# van Vliet New Plants

Protection, Control, Marketing,  
Management, Global Network

**Welcome to Van Vliet New Plants, your trusted partner in the world of plant varieties. We specialize in the introduction, exploitation, and management of new plant varieties that are protected by plant breeders rights. With our extensive experience and global network, we ensure that each variety reaches its full potential in the market.**

**Protection:** At Van Vliet New Plants, we understand the importance of protecting new plant varieties. Our dedicated team works closely with plant breeders to secure plant breeders rights, safeguarding their intellectual property. By offering legal protection, we ensure that the innovative efforts of breeders are recognized and rewarded.

**Control:** We take pride in maintaining strict quality control measures to guarantee the excellence of our plant varieties. Through meticulous testing and evaluation, we ensure that every plant meets the highest standards before it is introduced to the market. Our commitment to quality control sets us apart and ensures customer satisfaction.

**Marketing:** With a comprehensive understanding of the market, we devise tailored marketing strategies for each plant variety. Our skilled team collaborates with a wide network of growers and wholesalers worldwide to identify the ideal market opportunities. By leveraging our marketing expertise, we maximize the visibility and profitability of every plant variety we manage.

**Management:** Van Vliet New Plants excels in the efficient management of plant varieties. From initial introduction to ongoing cultivation, we provide expert guidance and support throughout the lifecycle of each variety. Our dedicated team of advisors offers personalized solutions, enabling growers and wholesalers to optimize production and distribution.

**Global Network:** As a global player, we have established a vast network of partner agencies and advisors around the world. This expansive reach allows us to connect with (new) growers and wholesalers, ensuring that our plant varieties find their way into diverse markets. Through collaboration and partnerships, we foster growth and success on a global scale.

Choose Van Vliet New Plants for your plant variety needs. With our expertise in protection, control, marketing, management, and global networking, we are your reliable partner in introducing exceptional plant varieties to the market. Contact us today to explore the exciting possibilities that await your business.

NewGen® Boxwood's mission is to set a new standard for superior boxwood varieties. With years of observation, trialing, and research, we introduce a new generation of plants that exhibit exceptional resistance to boxwood blight, other diseases, and boxwood leafminer when given proper care. Our comprehensive approach includes secure testing

methods, the introduction of superior cultivars, an international network of experts, ongoing genetic advancements, support for researchers, and brand marketing. NewGen® strives to provide the industry with improved boxwood cultivars and valuable insights into common challenges faced by boxwood today.

In 2024, we are introducing an extraordinary new Gaultheria variety with special features. This innovative cultivar has very good tolerance against colletotrichum, which is a big problem in normal Gaultheria procumbens.

What sets Indian Summer apart is its unique

appearance, distinctively different from the normal Gaultheria procumbens varieties. Its early flowering (already in May/June) trait is an added advantage, extending the period of sale. In autumn the plant is full of berries which are nicely on top of the plant.

Conifers hold a special place in our assortment as one of the oldest product groups offered by Van Vliet New Plants. Our journey began nearly 25 years ago when we emerged as a division of Gebr. van Vliet, which was a company with 40 years of expertise in cultivating grafted and non-grafted conifers. Today, we take pride in our extensive collection of conifers, which includes well-known varieties such as **Thuja occidentalis 'Mirjam' (pbr)** (featured on page 87) and the rising star, **Thuja occidentalis 'King of Brabant' (pbr)** (also on page 87).

Kazimierz Nowak was a Polish explorer of the 20<sup>th</sup> century, he traveled by bike from Poznan (Poland) to Africa, an immense trip of 40,000 km. This *Taxus baccata* 'Kazimierz Nowak' Torpedo (pbr) is a tribute to Kazimierz Nowak.

The variety has an exceptional growth rate, surpassing even the 'Fastiagata Robusta' in speed. *Taxus baccata* Torpedo showcases a slender, upright habit and has a deep, rich green foliage color.

The Thuja occidentalis 'GK01' (pbr) Great Star is an excellent choice for medium height hedges. It has a strikingly dark green needle color that remains vibrant even during the winter months. With its branches positioned close together, Great Star naturally forms a dense hedge.

Compared to the 'Smaragd', Thuja occidentalis 'GK01' (pbr) Great Star has a slower growth rate, approximately 50% slower. This characteristic eliminates the need for frequent pruning, making it ideal for low to medium height hedges.

# Grasses

---

Grasses are a fairly new addition to our assortment, reflecting the popularity they have gained in recent years. It's easy to see why they have captured the hearts of gardeners and patio enthusiasts alike. Their versatility and appeal make them a fantastic choice for enhancing both gardens and patios. Take a moment to explore our selection, including the most compact **Cortaderia** there is (on page 96) and discover our range of dancing **Cordylines** (on page 95). Many more grasses like Miscanthus and Pennisetum will be added to our assortment in the near future.

# Trees

---

Within our portfolio, we proudly feature an array of magnificent trees. One of our primary focuses lies in alley trees, like the series of colorful **Betula** varieties (on page 104). These stunning trees add a splash of color to any landscape. Additionally, our assortment includes remarkable specimens like **Albizia julibrissin 'Tropical Dream' (pbr)** (on page 103), known for the improved frost hardiness. Explore our selection of trees and discover the perfect addition to your assortment.
