The finest Asters for late August and September blooming.

The plants form strong, branching bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome chrysanthemum-like flowers, which, under ordinary cultivation, average 5 inches across. The form of the flowers, together with the length of the stems, places them at the head of Asters for cutting. They come into bloom from two to three weeks after the average type, usually being at their best during September, and filling in the gap between the general run of Asters and Chrysanthemums. We offer eight beautiful and distinct colors, viz:

This grand Aster may be briefly described as a glorified late branching shell-pink or Mary Semple. It has the same strong, sturdy habit of growth; comes into bloom a little earlier; bears freely almost globular flowers, rarely under 4 inches across and frequently over 5 inches. The color is rich shell-pink, similar in shape but more decided than the late branching. The centre petals are prettily incurved, while the wide outer petals reflex, making a most artistic and finely finished flower, and stands cut longer than any other. 40 cts. per trade pkt.; \$2.00 per oz.

Dreer's "Pink Beauty" Aster

A magnificent cut-flower variety, in bloom from early August until well on in September; 24 to 30 inches high; flowers average 4 inches across, on long strong stems. Color a delicate blush pink, the finest pink mid-season sort. 30 cts. per trade pkt.; \$1.50 per oz.

Dreer's Extra Choice Tuberous-Rooted Begonias

The Tuberous Rooted Begonias which we are now offering are, of course, all American grown, produced for us by a specialist in this particular line. During the past four summers when they were at their best, we had the opportunity of looking these over, and were delighted to see the advances made in their production as well as with the superior quality of the various types, and we assure our customers that they can depend on receiving stock at least equal if not actually superior to what we have supplied in the past.

The tubers we send out are from 1 1/4 to 2 inches in diameter, the best size for all commercial purposes, be this for growing in pots or for outdoor bedding.

Frilled Tuberous-Rooted Begonias

If you have only been growing the ordinary plain-edged Begonias, you will be delighted if you will give this wonderfully improved strain a trial. The flowers are not only of giant size, but the petals are beautifully frilled and waved, not unlike the finest frilled or ruffled Petunias.

We consider this French introduction not only the best commercial bronze or autumn-tinted cut flower, but it is also one of the best all-around varieties that has yet been produced for garden decoration. The habit of the plant is all that could be wished for. A free, upright grower; long, stiff, wiry stems hold the flowers well above the foliage in such a manner as to display their full beauty; it is one of the most prolific flowering, coming into bloom early and continuing in good condition to the end of the season; we have never seen an imperfect flower; these are of good size, of splendid Hybrid-Cactus form, and in color a beautiful golden-bronze with just a faint suffusion of Nasturtium-red that intensifies its brilliancy and adds to its charm. \$3.50 per doz.; \$25.00 per 100.

Koh-I-Noor. Maroon, and at times so dark as to be nearly black. The flower texture has a pronounced velvety sheen which adds greatly to its beauty. In form, a perfect Hybrid-Cactus, the blossoms very large and deep with perfect centre throughout the season. \$10.00 per doz.; \$75.00 per 100.

Lolita Velasco. There are many good white Cactus Dahlias and all of them have some distinctive merit of their own. If we had to select one individual sort, we would take this splendid variety which is composed of long straight petals which form into a flower of perfect shape, borne on long stiff stems, fine for cutting and for exhibition. \$15.00 per doz.; \$75.00 per 100.

Marian Moore. A clear pinkish cerise without the slightest taint of magenta, the reverse of the petal being of a lighter tint. The flowers are large, of perfect incurved formation with perfect stem. \$5.00 per doz.; \$35.00 per 100.

Mariposa. Long, narrow, incurved petals. A delightful shade of true pink, intensified by a deeper centre. One of the gigantic California introductions which has depth as well as diameter of flower. An absolutely stiff stem, which rises nearly three feet above the foliage, a centre which is regular and perfect. \$5.00 per doz.; \$35.00 per 100.

Bougainvillea

Crimson Lake. Introduced through the Bureau of Plant Industry of the Department of Agriculture.

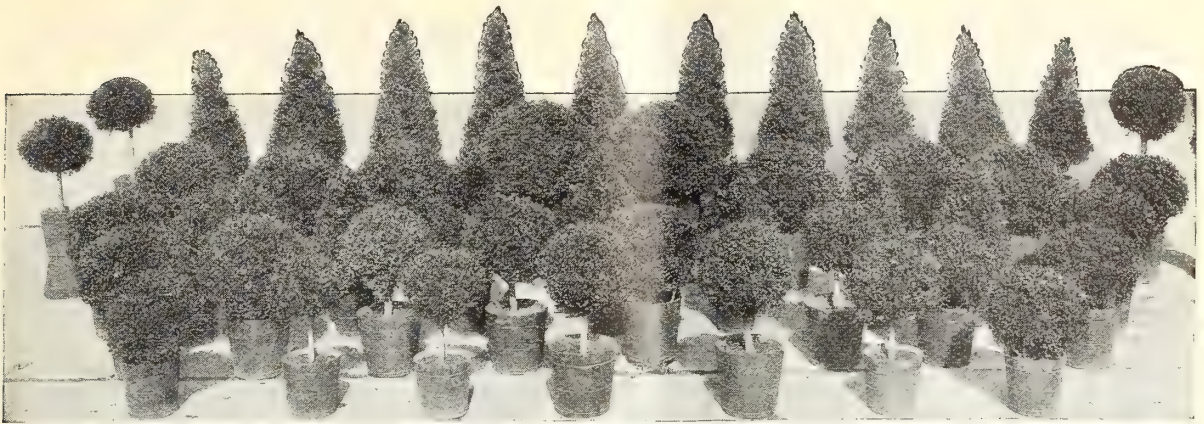

The flowers are like all other Bougainvilleas, perhaps a trifle larger, but in coloring none compare with it in richness and brilliancy. On first opening a brilliant crimson-lake, retaining this color for three or four weeks, after which they gradually pass to a crimson-carmine.

In Southern California and Florida, the Bougainvilleas make gorgeous climbers for outdoor planting, while in the North they are useful subjects as pot plants for the conservatory or greenhouse.

Aspidistra Lurida

California Grown Trained Boxwoods

California Grown Boxwoods

These are an exceptionally fine lot of nicely-trained plants. This variety is known as Japonica and is unquestionably the hardiest of all the Boxwoods.

This stock must not be confounded with the ordinary field grown plants offered at low prices; the plants we supply have been frequently transplanted and root pruned, and are developed with a mass of fibrous working roots which insures their success after transplanting.

Dreer's Fine Ferns

Adiantum Wrighti

This strong growing Maiden Hair is rapidly gaining wonderful popularity as a variety for cutting, its pinnæ is intermediate in size between *Cuneatum* and the *Glory Fern*, it is of a cheerful bright green color and fronds 2 1/2 feet long or more can readily be produced. Besides its value for cutting it makes a most beautiful specimen plant in a 4- to 6-inch pot or larger. It is of rapid growth and makes a good decorative subject.

We will have a fine lot of 2 1/4-inch pots for May and June delivery; these can be grown on into fine specimens for next fall and winter. \$12.00 per 100; \$110.00 per 1000.

**Adiantum Farleyense Gloriosum
The Glory Fern**

This splendid Fern which so closely resembles *Adiantum Farleyense* in appearance and which does not require the special skill and care in growing that is necessary to produce good plants of *A. Farleyense*, has quickly made a place for itself, not only on account of the fact that it can be produced for little over half that of growing *Farleyense*, but also because either in a cut state or as plants used in decorative work, it will outlast the old variety ten to one, making it an available subject where *Farleyense* cannot be used at all.

We have ready for immediate delivery in splendid shape

3-inch pots, \$6.00 per doz.; \$50.00 per 100.

New Hybrid-Tea Roses and Varieties of Special Merit

The list offered under this heading embraces, besides the latest introductions and novelties, many of which are being sent out exclusively by us this season, such sorts of earlier introduction that are of special merit or that are still scarce and worthy of special attention by the planter.

New Hybrid-Tea Rose, Charles P. Kilham

Abol (F. Evans, 1927). An exceptionally vigorous growing, very free-flowering, new white. No other white variety, and for that matter, very few colored varieties, have such a delightful sweet perfume as this novelty. In the bud stage and before the flowers are fully expanded, the centre petals are sometimes tinted with pink on the edges of the petals, passing to pure white as the flowers develop. Good shapely buds and full, double, well formed flowers are fully expanded, the centre petals are with very few thorns. **\$75.00** per 100.

Adele Crofton (Alex. Dickson & Sons, 1928). The buds, which are of unusual length, expand very slowly and hold their splendid form for a long time. The buds, as well as the young flowers, are of an intense cadmium yellow, overlaid with scarlet-orange with the reverse of the petals frequently shaded vermilion. The opening flower as it develops tones down in color to a rich apricot yellow. The plant is of moderately vigorous, clean growth and carries its flowers on good rigid stems. **\$125.00** per 100.

Advocate (Alex. Dickson, 1928). A meritorious, rich crimson bedding variety, with very long pointed buds developing to a full, shapely flower composed of large deep petals set in high spiral formation. Growth strong and vigorous, forming a bush of best bedding type, free and perpetual flowering and carrying its blooms, which are exceptionally fragrant, erect on stiff wiry stems. **\$100.00** per 100.

Charles P. Kilham (Beckwith & Sons, 1926). A brilliant distinct and striking novelty which we know will appeal to and please every Rose lover. The buds are long pointed of perfect shape, opening to high centered perfectly formed full double flowers of a rich and brilliant Oriental red flushed with orange and glowing scarlet. A vigorous grower; very free flowering and sweetly tea-scented. Awarded Gold Medal National Rose Society of England, Spring, 1927. **\$75.00** per 100.

Cuba (Pernet-Ducher, 1926). As a bedding Rose for brilliant mass effect we know of nothing that will equal this French introduction and although the large flowers are almost single, they possess a charm and brilliancy in color which is an entirely new tone in Roses, a glorious bright vermilion-scarlet overlying an orange ground, this color combination is so intense that in full sunlight it glistens with an iridescent sparkle. **\$40.00** per 100.

Dainty Bess (Archer, 1925). An appropriate name for a daintily colored and well formed single flower, $3\frac{1}{2}$ inches in diameter composed of delicately crinkled and wavy petals of a pleasing shade of shell pink with a conspicuous bunch of crimson stamens. The flowers last well when cut and are charming when displayed in individual vases. A strong, vigorous grower and profuse flowering, the flowers being produced on strong branching stems. Awarded the Gold Medal of the National English Rose Society in 1925. **\$75.00** per 100.

Dame Edith Helen (Alex. Dickson, 1926). Perfect buds developing into wonderful flowers of immense size are produced singly on well-foliaged strong canes. The flowers are composed of very substantial broad petals which curl back prettily forming a glorious long pointed bud and a full double flower which is beautiful in every stage of development. Color a brilliant yet soft Rose du Barri pink; strongly sweet-scented. **\$50.00** per 100.

Dorina Neave (Pemberton, 1926). A meritorious bedding Rose of a delightful silvery pink with large, full, pointed, globular, fragrant flowers carried erect on stiff stems. Plant of strong, bushy, compact habit. **\$75.00** per 100.

Dr. Edward Deacon (Morse & Son, 1926). A variety that will charm every lover of a real good Rose. Its color is fascinating, the margin of the petals being a delicate tint of shrimp pink gradually merging to a deep salmon-orange towards the base of the artistically reflexed petals, forming a fine, very full flower, that has good lasting qualities. The habit of the plant is ideal, upright, strong and free flowering, with very healthy foliage. **\$75.00** per 100.

Duchess of Athol (Dobbie & Co., 1928). The coloring of this new variety is uncommon and delightful, an old golden-orange flushed with peach pink, particularly attractive in the bud and open state, growth vigorous, a free and continuous profuse bloomer. Awarded Certificate of Merit of the National Rose Society of England. **\$100.00** per 100.

Duchess of York (Sandy Dickson, 1925). Good sized well formed double flowers of unique and distinct coloring; a pretty shade of tangerine orange with rose suffusion, passing to golden rose-pink as the flowers develop. A good free-flowering garden variety. **\$75.00** per 100.

Edith Nellie Perkins (Alex. Dickson, 1928). A Rose entirely distinct in coloring and of such strong robust growth that it should succeed anywhere and produce an abundance of its pretty colored flowers. The buds are long and pointed, the outside of the petals are of cream and blush shaded with orange at the base, the inner face is salmon-pink with golden orange base; the flowers are moderately double, and sweetly scented. **\$75.00** per 100.

Elizabeth of York (Dobbie & Co., 1927). Beautifully formed long pointed buds of a glowing cerise-red with yellow suffusion at the base; the petals as they unfold spread widely with a splendid reflex ultimately showing the stamens. An artistic, dainty, delicately colored flower. **\$50.00** per 100.

Everest (Easlea & Sons, 1927). One of the largest Roses yet raised, buds large, perfectly shaped, flowers of immense size with long broad petals of firm texture, fragrant ivory-white with creamy suffusion and when fully developed resembles a large Peony borne on long stems. While awarded a Gold Medal by the National Rose Society of England in 1927 as a Hybrid-Tea, it has the characteristics of a most vigorous growing Hybrid-Perpetual and is admirably adapted to grow as a pillar Rose. **\$75.00** per 100.

New Hybrid-Tea Roses and Varieties of Special Merit

The prices quoted are for strong dormant bare root plants delivered before March 1st.

New Hybrid-Tea Rose, Dorina Neave

Frank Reader (Verschuren & Sons, 1927). A large massive flower with high pointed centre with nicely reflexing petals of great substance, the long buds in first developing are a light lemon-yellow, while the flowers in their half-expanded form reveal a heart of golden apricot; it has a delicious rose-apple scent. Among light-colored varieties this is of outstanding merit. **\$40.00** per 100.

Gaiety (E. G. Hill Co., 1926). Buds long and pointed, developing to a large shapely semi-double, cupped flower composed of ruffled petals, which as they unfold show various shades of orange, Indian red, yellow, and pink or fawn. The plant is of strong, vigorous branching habit, with good healthy foliage and very free flowering. **\$75.00** per 100.

Gladys Benskin (Alex. Dickson, 1929). Large long pointed buds and high centred full flowers well built, with heavy, broad, slightly serrated petals. Color very distinct, the reverse of the petals salmon cerise over golden yellow, with deep yellow veining, inside bright rose cerise shaded orange, with deeper orange shaded base and very rich fruity fragrance. Vigorous, hardy, free branching upright habit, very free and perpetual flowering. A most distinct, striking and unique novelty that will be greatly admired. Awarded Certificate of Merit National Rose Society of England. **\$125.00** per 100.

Golden Dawn (P. Grant, 1929). A magnificent new Rose of Australian origin with which we have been most favorably impressed in our trials during the past two years, and in which we believe we have an ideal garden Rose of great merit of an exquisite light lemon yellow color. Its buds are of an ovoid form, heavily splashed with crimson before opening and develop into splendidly shaped full double fragrant flowers which are of a uniform color, reminding one of the old favorite Marechal Niel and which was suggestive of the name Golden Dawn. The plant is of strong, vigorous upright branching habit, with large glossy healthy green foliage, very free flowering. **\$75.00** per 100.

Impress (Alex. Dickson & Sons, 1920). A novelty which on account of its coloring and its perfectly formed large double flower, will please every Rose lover. The ovoid buds when first unfolding are cardinal-red with orange suffusion and develop into very large, full double very perfect blooms that last in good shape and which are of a pretty salmon-cerise color suffused with a luminous golden sheen. The plant is a strong vigorous upright grower with dark green glossy foliage and exceptionally free and continuous flowering. Delivery of this variety will be made after March 1st. **\$125.00** per 100.

Irish Charm (McGredy, 1927). This is a gem of exquisite form and absolutely distinct from any variety yet introduced. It is of strong branching habit, remarkably free-flowering. The buds and flowers are of medium size, the base of the petals a rich golden-apricot passing to a delicate blush-pink as the flowers develop. **\$40.00** per 100.

Irish Courage (McGredy, 1927). A splendid addition to the list of bi-colored Roses, the color being a soft shrimp-pink merging to salmon in the fully expanded petals, the whole overlying a golden orange ground, this color being very pronounced at the centre of the flower. Growth and fragrance moderate, with attractive dark glossy-green foliage. **\$40.00** per 100.

Irish Hope (McGredy, 1927). A splendid and distinct red with well-formed buds composed of heavy, broad petals opening to moderately full, very fragrant flowers. The color is a rich rosy-crimson with maroon shadings. It is of splendid, vigorous growth with good foliage, and a free and continuous bloomer. In our trial plots this looks like one of the most promising varieties, among the many reds sorts on trial. **\$40.00** per 100.

Irish Sweetness (McGredy, 1927). A delightfully fragrant variety and splendid addition to the none-too-long list of good red bedding Roses. Color, an exquisite shade of crimson-lake suffused with scarlet; a vigorous free grower and very free flowering. **\$40.00** per 100.

James Gibson (McGredy, 1928). A glorious glowing crimson-scarlet with velvety sheen imparting a lustrous radiance to the large, full, beautifully formed flowers of which every bloom develops to perfection. Its habit of growth is as near perfect as could be desired, being free, bushy, upright and vigorous and the flowers which are borne profusely all the season, are carried erect on long stems with good disease resistant foliage. A brilliant Rose of exceptional beauty. **\$125.00** per 100.

J. Otto Thilow (Verschuren & Sons, 1927). This variety was named in memory of our late Mr. Thilow. It is a rich, glowing rose-pink of exceptional merit with long, pointed buds of perfect formation; as the flowers expand the petals reflex forming a beautiful large double high centered flower. It is a very strong grower with clean, healthy foliage and a continuous profuse bloomer, a grand garden Rose in every respect. **\$40.00** per 100.

Jules Gaujard (Pernet-Ducher, 1928). Distinct and beautiful, the large, well-formed double flowers on first opening are of a glistening cochineal crimson which, as they fully develop, pass to a pretty shade of orange-rose. It is of strong, vigorous, branching habit, very free flowering and a variety that we are convinced will become a greatly admired garden Rose. **\$75.00** per 100.

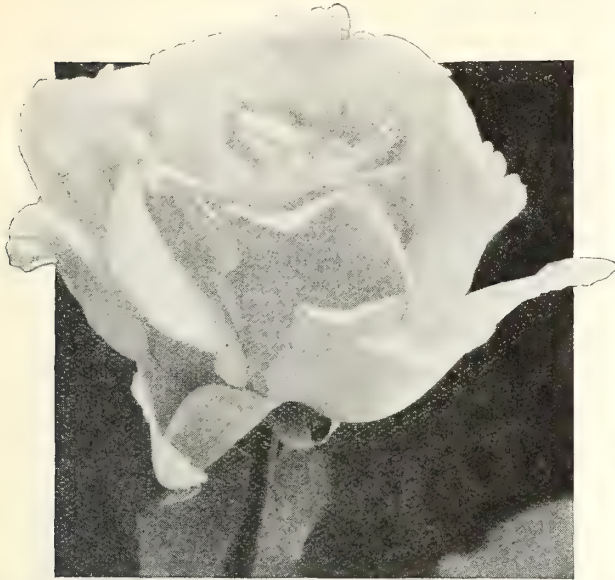

Julien Potin (The Golden Pernet). This is one of Mr. Pernet's latest achievements which will probably become better known as The Golden Pernet. It is unquestionably the most gorgeous and brilliant yellow Rose yet introduced, a rich golden yellow that grows richer and deeper as the flowers mature. The buds are long and shapely and develop into large, full flowers of beautiful form, delightfully sweet-scented. Habit of growth upright with ample, attractive, glossy, bronzy-green foliage, very free-flowering. **\$50.00** per 100.

Lady Barnby (Alex. Dickson & Sons, 1930). Another beautiful Dickson Rose that will not be distributed by the originators in Europe until the middle of June. We feel fortunate in being in position to offer a limited stock of strong plants for delivery this spring. It produces splendidly formed flowers very much on the type of Mrs. Henry Bowles, a variety that is a favorite with us, it being one of our most reliable bedding varieties, but Lady Barnby differs in color, it being a lovely shade of clear rose pink. The plant is of excellent habit, strong vigorous growth and very free flowering and sweetly scented. Delivery of this variety will be made after March 1st. **\$125.00** per 100.

Golden Dawn, the New Australian Hybrid-Tea

Lady Florence Stronge (McGredy, 1925). An entirely new, distinct and novel color; a reddish prawn to violet old rose shading to yellow at the base and pink towards the edge, the inner surface of the petals heavily veined and flushed scarlet, the flowers are large, full with high centres and fragrant. Vigorous in growth and free-flowering. **\$40.00** per 100.

Lady Leslie (McGredy, 1929). Some modern critics lament the absence of fragrance at the expense of vivid colors, but in the beautifully formed good sized flowers of Lady Leslie we have a combination of sweetest fragrance and brilliancy in coloring. In the early stages the flowers are rosy scarlet which, as they develop, passes to a scarlet-carmine suffused with saffron yellow on a yellow base, a warm glowing color combination particularly in the young state. The plant is of ideal bedding type with free upright bushy growth and healthy dark green foliage. Awarded Certificate of Merit National Rose Society of England. **\$125.00** per 100.

Lady Margaret Stewart (Alex. Dickson, 1926). A Rose of unique color, the flowers in the young stage are a deep sunflower-yellow heavily veined and splashed with orange-scarlet, reverse of the petals deeply suffused with carmine, as the flowers develop these colors intermingle forming a beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower of pleasing decorative form of delightfully sweet scent. **\$75.00** per 100.

Lady Mary Elizabeth (Alex. Dickson, 1927). A variety of outstanding merit. Of strong, vigorous, upright, branching habit with good healthy foliage and very prolific flowering. Flowers delightfully fragrant. Long pointed buds with deep substantial petals in color a brilliant carmine-pink. **\$50.00** per 100.

Lord Charlemont (McGredy, 1922). Although introduced some seven years since, this beautiful variety is still very scarce. It is the most gorgeous and brilliant dark red Rose we have with flowers of the most intense clear crimson-scarlet, deepening to carmine-crimson with almost black shadings with perfectly shaped long pointed buds and large, full double, sweetly scented flowers. Free growing and free flowering, a splendid Rose of exceptional richness and beauty. **\$75.00** per 100.

Marcia Stanhope (G. Lilley, 1922). A delightfully fragrant pure white; a good sized full double flower, fine both in the long bud as well as in the fully expanded flower; vigorous and free. **\$60.00** per 100.

Margaret McGredy (McGredy, 1928). We consider this one of McGredy's most brilliantly colored masterpieces, large, beautifully shaped full double flowers, entirely distinct from all others in its rich coloring which is a brilliant shade of Turkish or Oriental red passing as the flowers age to a beautiful carmine-rose, these are borne on long stiff stems and hold their form and beauty for a long time. **\$50.00** per 100.

Marion Cran (McGredy, 1927). The color combination is the most wonderful we have yet seen in any Rose. In the young stage before the flowers expand the color is deep buttercup-yellow, margined and flushed cerise and rosy-scarlet. As the flower opens the outside of the petals retain their color, while the inner side opens a brilliant geranium scarlet flushed and veined orange and yellow; as the flowers age the color changes to a deep cerise on bright rosy-scarlet flushed buttercup-yellow. The whole flower glows and has a wonderful sheen and when fully open the color combination is delightful. The flowers are full, of nice form, and medium to fairly large in size. The habit is bushy, free, and upright making a magnificent bush; one of the freest and most perpetual flowering garden and bedding Roses. **\$50.00** per 100.

Marquise d'Andigne (Leenders Bros., 1927). Buds large, long pointed developing to very large, very full, double long lasting fragrant, velvety scarlet-crimson flowers borne singly on long strong stems. Growth very vigorous, bushy and a profuse bloomer with dark green healthy foliage. Awarded Gold Medal at Saverne. **\$75.00** per 100.

May Wettern (Alex. Dickson, 1928). A magnificently formed bud and flower of moderate fullness and artistic coloring. The flowers are composed of immense, deep, wide petals of very solid texture, their formation making a beautifully built long bud and high pointed flower, in which the inner face of the petals evolves from a bright salmon pink in the bud to deep flesh pink; then to bright pink in the more developed flower; the outer side passes from deep rose to rosy pink and finally to bright rose, the blending of these tones creating a wonderful color harmony.

In growth, it is upright and free, throwing many base and side shoots which produce long-stemmed flowers quickly and freely. Very sweet scented. Gold Medal National Rose Society, England. **\$75.00** per 100.

Mevrouw, G. A. Van Rossem (Van Rossem, 1926). A marvelously beautiful Rose with a unique color combination not found in any other variety, a most striking blending of dark vivid orange and apricot on a golden yellow ground with frequently touches of bronze on the reverse of the petals. The sweet-scented flowers are very large, of perfect formation both in the bud as well as in the fully developed flower and are produced very freely on vigorous upright growths. Gold Medal at The Hague and Certificate of Merit with Congratulations of the Jury of the Royal Dutch Horticultural Society. **\$200.00** per 100.

Mme. Henri Queuille (Pernet-Ducher, 1929). This splendid Rose in the formation of its large, full flowers, strong, vigorous, healthy growth and freedom of flowering reminds one of the same raiser's popular bedding variety, Souvenir de Georges Pernet, excepting in color which is much lighter, being a pretty shrimp or coral pink on an orange-copper base. **\$75.00** per 100.

Miss Rowena Thom (Howard & Smith, 1928). In vigorous habit of growth, freedom of bloom and in its adaptability to varied climatic conditions, this will prove equal to the popular Radiance Roses, while its flowers in size and form are equal to the best high-class varieties of recent introduction and all of which it will outclass in freedom of flowering. Its buds are long and shapely, opening to perfect double flowers frequently 5 inches across of a brilliant rose-pink, the base of the petals having a golden suffusion which as the fragrant flowers unfold, adds to the brilliancy of its coloring. **\$75.00** per 100.

**New Hybrid-Tea Rose,
Miss Rowena Thom**

A valuable bedding variety.

Mrs. A. R. Barraclough (McGredy, 1926). A most distinct and valuable Rose, of a bright but soft sparkling carmine-pink of even tone that passes to yellow at the base of the petals; this attractive color does not fade as the flower ages, but if anything becomes richer and brighter. The bud is long pointed and develops into a full double flower of model form and substance; very fragrant. **\$50.00** per 100.

Mrs. Beatty (Cant & Sons, 1926). An exquisite self-colored light lemon-yellow with the delightful perfume of the old favorite Marechal Niel. Habit of growth good, with disease-immune foliage, always in flower with large, long, oval-pointed buds. A Rose that is destined to become a popular favorite. Awarded the Gold Medal of the National Rose Society and Certificate of Merit of the Royal Horticultural Society of England. **\$40.00** per 100.

Mrs. C. W. Edwards (McGredy, 1924). Rich rosy-scarlet overlying an orange ground, the base of the petals prettily zoned citron-yellow which runs in faint veinings into the higher colors; a novel color combination. Strong, vigorous habit of growth; very free flowering, with large, full, fragrant flowers. **\$50.00** per 100.

Mrs. Erskine Pembroke Thom (Howard & Smith, 1926). We are convinced that this is the best yellow bedding Rose we have today. It is of clean healthy vigorous growth with abundant dark bronzy disease-resisting foliage and a continuous free bloomer throughout the season. The medium sized buds are long and shapely and develop into good sized full double flowers of a rich deep lemon yellow, sweetly scented. **\$50.00** per 100.

Mrs. Henry Bowles (Chaplin, 1921). Everybody admired the old favorite Mme. Abel Chatenay, for a long time one of the most popular Roses, but which has practically disappeared from commerce. In this we have the same pleasing warm color values but in flowers of much greater size. Color a most effective deep salmon-pink and of splendid form. Vigorous growing and free flowering. **\$50.00** per 100.

Mrs. Lovell Swisher (Howard & Smith, 1926). A remarkably vigorous grower of branching habit, well furnished with excellent foliage, freely producing perfectly formed long shapely buds with nicely reflexing petals that develop into good double flowers. The color of the buds is a deep coppery salmon at base merging to salmon-pink at the tips. The developed flowers are also salmon-pink, deepening towards the centre. Delightfully tea scented. **\$40.00** per 100.

Mrs. W. E. Nickerson (McGredy, 1927). An extremely vigorous growing very free-flowering Rose of the duatone Pernetiana type. The splendidly-formed buds are of an entrancing new color, the exterior of the petals heavily veined with rose d'or and shaded orange cadmium, the interior a deep chrome-yellow on the lower half, veins out and passes to a warm rich rosy-salmon. **\$40.00** per 100.

Norman Lambert (McGredy, 1926). A distinct color combination that is novel. The outside of the petals is a deep chrome-yellow with a marginal color effect of brilliant orange-scarlet merging to an irregular zone of burnt orange, the inside salmon-orange suffused bronze, shading to yellow at the base. The flowers are of medium size and form, delightfully fragrant and free-flowering. A splendid bedder. **\$50.00** per 100.

Patience (McGredy, 1927). One of the finest Roses of very recent introduction. Its splendid long pointed buds are of a deep scarlet carmine opening to large fragrant double perfect blooms that shade from orange at the base of the petals to rich carmine at the edges. It is of strong robust habit with glossy holly-like foliage and extremely free flowering for a Rose of its large size. **\$75.00** per 100.

Portadown (McGredy, 1928). Messrs. McGredy are most enthusiastic in their praise of this new deep crimson with velvety sheen which they describe as having large, full, beautifully formed flowers, reminding one in perfection of shape of Mrs. Henry Morse when at its best. Habit vigorous and bushy, a continuous free bloomer with dark green foliage. Certificate of Merit National Rose Society, England. **\$125.00** per 100.

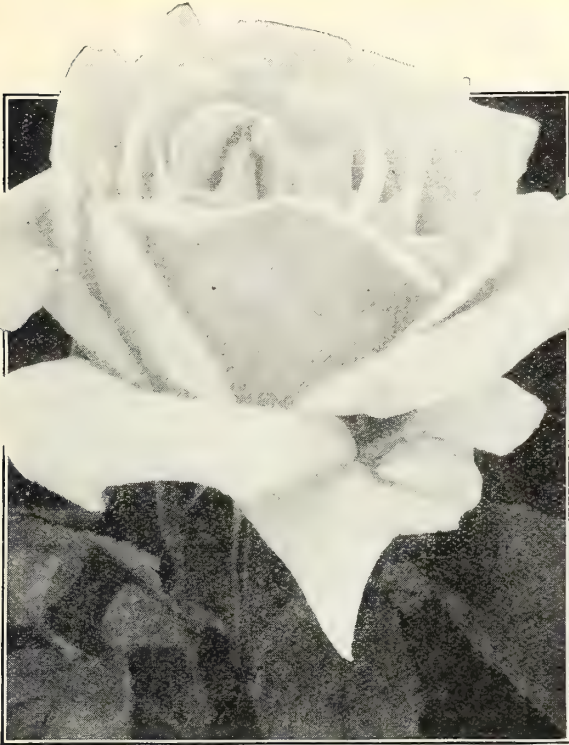

Portadown Bedder (McGredy, 1929). This is one of the brilliant Roses that makes an instant appeal by its charming combination of unusual colors. The petals are orange-yellow on the outside, with a rich cerise flush that deepens towards the edge, and inside there is a suffusion of glowing scarlet-cerise on an orange ground, the blend of colors giving a warm tone to the whole flower, which is of moderate size, good form and thick texture of petal. They are very freely and continuously produced and are fragrant. Foliage dark green and mildew proof, stems strong with few thorns carrying the flowers erect, free bushy habit. A Rose that has only to be seen to be admired. Certificate of Merit of National Rose Society, England. **\$125.00** per 100.

Portadown Ivory (McGredy, 1929). There are few light colored Roses that possess a long spiral form in the bud stage, and large, well formed, fully developed flowers of thick petalage and good lasting qualities, all of which are combined in Portadown Ivory. Its color is a creamy white of soft and delicate tone that merges into a light yellow base, really a color section in which there has been little or no development in recent years and in which this new variety will prove a valuable addition. It is free and perpetual flowering with very dark green healthy foliage which provides a rich contrast to the flowers which are borne on long stout stems. The plant is of vigorous constitution and free habit. Awarded Gold Medal of National Rose Society of England. **\$125.00** per 100.

New Hybrid-Tea Rose, Mrs. Erskine Pembroke Thom
The Best Yellow Garden Rose

President Jac Smits (Verschuren & Sons, 1928). For brilliancy in color, a rich velvety crimson-scarlet, exceptionally long pointed buds of ideal shape, held gracefully on long straight stems and produced most generously, we know of no other variety that is its equal, but having only 18 to 20 petals, usually arranged in three rows, the flowers expand very quickly, showing the golden stamens, but even in its fully expanded form its brilliancy of color is unequalled by any other variety of this type. As a brilliant bedding proposition or for cutting in bud form, no one will be disappointed. President Jac Smits, we believe, will supersede and displace all such popular bedding varieties as Red Letter Day, Hawlmark Crimson and K of K (Kitchener of Khar-toum). **\$75.00** per 100.

Rev. F. Page Roberts (Cant & Son, 1921). A Rose of remarkable beauty both in form and color. The long pointed buds are of a coppery-red stained red on the outside and open to good full double fragrant flowers of a golden-yellow particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. A most distinct variety that has deservedly gained great popularity. **\$60.00** per 100.

Royal Scot (Dobbie & Co., 1928). A variety of gorgeous coloring with large ovoid buds of the type of Lord Lambourne but much brighter in coloring, a rich golden yellow with crimson edges, the open flowers are of medium size, semi-double, light yellow with crimson edged petals and are borne several together on long stems, growth vigorous, very profuse flowering, of moderate fragrance. **\$75.00** per 100.

Rudolph Valentino (Pernet-Ducher, 1929). The latest of Mr. Pernet's introductions. Altogether different from any other Rose, both in coloring and formation, the very large full flower which is informally, but artistically arranged, is of a lively shade of shrimp pink or coral-red with a golden coppery suffusion which is heightened by the reflection from the golden base and reverse of the petals. A most unique and striking flower in all stages of development. Habit strong and vigorous, free and continuous flowering and delicately scented. **\$125.00** per 100.

Sir David Davis (McGredy, 1926). As this variety has shown up during the past three seasons we do not hesitate on account of its profuseness in flowering, its free vigorous growth and its good color to select it as one of the best red bedding Roses. Color, an unfading deep glowing crimson of an even shade throughout running to light yellow at the base of petals. The flowers are of good size, pointed and of good form with large heavy petals, exceptionally free-flowering and strongly sweet-scented. **\$45.00** per 100.

Swansdown (Alex Dickson, 1929). An ideal white which in the autumn has just a tint of cream at the base of the petals. The buds are large, very long pointed of perfect shape, composed of large heavy petals and develop into a splendid full very sweetly-scented flower of spiral formation; supported on long rigid stems. Its growth is vigorous and hardy, free branching, foliage bronzy green. In freedom of flowering Messrs. Dickson state that they do not know any other Rose of its size that will produce flowers in such profusion right through the season. **\$125.00** per 100.

Souvenir d'Alexander Bernaix (Bernaix, 1926). A beautiful large flower, 4½ inches or more in diameter and unique and distinct in color, probably the deepest colored of any Hybrid-Tea variety. While the flower is of flat cupped form both in bud as well as in the fully developed bloom, it is of artistic build and full double with from 48 to 50 substantial petals which are neatly arranged. In the half-expanded bud the petals are incurved, of an intense deep velvety crimson-red on a maroon ground with touches of scarlet on the outer petals. As the flower fully develops it becomes suffused with vermilion carmine at the edge of the petals. **\$125.00** per 100.

Talisman (Montgomery Co., 1929). The Rose of many Gold Medals. It is the most remarkable piece of coloring that we know in any Rose; a combination of shadings of gold, apricot, yellow and deep pink or old-rose. The outside of the petals is bright yellow, gold, and pink; as the flower develops and the petals unfold they become bright apricot, gold, deep rose-pink or old-rose, and unlike most Roses the color becomes brighter as the flowers develop. The bud is long, perfectly formed, averaging about 25 to 28 petals, the plant is a strong, vigorous grower with glossy green foliage and free flowering. **\$100.00** per 100.

Vermilion (Barbier & Co., 1930). A semi-double flower, of medium size but remarkable for its brilliancy in color which is found only in this variety on account of which, together with its freedom of bloom, it has been admired by all who have seen it in our trial grounds. It is a rich vermilion scarlet, deep golden-yellow at the base of the petals, and frequently this golden yellow color is also shown on the tips of the petals. **\$75.00** per 100.

Ville de Paris (City of Paris) (Pernet-Ducher, 1926). One of Pernet-Ducher's Gold Medal Roses which award it received in the International trials at the Bagatelle Gardens, Paris, in the summer of 1926. It is of a rich buttercup-yellow much in the style of Mrs. Beckwith but with longer buds and larger flowers and purer in color. The plant is of vigorous growth and very free flowering, a splendid rich yellow garden variety. **\$50.00** per 100.

Wilhelm Kordes (Kordes, 1922). Unique and entirely distinct in coloring; a rich capucine red with coppery suffusion overlying a golden-salmon ground, varying in intensity under different weather conditions, but always beautiful and particularly high colored early in the season and in the autumn. The buds are long and pointed, opening to double high-centered very fragrant flowers. Habit compact but vigorous, very free flowering. **\$50.00** per 100.

New Hybrid-Tea Rose President Hoover

The Latest American Novelty New Hybrid-Tea Rose President Hoover

(L. B. Coddington, 1930)

A glorious Rose, wonderfully free in the easy manner in which it grows and charming in its color arrangement which is a splendid combination of cerise-pink, flame, scarlet and yellow; this combination of colors gives the most dazzling color effect imaginable. The buds are beautifully pointed, the flowers large, composed of broad thick heavy petals, with an exquisite fragrance. New Hybrid-Perpetual Rose Mme. Albert Barbier

Introduced several years ago, this remarkable Rose has quickly found its place in popular favor. In its habit of flowering it is as free as many of the popular Hybrid-Tea varieties, its seed parent is Frau Karl Druschki, from which it has inherited a strong, clean, vigorous growth; its buds are long and well formed of a pearly white color suffused with soft, salmony flesh and develop into large, full double imbricated flowers of splendid form which as they expand, show a golden apricot suffused centre. A gem in every respect. \$75.00 per 100.

Chaplin's Pink Climber

The Most Valuable
and Important
New Hardy Climbing Rose
Offered Since the Introduction
of Paul's Scarlet Climber.

See Colored Illustration in our
Garden Book

Chaplin's Pink Climber

Unquestionably the most important acquisition in climbing Roses since the introduction of Dr. Van Fleet and Paul's Scarlet Climber, which are universally recognized as the two most popular climbing Roses and to which Chaplin's Pink Climber will prove an equally valuable companion.

This striking novelty originated at Waltham Cross, England, in the same nursery in which Paul's Scarlet Climber was raised. It is a cross between Paul's Climber and American Pillar, of strong vigorous growth, perfectly hardy, with large glossy dark green foliage, producing its large flowers, similar in size and form to Paul's Scarlet Climber, very profusely in strong trusses of from 8 to 12 flowers each, but in color it is a rich lively pink.

At the Spring Show of the National Rose Society of England in 1928, it was the outstanding feature among the new Roses and was awarded the Society's Gold Medal. Also received the English Royal Horticultural Society's Award of Merit.

Strong plants, \$1.50 each.

Mme. Gregoire Staechelin

The first climbing Rose to which a Gold Medal was awarded at the International Test Garden for Roses at Bagatelle, Paris, France.

Mme. Gregoire Staechelin has inherited the best traits of both of its popular parents, Frau Karl Druschki and Chateau de Clos Vougeot. The plant is of strong climbing habit, growing 12 feet or more high, and has large disease-resistant foliage. The main stems grow vigorously upright and all along these the following year, side branches, 12 to 14 inches long will develop with exquisite, full, very fragrant flowers.

At the tips, the long pointed buds are crimson at first as the sepals divide, then the firm outer petals show splashes of carmine as the flower opens with an iridescent pearl pink inside. Strong plants, \$1.50 each.

Albertine. Nicely shaped vermillion buds expanding to moderately double, perfect shaped flowers of a pleasing cameo-pink with silvery suffusion, sweetly scented; foliage rich deep, glossy green. \$60.00 per 100.

Boufire. One of the freest flowering of Dorothy Perkins type but with great trusses of cherry crimson flowers; an early bloomer. \$50.00 per 100.

Emily Gray. In this we have a real yellow climbing Rose. The buds are long and pointed, of splendid shape; in color, a beautiful light orange-yellow, changing to pale orange as they expand; they are borne on stiff stems of sufficient length for cutting; dark green, glossy, holly-like foliage. \$40.00 per 100.

Ernestine Cosme. A unique single-flowered variety of pretty form and of a delicate soft pink, these are borne in great pyramidal shaped many flowered sprays in great profusion. \$50.00 per 100.

Glendale. A perfectly hardy climber with heavy dark green disease resistant foliage and long, slightly fragrant, beautiful lemon-yellow buds of uniform

shape which open to creamy-white, fairly double flowers which are borne in clusters of up to 20 flowers on stems long enough for cutting. \$50.00 per 100.

Le Reve. A yellow pillar Rose of which Dr. J. Horace McFarland, editor of the American Rose Annual, under date of May 31, 1927, said: "Le Reve is perfectly beautiful today, a yellow Rose requiring no excuse for fading, for it is yellow and stays yellow. The foliage is good, the plant is good looking and the fragrance to me is delightful." \$50.00 per 100.

Marie Gouchault. Identical with Dorothy Perkins, excepting in color, which is a clear geranium-pink without magenta shadings. Very free and early. \$50.00 per 100.

Paul's Lemon Pillar. A very beautiful and entirely distinct large double, sulphur-yellow, perfectly formed flower, that has proven hardy in this latitude during the past four seasons. Fine as a pillar Rose. \$50.00 per 100.

Phyllis Bide. The feature of this variety is that it blooms continuously throughout the summer and fall, and while its flowers are small they are of exquisite form in the bud opening with gracefully reflexed petals and are produced in long, loose sprays; in color a pale gold at base, flushed and shaded pretty rosy-carmine towards the edges. \$40.00 per 100.

Solarium. In single-flowered Ramblers this is a gem. It is of the same type as Hiavatha on which it is a decided improvement, the flowers being larger, more freely produced and of more brilliant coloring, an intensely rich crimson-scarlet. \$50.00 per 100.

Star of Persia. A brilliant new Rose with flowers on the style of the old Harrison's Yellow, semi-double, bright yellow and about 3 inches across. A striking variety, bursting into bloom early in June. It does not fade and the flower trusses last several weeks. \$50.00 per 100.

DREER'S SELECT Hardy Perennial Plants

For many years Hardy Perennials have been one of our principal specialties and our stock at the present time is unquestionably the most complete both in quantity and variety in the country.

The majority of the Perennials here offered are pot grown; this does not mean that the plants have been altogether pot grown, they are mostly field grown plants that are potted during the fall and winter months. Usually beginning early in April the plants are shipped with the pot ball of soil; such stock can be planted late in spring and during the early summer months without risk of loss, which is not the case with plants dug from the field as the season advances.

Japanese Flowering Cherry

Japanese Flowering Cherries

The display of Japanese Flowering Cherries at Washington, D. C., in early spring is one of the great sights of our national capital and annually attracts thousands of visitors.

These cherries are among the earliest trees to flower, coming into bloom early in April. The different varieties, single and double, extend the flowering season for fully four weeks, the attractive single-flowered varieties coming into bloom first, followed by the double sorts. They are perfectly hardy, and will succeed in almost any location.

We offer eight of the choicest varieties, six erect growing and two weeping varieties, a selection made for us by one of the most experienced growers.

Erect Growing Varieties

Daybreak. One of the earliest to bloom, flowers single pink appearing before the leaves in greatest profusion.

Naden. One of the prettiest double pinks, the petals are so numerous as to make the flower a perfect tuft.

Pink Pearl. The earliest of the doubles. Flowers fully 1½ inches in diameter, light pink shading deeper at the edges; very free.

Takasago. Double light pink massed into large compact clusters, very showy, blooms before the leaves appear.

Tkon. Unique in having yellow flowers slightly tinted green, as the flowers mature the veins in the petals change to cerise; late flowering; semi-double.

Victory or Shirofugen. Very double, up to 2½ inches in diameter borne in racemes of about 3 each on long stems; flowers open a delicate pink changing to white; late flowering.

Price. Any of the above in strong plants 4 to 5 feet high \$2.50 each.

Weeping Varieties

Eureka Weeping (Japanese Weeping Rose Flowering Cherry). A single light pink that has been grown in this country for 50 years, a tribute to its beauty and popularity.

Park Weeping. Differs from the above in the color of its flowers which are of a deep pink and a stronger grower.

Price. Either of the above two weeping varieties on 4-foot stems, strong one-year-old heads \$3.50 each.

Pyracantha (Crataegus) Coccinea Lalandi

(Firethorn or Evergreen Thorn)

There is no other fruiting evergreen Shrub that is so attractive throughout the year as this fiery Thorn, and which will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high; it may be planted either in connection with other Shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect. Strong pot-grown plants 15 to 18 inches high, 75 cts. each.

Viburnum Carlesi

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of Bouvardia. Good bushy specimens 1½ to 2 feet high, \$1.50 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, one-year old, 15 to 18 inches high, \$2.50 per doz.; \$20.00 per 100.

White Dutch Clover

Finest Recleaned. Invariably used in mixtures for lawns, as it forms a thick mat of dwarf evergreen foliage, and its creeping roots make an excellent preventative from "washouts" on terraces and embankments. Wheel Hoes, Cultivators and Seeders

Much of the tedious, back-breaking seeding, weeding and hoeing are eliminated by the use of adjustable wheel tools. Being light and simple in construction, they are practical tools for women and children. Market gardeners use them, making possible accurate sowing and thorough cultivation in rows too narrow for horse tools.

Send for a Planet Jr. Catalogue. It is possible to list only a few of these tools here since the line includes a very complete assortment of hand tools and horse tools, both for one horse and two horses.

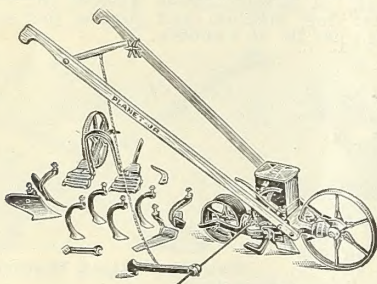

No. 3 Planet Jr. Hill and Drill Seeder

A popular size at a moderate price. The size used by growers excepting the very largest market gardeners. **\$16.50.**

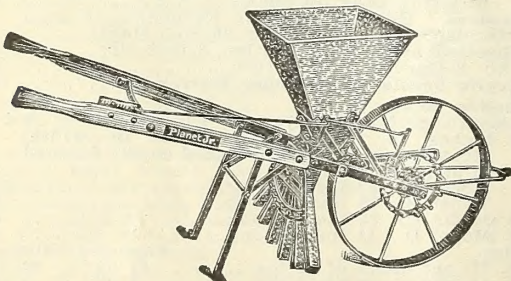

No. 4 Planet Jr. Combined Hill and Drill Seeder and Single Wheel Hoe

The small grower should select one of the combined machines. The drill attachment will not be used as often as the hoeing and cultivating tools, but will be a source of much saving. As a Hill and Drill Seeder it opens the furrow, deposits the seed, covers it and rolls it, either in drills or hills. Holds 2 1/2 quarts. **\$17 00**
No. 4D Seeder. Only 13 25

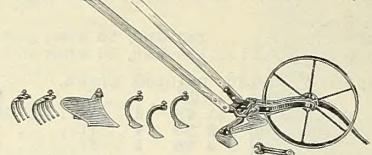

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe

Used as a double wheel hoe, it straddles the row, cultivating both sides at one time till plants are 20 inches high. It can then be used as a single wheel hoe between the rows. The equipment of one pair of garden plows, 4 cultivator teeth, 1 pair of 6-inch hoes and leaf lifters enables you to do practically all the garden work. Capacity of seed hopper, 2 1/2 quarts. **\$20.00.**

No. 220 Planet Jr. Fertilizer Distributor

With this machine you will save fertilizer, time and labor, and produce bigger crops. Will distribute 100 to 2000 pounds of commercial fertilizer to the acre. Hopper capacity, one bushel. Price, **\$25.50.**
