# FOKUS PÅ INSEKTER

Vores branche mærker en stadig stigende interesse og forståelse for biodiversitet. Der er i dag skabt et fællesskab på tværs af interessegrupper, medier, fagfolk og forbruger om at øge indsatsen for at skabe bedre betingelser for et bedre dyre- og planteliv i haven og i det offentlige rum. Det mærkes tydeligt og vil også fremover være højt prioriteret.

Vi forøger løbende at forbedre vores hjemmeside, billedetiketter og skilte, infoskilte, nyhedsbreve osv. i den retning og gør flere tiltag.

På hjemmesiden er det blevet gjort muligt at søge og filtrere på de stauder vi betragter som insektvenlige.

I vores e-shop, har vi lavet et nogle få temaer, der er mere specifikke og som f.eks kunne være velegnet til sommerfugle. Du finder temaerne i produktmenuen.

Vi har nogle runde vejrbestandige klistermærker med Bi-logo, som passer til billedskiltene, vi har nogle større skilte i 30x90 cm til de sorte træ-skilteholder.

For knap et år siden indførte Haveselskabet et insektmærke i deres magasiner. Mærket er et symbol på at planten er insektvenlig og vil blive vist for de planter, som er gode fødekilder for insekter, fordi planten indeholder pollen og/eller nektar.

I samarbejde med Haveselskabet, vil vi bruge det samme symbol på vores næste generation af billedetiket og netop til de stauder, hvor det giver mening. Kommer på etiketten, efterhånden som de "gamle" etiketter slipper op og vi forventer at det ske langt hen ad vejen i løbet af foråret.
