwise specified. Minimum order \$3.00. All orders prepaid in the U. S. A. amounting to \$5.00 or more. On orders amounting to less than \$5.00, add .50 for packing and postage.

- **TERMS:**—Our terms are cash unless otherwise arranged in advance. We require 25% deposit in advance on all C.O.D. orders. In booking orders for future shipments, we require 25% deposit with order, balance due at time of shipment.

- Orders are accepted in the order received, subject to prior sales, on condition refund will be made, should the plants ordered be injured by elements beyond our control.

- We grow our own plants. Ship only freshly-dug live plants. We guarantee good condition on arrival. Should plants arrive in bad condition, notify us at once. We do not pay transportation on replacements.

HEMEROCALLIS

(Daylilies)

In our many years of experience in growing plants of all kinds we find that daylilies have given us more pleasure for our money with less care than any other plants we have ever known. The wide color scheme, the long period of blooming by growing different varieties, the fact that they're almost disease free, all these favorable points tend to make daylilies our favorite plant. Fertilizing is not a must but as with most plants, produces better results. A well aerated soil, rich in humus with a good dressing of barnyard manure will pay big dividends. Here in the south mulching is not absolutely necessary, however, it helps keep the moisture in the ground in case of a drouth, as well as keeping weeds out. Since daylilies make roots near the surface of the earth cultivation is eliminated, another point in their favor, as well as the fact that they combine so beautifully with so many other plants and are so simple to move. There is so much to be said in their favor that a whole history could be written.

We have been in the general nursery business for approximately 15 years. Being interested in growing plants makes one vulnerable to a growing desire for anything new in that line, especially in plants that are applicable anywhere, in any soil. Hence, our first interest in daylilies. We were first attracted by them as a plant highly desirable in giving the finishing touch to landscaping jobs. Therefore, we started with mass planting of the cheaper varieties. Gradually we acquired better and more expensive varieties. With the help of our good friend Mrs. Dave P. Clark of Baton Rouge, La., a veteran in the daylily field, we were able to steer away from a lot of varieties on the market, and obtain varieties tested and proven, gradually building up a collection any grower should be proud of.

In the 6 years that we have grown this wonderful perennial we have bought from several growers in different parts of the United States at different times of the year, and have never lost a plant. We find Daylilies to be the easiest of all plants to grow with the least effort.

We have read in the notes of some of the older members of the Hemerocallis Society that they are like weeds. We quite agree with them, only beauty has been added. Daylilies here in Louisiana usually can be planted 12 months out of the year. However, we get best results by planting during late summer and early spring. Simply make sure you buy from a reliable grower and plant your scone so as to spread the roots in a well pulverized soil with at least 1 inch of packed dirt over the utmost upper roots, water well, and in no time at all you will have a growing plant. Daylilies will grow without care of any kind but will respond wonderfully to care as all plants will. From our observation we find that they grow well in full sun or partial shade. Watering right after separating and transplanting is necessary of course, and watering when forming buds produces more buds and larger blooms. Some of the darker varieties, as well as the dainty pinks do better in partial shade.

We welcome visitors any time. Plan to visit our humble garden several times a year, you will never be disappointed. Since the Hemerocallis Convention will be held in Baton Rouge, La., this year, we hope that many of you can plan your route through Lafayette and look us up. It will be a pleasure to show you around. Our Daylily display and proven grounds is located in the garden of Mrs. C. G. Simon, 619 Lafayette Street, in the City of Lafayette. Our growing field is located three miles east of Lafayette on U. S. 90 paved highway to New Orleans, La.

GENERAL NURSERY STOCK

We grow a complete line of Nursery stock, Azaleas, Camellias and Ornamentals. We are in the process of subdividing our Nursery Property bordering on U. S. 90 paved highway. It will be necessary to move several thousand field specimen plants this coming season, and we are therefore, offering these plants at sacrifice prices. Cash and Carry at the Nursery. These plants are heavy, bushy well shaped field grown plants, have been sheered several times, clean, healthy and with right color. Ideal for landscape purposes. If you are looking for quality plants at give away prices, this is your chance. If interested write for price list.

ZOUAVE (Stout) 36" Ev. M. Re. Red bicolor, sepals lighter. Different. Very pretty.35

1955 INTRODUCTIONS

We will have for delivery during fall of 1955 a limited supply of 1955 Introductions of other growers. We suggest you give us a second choice when ordering from this list, otherwise, we may have to return your remittance. We list them as follows with names of the Introducers and their descriptions:

INTRODUCED BY—Frank Childs Nursery:

- CONCERTO:** A beautiful blending to give a different color note. A self of deep rose pink with a hint of blue and a green throat. 5½ inch flowers on well branched scapes, sun resistant and reblooms. Dormant. Early midseason, 32 inches 20.00
- ELUSIVE:** This low growing pink has great charm. Safrano pink self (Ridgeway) with wide ruffled petals. Beautifully formed and though it looks dainty and ethereal it has heavy substance and is just as beautiful at end of the day as in early morning. Reblooms. Dor. Early, 24" to 28" 25.00
- HOBBY:** A 6 inch flower of shrimp pink, a self with a green throat. The flower opens wide and is slightly ruffled. Petals 1½ inches and sepals 1 inch. Has good substance and will take full sun. Dor. Early, 36" 20.00
-

INTRODUCED BY—Gilbert H. Wild and Son:

- SWANSDOWN:** (Hall, 1955) 38" M. D. A lovely dresden yellow daylily with broad two inch petals and one inch sepals. It is excellent in the sun. The stems are strong, the branching is good and the plants are lovely. 25.00
- SWEET REFRAIN:** (Hall, 1955) 30" M. D. Awarded Junion Citation THS in 1953. A medium toned pink, which is nearly a self; has better than medium sized blooms. The color is excellent in the sun, and one of the parents for many of David Halls' excellent pink daylilies. The branching is good, and the plants are vigorous although small which is an advantage for the home garden. 25.00

1955 INTRODUCTIONS Continued:

INTRODUCED BY—Miss Edna Spalding:

LOUISIANA PURCHASE: An apricot color, the sepals are a little darker, making it a reverse bi-color, 7" flower, petals two inch, sepals 1½ inch. Eye zone brick dusted, fades very little in hottest sun, long blooming period. Produces good seed pods. 25.00

INTRODUCED BY—Mrs. Thomas Nesmith,

Fairmont Gardens:

RED RESPLENDECE: A large flowered deep red with six inches flowers that is quick shedding and sun resistant, one of the most showy reds in the garden 15.00

ROYAL CRIMSON: A full rich crimson flower with very velvety texture and heavy substance, has been much admired by visitors to the garden 20.00

PINK PROGRESS: A brilliant pink self with a deeper rose halo and exceptionally smooth flowers of great value 20.00

INTRODUCED BY—Parry Nurseries:

DAAFU: (Claar) A low-growing pink, somewhat on the order of Tootie and Evelyn Claar, except that it is more rosy, and later flowering. It also has a deeper toned band in the throat which makes it quite attractive and unusual. The shape of the flower is excellent, and the texture, is very fine 25.00

WHITE ORCHID: (Bach) This is a near white flower, low growing and very fine texture, and also has the very fine faculty of holding up well the entire day. 25.00

We will have other 1955 Introductions for delivery in the Spring and Summer of 1956.

BARGAIN COLLECTIONS

Although we have greatly reduced our prices on varieties we are long on, you will find these same varieties again reduced by 20% in our Bargain Collections. Select one or more Collection for extra savings on your daylily purchases.

JOIN THE HEMEROCALLIS SOCIETY

Anyone interested in daylilies should join the American Hemerocallis Society. This organization is devoted to the advancement of daylilies. The best advice from the leading hybridizers and experienced growers of daylilies is made available to the members in the form of printed bulletins issued from time to time and in an attractive and informative year book.

The dues are \$3.50 per year and should be mailed to Mrs. Daisy L. Ferrick, Secretary, 416 Arter Ave., Topeka, Kansas. If you wish to send us your dues with an order, we will take care of it for you, and will send a bonus of plants with your shipment.

1954 POPULARITY POLL

We are listing on the inside back cover of this price list the 100 daylilies, voted as the most popular by members of the Hemerocallis Society in 1954 Popularity Poll. You will find over 70% of these varieties listed for sale in this price list, identified by asterisk preceding varieties.

STOCK LIMITED

When ordering daylilies listed as supply limited, we suggest you give us a second choice, otherwise, we may have to return your remittance.
