WELCOME

to the NBG Spring Plant Sale

THE MISSION OF NORFOLK BOTANICAL GARDEN:
IMMERSE VISITORS IN A WORLD OF BEAUTY
LEAD THROUGH ENVIRONMENTAL ACTION
INSPIRE THROUGH EDUCATION AND CONNECTION TO NATURE

Norfolk Botanical Garden is a nonprofit 501 (c) (3) organization. Thank you for your generous support of this fundraiser. Please consider becoming a Member, if you are not already, so that we can continue our mission. In addition to FREE daily admission, **your membership includes 10% off all plant sale** and gift shop purchases, discounts on classes and special events, as well as reciprocal benefits with over 300 gardens throughout the United States and Canada. [Click here to become a Member!](#)

Below are some helpful tips on making the most of our annual spring plant sale. Happy Shopping!

How to shop the sale:

- The plant sale is included with regular Garden admission
- There are a limited number of carts available but you are welcome to bring your own
- We can hold your purchases while you bring your car around for loading, or if you want to go explore the Garden after making your purchase.

Terms of Sale:

Please note—this catalog is not a firm list of all plants that will be available. Some of them may not be ready at the time of the sale and will be withheld. Additionally, we may add plants for sale at the last minute.

While there is no expressed guarantee on any of the plants, staff from our Horticulture Dept. will be on hand throughout the sale to help you select the best plants for your situation, and later they can offer advice if the plants are not thriving. This sale is one of our largest annual fundraisers, and one that our staff looks forward to and prepares for year-round. More important than the money, it is a chance to get quality plants out into the community so that we can all grow a greener world!

NBG Behind-the-Scenes

Have you ever wondered how we're able to offer over 400 varieties of plants every spring? Many of the plants for sale come straight from the Garden, propagating for months, or sometimes years, before they are ready to sell. For instance, these Hydrangea cuttings were created in July of 2023, and if everything works out right, they just may make it to our sale next year in 2025!

Named in honor of long-time friends and generous donors to the Garden, The Edward C. & Betty Lou Johnston Family Greenhouse Complex is located behind the Kitchen Garden. It is here that many of the plants seen in the Garden, and offered at our plants sales begin their life.

Left: NBG Event Designer and Horticulturist Linda Saunders

Make Way for MONARCHS

Planning on buying some butterfly weed? Already have some? The genus *Asclepias* plays a vital role in migratory monarch life cycles. Milkweeds, like butterfly weed (*Asclepias tuberosa*) and swamp milkweed (*Asclepias incarnata*) are host plants for monarchs, their foliage being an excellent place to lay eggs, while the flowers provide nectar to many native pollinators. Within the urban communities of Coastal Virginia, monarchs heavily rely on milkweed planted in backyard gardens to support the next generation of butterflies. Meghan Britton is a current PhD student at Old Dominion University, studying urban ecology and milkweed populations. If you have milkweed in your yard and are interested in helping to protect monarchs, consider reaching out to Meghan at mbrit010@odu.edu.

What can you do?

Plant Milkweed

Although it has the word “weed” in its name, milkweed is not considered a noxious weed. Create a butterfly-friendly garden with milkweed and native plants that are great nectar sources.

Don't Spray Me!

Don't mistake hungry “worms” devouring your plants as pests. Instead, recognize them as baby butterflies in a different stage of their lifecycle. Caterpillars may consume all of the leaves on a milkweed plant—but this does not destroy the plants, it actually initiates re-growth.

Reduce Turf

Reduce the amount of turf in favor of habitat-friendly garden beds. Less turf leads to less dependence on chemicals. Less turf also reduces the need for fueled equipment, thus reducing your carbon footprint.

Abutilon 'Apricot'

'Apricot' Flowering Maple — has showy orange flowers from late spring through summer that attract hummingbirds. The foliage is shaped like maple leaves, thus its common name. Most *Abutilon* are marginally hardy in Coastal Virginia, but we have been growing this one for many years. In warmer areas the species behaves as a shrub, but here the top dies out in winter. Therefore, it is best to cut it back in March and treat it as a perennial. Make sure it has full to part sun and moist well drained soil, and mulch well in late fall. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

4-5' T&W
Zones 8-11
Pot Size: #1

Achillea millefolium

Common Yarrow — is one of the most widely spread perennials, having naturalized in much of North America. Its beautifully textured foliage is very aromatic and is reason enough to grow this plant, but its flat clusters of ivory white flowers are great for attracting butterflies and other beneficial pollinators to your garden. Flower arrangers love it too! It needs full sun in soil with excellent drainage. Once established it is tolerant of dry soils, salt, and deer. **\$6.00**

1-3' T&W
Zone 3-9
Pot Size: #1

Achillea 'Sassy Summer Sangria'

Walter's Gardens, Inc.

'Sassy Summer Sangria' Yarrow — is part of a series of yarrows noted for their profusion of flowers on strong tall stems that bloom late spring into summer. This selection has huge heads of dark red flowers with white eyes that are great for attracting butterflies and other beneficial pollinators to your garden. The aromatic foliage is very handsome as well. Flower arrangers love it too! It needs full sun in soil with excellent drainage. Once established it is tolerant of dry soils, salt, and deer. **\$12.00**

30-36" T x 30-32" W
Zones 3-8
Pot Size: #1

Achillea 'Sassy Summer Sunset'

Walter's Gardens, Inc.

'Sassy Summer Sunset' Yarrow — is part of a series of yarrows noted for their profusion of flowers on strong tall stems that bloom late spring into summer. This selection has huge heads of bright orange flowers that are great for attracting butterflies and other beneficial pollinators to your garden. The aromatic foliage is very handsome as well. Flower arrangers love it too! It needs full sun in soil with excellent drainage. Once established it is tolerant of dry soils, salt, and deer. **\$12.00**

30-36" T x 30-32" W
Zones 3-8
Pot Size: #1

Hummingbird Mint — is a species native to Mexico, but is hardy here in Coastal Virginia. The plant is covered in apricot colored flowers from early summer into fall, and it is indeed a hummingbird magnet, but butterflies and other insect pollinators like it too. Like other *Agastache* species the foliage is very aromatic with a minty aroma that typically repels deer and rabbits. It prefers full sun in moist soil with good drainage; drought tolerant once established. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

18-30" T&W
Zones 7-10
Pot Size: 1 qt.

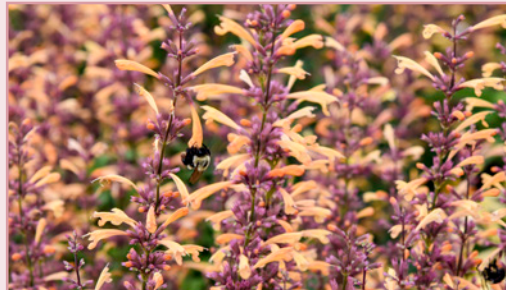

Agastache aurantiaca

Agastache 'Blue fortune'

'Blue Fortune' Giant Hyssop — is a pollinator magnet and a hybrid between an Asian and a North American native species. Spikes of small lavender-blue tubular flowers are attractive to hummingbirds, butterflies, bees, and other pollinators. Blooms heavily in early summer to early fall. Aromatic foliage has a peppermint-lemon scent when brushed against or crushed. Exceptional massed in beds and borders. Prefers full sun in well drained soil, drought tolerant, deer and rabbit resistant. **\$12.00**

2'-3' T x 1.5'-2' W
Zones 5-9
Pot Size: #1

Agastache 'Queen Nectarine'

Walter's Gardens, Inc.

'Queen Nectarine' Anise Hyssop — is part of the MEANT TO BEE™ Collection whose plants were selected for their large, full habits, significant landscape presence, and hardiness. It has soft peachy flowers held in a contrasting mauve calyx and they bloom from early summer to early fall. In flower, 2/3rds of the plant is covered with blossoms attracting hummingbirds, butterflies, and other insect pollinators. Like other *Agastache*, it has strongly aromatic, minty foliage. Prefers full sun in well drained soil, drought tolerant, deer and rabbit resistant. **\$12.00**

30-36" T&W
Zones 5-9
Pot Size: #1

Agave americana subsp. protoamericana

Century Plant or Agave — will give your landscape a touch of the exotic Southwest, and while many species and varieties are not hardy here, this one has proven to be exceptionally hardy for Coastal Virginia. It has handsome blue-green foliage with the same spiky nature of other *Agave*. All *Agave* species are monocarpic, meaning that after they flower, the mother plant will die, but not before creating several litters of "pups". Fortunately, it can take 10-20 years for them to flower, and what a dramatic flower it is, attracting insect pollinators and hummingbirds. This selection has proven very winter hardy, just make sure it has very good drainage and full sun; drought, salt and heat tolerant; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

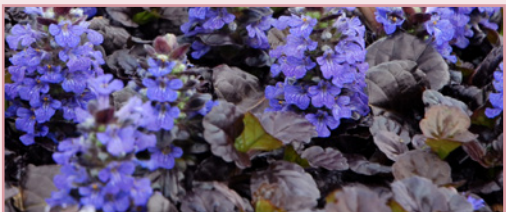

6-8' T&W
Zones 7-10
Pot Size: 1 qt.

Ajuga reptans 'Atropurpurea'

Bronze Bugleweed — is an attractive groundcover with glossy, bronzy purple to green, scalloped leaves and a dense habit. From mid to late spring, short spikes of violet-blue flowers stand upright above the very low, spreading foliage. The flowers attract butterflies, bees, and other pollinators. This evergreen groundcover can grow in the shade of large trees where grass is hard to establish. Given adequate moisture, this plant will grow in full sun, but partial shade is probably more suitable. It needs moist well drained soil. If happy, this plant can spread vigorously. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

6" T x 8-10" W
Zones 3-9
Pot Size: 2 qt.

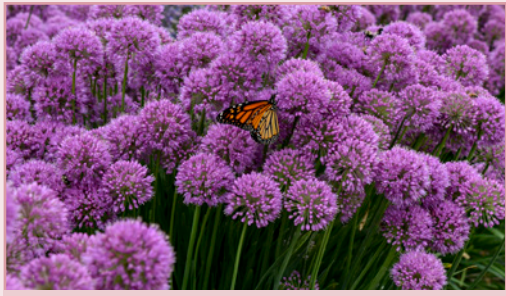

Ajuga reptans 'Binblasca'
BLACK SCALLOP

Photo Courtesy of Walter's Gardens, Inc.

BLACK SCALLOP Bugleweed — is an attractive groundcover with glossy, near-black, scalloped leaves and a dense habit. From mid to late spring, short (4-6") spikes of deep blue flowers stand upright above the very low, spreading foliage. The effect is stunning when planted *en masse*. The flowers attract butterflies, bees, and other pollinators. 'Black Scallop' tends to spread more slowly and stay naturally compact compared to other bugleweed. It is reported to be resistant to powdery mildew. This evergreen groundcover can grow in the shade of large trees where grass is hard to establish, but the best foliage color is brought out in more sun. It needs moist well drained soil. **\$10.00**

3-6" T x 8-10" W, Zones 4-10, Pot Size: 2 qt.

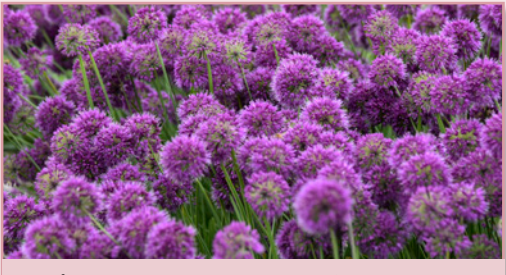

Allium 'Serendipity'

Walter's Gardens, Inc.

'Serendipity' Ornamental Onion — has attractive blue-green foliage and rosy purple, globe-like flowers that bloom profusely in mid to late summer. Being an onion, the foliage has that typical smell, but that is what keeps rabbits and deer away. Butterflies and other insect pollinators are attracted to the flowers. It is also a good choice for the cut flower garden. Prefers full to part sun in moist well drained soil; drought tolerant. **\$12.00**

15-20" T x 10-15" W
Zones 4-8
Pot Size: #1

Allium 'Lavender Bubbles'

Photos courtesy of Walters Gardens, Inc.

'Lavender Bubbles' Ornamental Onion — is a beautiful perennial that near the end of summer brings dusty purple, bubble-shaped flowers to the garden attracting butterflies and other insect pollinators. It also has attractive glaucous blue-green foliage whose blades twist and curl to provide additional interest. When bruised or crushed, the foliage has an onion aroma that deters deer and rabbits. Unlike other ornamental onions, this one is a late bloomer. Prefers full to partial sun in moist well drained soil; drought tolerant once established. **\$12.00**

12-14" T x 20-22" W
Zones 4-8
Pot Size: #1

Amsonia hubrichtii

Arkansas Blue Star — is an American native perennial that sports clusters of small, star-shaped light blue flowers above fern-like foliage in late spring. This tall clumping grower has a rugged constitution, tolerating full sun to partial shade, and once established, it is considerably drought tolerant and deer resistant. After blooming, the finely textured foliage remains light green all summer, finally turning a stunning golden yellow in the fall. In fact, it is one of the best-known perennials for fall foliage color, and it contrasts well with fall blooming asters. It needs well drained soil. In 2011, Arkansas blue star was named the Perennial Plant of the Year™ by the Perennial Plant Association. **\$10.00**

2-3' T&W
Zones 4-9
Pot Size: #1

Amsonia 'String Theory'

Walter's Gardens, Inc.

'String Theory' Blue Star — is a newer hybrid *Amsonia* with finely textured foliage similar to Arkansas blue star, but on a smaller plant. In late spring beautiful star-like blue flower clusters bloom at the end of each stem. After flowering, the plant will add beautiful soft texture with its fern-like foliage, and in fall the foliage turns a rich golden orange. It prefers full sun in moist well drained soil; drought tolerant and easy to grow thriving in heat and humidity. **\$10.00**

18-22" T x 32-36" W
Zones 4-9
Pot Size: #1

Anemone virginiana

photo courtesy of C. T. Johansson

Thimbleweed — is a Virginia native with handsome white flowers that bloom in mid to late spring on tall stalks that rise gracefully above the foliage. The flowers will attract native pollinators, but the foliage contains toxins that make the plant distasteful to browsing deer and rabbits. Once it is done flowering, the thimble-like seed structures will add interest through the summer. It will grow in full sun to shade, preferring moist well drained soil, but it is drought tolerant once established. **\$6.00**

3' T x 1-1.5' W
Zones 3-8
Pot Size: 1 qt.

Asclepias incarnata

Swamp Milkweed — is a Coastal Virginia native that prefers moist soil making it a good choice for rain gardens or to plant near water, but it does well in regular soil as well. Beautiful, fragrant, pink flowers are a nectar source for many butterfly species, but other insect pollinators are drawn to the flowers as well. Like all milkweeds, the leaves are the only food source for monarch butterfly caterpillars. It prefers full sun in moist to wet soils; deer and rabbit resistant. **SAVE THE MONARCHS! \$12.00**

3-4' T x 1.5-2' W
Zones 3-9
Pot Size #1

Asclepias incarnata 'Cinderella'

'Cinderella' Swamp Milkweed — is a Coastal Virginia native that prefers moist soil making it a good choice for rain gardens or to plant near water, but it does well in regular soil as well. Beautiful, fragrant, pink flowers are a nectar source for many butterfly species, but other insect pollinators are drawn to the flowers as well. 'Cinderella' produces larger and denser flowers than the straight species. Like all milkweeds, the leaves are the only food source for monarch butterfly caterpillars. It prefers full sun in moist to wet soils; deer and rabbit resistant. **SAVE THE MONARCHS! \$12.00**

2-4' T x 1-3' W
Zones 3-9
Pot Size #1

Photo from Walter's Gardens, Inc.

Asclepias tuberosa

Butterfly Weed — is a Coastal Virginia native with striking orange flowers that bloom in summer attracting numerous butterfly species and other beneficial pollinators. It starts to bloom in early summer, and deadheading will produce blooms into August. Like all milkweeds, this is one of the only host foods for monarch butterfly caterpillars. This species is always one of the last to emerge late in the spring. It prefers full sun in well drained soil, and it is quite tolerant of poor soils, heat, drought, deer, rabbits, and salt. **SAVE THE MONARCHS! \$12.00**

1-2.5' T x 1-1.5' W
Zones 3-9
Pot Size #1

Asclepias tataricus 'Jindai'

'Jindai' Tartarian Aster — is dramatic fall bloomer with lavender-blue, daisy-like petals surrounding golden centers on 4-5' dramatically tall stalks. Despite being an Asian native, Tartarian asters attract local butterflies and other insect pollinators, plus birds will eat its seeds. Prefers full sun in moist well drained soil; deer resistant. Given plenty of water and rich soil, this plant can be very vigorous, but not invasive. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

3-5' T x 1-3' W
Zones 4-8
Pot Size: #1

Baptisia 'American Goldfinch'

'American Goldfinch' Baptisia (False Indigo) — is a hybrid of the native species featuring golden yellow flower spikes that rise over 3' above the blue-green foliage. After blooming it produces attractive round seed pods in the fall. This plant is perfect for mass plantings and will be sure to attract both butterflies and bees to your garden. Prefers full to partial sun in well drained lean soil, drought and salt tolerant, deer resistant. **\$20.00**

3-3.5' T x 4.5-5' W
Zones 4-9
Pot Size: #3

Walters Gardens, Inc.

Baptisia 'Blue Bubbly'
DECADENCE® DELUXE

Walters Gardens, Inc.

'Blue Bubbly' Baptisia (False Indigo) — is a hybrid of the native species that features long, 16" lavender-blue spikes that appear above attractive blue-green foliage. *Baptisia* in the DECADENCE® DELUXE series grow taller than other selections. Attractive to bees and butterflies. Plant in full to partial sun with well drained lean soil, drought and salt tolerant, deer resistant. **\$20.00**

48-54" T x 40-48" W
Zones 4-9
Pot Size: #3

Baptisia 'Grape Taffy'

Walters Gardens, Inc.

'Grape Taffy' Baptisia (False Indigo) — is an excellent selection for a smaller garden, with spikes of deep red/purple flowers coming in at 2-2.5' tall. The flowers of this native perennial attract butterflies and bees, and they are also great for flower arrangements. Plant in full to partial sun with lean well drained soil, drought and salt tolerant, deer resistant. **\$20.00**

24-30" T&W
Zones 4-9
Pot Size: #3

Baptisia 'Pink Truffles'

Walters Gardens, Inc.

'Pink Truffles' Baptisia (False Indigo) — has clear soft pink blossoms with pale yellow keels that are produced in late spring. *Baptisia* in the DECADENCE® DELUXE series grow taller than other selections. Attractive to bees and butterflies. Plant in full to partial sun with well drained lean soil, drought and salt tolerant, deer resistant. **\$20.00**

48-54" T x 36-48" W
Zones 4-9
Pot Size: #3

Berlandiera lyrata

Chocolate Flower — is native to Mexico and the American Southwest. It has showy, yellow, daisy-like flowers that will bloom all summer if deadheaded. The interesting name comes from the flowers scent which is reminiscent of chocolate. Butterflies and other insect pollinators are attracted to the flowers, and birds will enjoy the seeds. This plant thrives in heat and full to part sun. It prefers moist, but very well drained soil; drought tolerant; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

1-2' T&W
Zones 4-10
Pot Size: 1 qt.

Caryopteris incana
'DCARBEBAR' BEYOND PINK'D®

BEYOND PINK'D® Bluebeard — is one of the prettiest pink *Caryopteris* that has yet been created! It boasts large, glossy, spearmint-green foliage and spires of pure-pink flowers, stacked in neat layers along the stem. It blooms throughout the summer into early fall attracting a variety of butterflies and other insect pollinators. Like other bluebeards, it can be considered a woody perennial or a sub-shrub, and it prefers full sun in well drained soil. Once established it is drought resistant, heat and humidity tolerant, and deer avoid it. **\$20.00**

2-2.5' T&W
Zones 7b-9
Pot Size: #1

Conoclinium coelestinum

Bluemist Flower — is a Coastal Virginia native perennial that offers months of color from late July into mid-fall. Clouds of purple blue flowers attract a wide variety of butterflies and insect pollinators, and birds will enjoy the seeds. The plant has a wild nature and can be on the vigorous to aggressive side, so it should be planted where it will have plenty of room. It prefers full to partial sun in moist soil, but it tolerates wet soil; deer resistant. **\$10.00**

1.5-3' T&W
Zones 5-10
Pot Size: #1

Coreopsis verticillata 'Moonbeam'

'Moonbeam' Threadleaf Coreopsis (Tickseed) — is a reliable bloomer and a favorite with gardeners. The flowers are a glowing, lemon-yellow color and sit on top of tall, erect, lacy, somewhat mound forming, delicate looking green foliage that has an airy appearance. The flowers are plentiful and bloom continuously throughout the entire summer with deadheading, attracting butterflies and other insect pollinators, but late in the season leave the seedheads so that they become food for birds. Threadleaf coreopsis is a Coastal Virginia native that likes full sun in moist well drained soil, but it is drought tolerant once established; deer resistant. **\$12.00**

18-24" T&W
Zones 3-9
Pot Size: #1

Coreopsis verticillata 'Zesty Zinger'
SIZZLE AND SPICE®

Photos courtesy of Walters Gardens, Inc

'Zesty Zinger' Threadleaf Coreopsis (Tickseed) — is a cultivar of a Coastal Virginia native Coreopsis that forms a spreading clump of very delicate, ferny foliage. This selection, part of the SIZZLE AND SPICE® series, bears loads of 1½", light ivory flowers with dark magenta centers which spread toward the edge of the petals, blooming early summer into fall. Butterflies and other insect pollinators are attracted to the flowers. Deadheading faded flowers will encourage buds to form all season, but late in the season leave the dried seedheads as bird food. Prefers full sun in moist well drained soil, but it is tolerant of hot, dry sites, and it is deer resistant. **\$12.00**

15-18" T x 22-26" W
Zones 5-9
Pot Size: #1

Crocosmia 'Lucifer'

'Lucifer' Crocosmia — has bright red, tubular flowers that bloom for a long time during the summer attracting hummingbirds and butterflies. Despite their South African origins, this iris relative does very well in local gardens, and will vigorously spread if happy. It also makes a sought-after cut flower. Prefers full to part sun in moist well drained soil; heat, humidity, rabbit, and deer tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

2-4' T x 1-2' W
Zones 5-9
Pot Size: 1 qt.

Delosperma cooperi

Iceplant — despite its name, is a succulent that can really take hot dry weather. Fleshy blue green foliage hugs the ground making this a great groundcover. From June until September, bright, fuchsia-pink, star-shaped flowers bloom above the foliage. It flourishes in dry, sandy soil in full sun and is perfect for dry gardens, rock walls, or containers. Salt tolerant. 3-6" T x 1-2' W, Zones 6-10. **\$12.00**

3-6" T x 1-2' W
Zones 6-10
Pot Size: #1

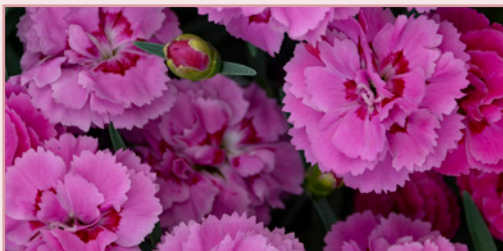

Dianthus 'Cherry Vanilla'
FRUIT PUNCH®

Walter's Gardens, Inc.

'Cherry Vanilla' Dianthus — is part of the FRUIT PUNCH® series whose varieties are semi to fully double, have fragrant flowers, and have good heat and humidity tolerance. Flowers appear in early summer, and a quick shearing after flowering will encourage them to rebloom in early fall. 'Cherry Vanilla' has fully double, carnation-like flowers. 1½" wide, deep red flowers have a sharply contrasting, very light pink picotee edge. The flowers attract butterflies and other insect pollinators. Prefers full to part sun in moist well drained soil, but it is tolerant of the occasional dry spell and it is slightly salt tolerant as well. **\$10.00**

8-10" T x 8-12" W
Zones 4-9
Pot Size: 1 qt.

Dianthus 'Goody Gumdrops'
PRETTY POPPERS™

Walters Gardens, Inc.

'Goody Gumdrops' Dianthus — is part of the PRETTY POPPERS™ series, whose selections are semi-evergreen and offer an abundance of red, pink, and white flowers. 'Goody Gumdrops' has semi-double, fuchsia pink flowers with a red eye over blue-green foliage. Both foliage and flowers are fragrant, the blooms are butterfly and bee friendly. They prefer full sun in moist well drained soil; drought and salt tolerant once established. **\$10.00**

8-10" T x 16" W
Zones 4-9
Pot Size: 1 qt.

Dianthus 'Maraschino' **FRUIT PUNCH®**

Walter's Gardens, Inc.

'Maraschino' Dianthus — is part of the FRUIT PUNCH® series whose varieties are semi to fully double, have fragrant flowers, and have good heat and humidity tolerance. Flowers appear in early summer, and a quick shearing after flowering will encourage them to rebloom in early fall. 'Maraschino' has cherry red flowers with dark burgundy eyes. The flowers attract butterflies and other insect pollinators. Prefers full to part sun in moist well drained soil, but it is tolerant of the occasional dry spell and it is slightly salt tolerant as well. **\$10.00**

9-11" T x 12-14" W
Zones 4-9
Pot Size: 1 qt.

Dianthus 'Sweetie Pie' **FRUIT PUNCH®**

Photos Courtesy of Walter's Gardens, Inc.

'Sweetie Pie' Dianthus — is part of the FRUIT PUNCH® series whose varieties are semi to fully double, have fragrant flowers, and have good heat and humidity tolerance. Flowers appear in early summer, and a quick shearing after flowering will encourage them to rebloom in early fall. 'Sweetie Pie' has true pink flowers with darker pink eyes. The flowers attract butterflies and other insect pollinators. Prefers full to part sun in moist well drained soil, but it is tolerant of the occasional dry spell and it is slightly salt tolerant as well. **\$10.00**

10" T x 12-14" W
Zones 4-9
Pot Size: 1 qt.

Dicliptera squarrosa

Uruguayan Firecracker Plant — is also known as the hummingbird plant, because it will indeed attract them to your garden, as well as butterflies. Hot orange flowers bloom all summer and contrast nicely with the cool silver green foliage. This plant thrives in hot dry locations, as well as in humidity - it is a tough plant! It prefers full to partial sun in well drained soil; drought tolerant, slightly salt tolerant, and deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

1.5-2' T x 1.5-3' W
Zones 8-10
Pot Size: #1

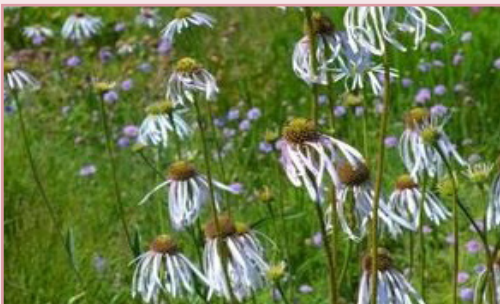

Dyschoriste oblongifolia

Sharpj99

Twin Flower — is a hard-to-find plant, native from Georgia to Florida (though some sources list it in Virginia as well). Its beautiful lavender flowers attract many pollinators, and it is a host plant for common buckeye butterflies. It's spreading habit and ease of growth make it an excellent groundcover. It prefers full to partial sun in moist well drained soil, and it does show a degree of tolerance for drought. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

6-8" T x 12" W
Zones 8-11
Pot Size: #1

Echinacea pallida 'Hula Dancer'

New Moon Nursery

'Hula Dancer' Pale Purple Coneflower — is a cultivar of a Midwest native coneflower. Surrounding its central cone are pale, blush pink, nearly white petals that sway in the breeze. The color is lighter than the species, and the blooms are slightly larger. The early summer flowers attract butterflies, and other beneficial pollinators. Once the seeds are ripe, they will attract seed-eating birds. It prefers full to part sun in moist well drained soil. Once established, it is drought tolerant, but will not thrive in wet soils; deer resistant. **\$10.00**

2-3' T x 1-1.5' W
Zones 3-8
Pot Size: #1

Echinacea purpurea 'Magnus'

'Magnus' Purple Coneflower — is an older variety of the North American native purple coneflower, but it is one of the best, a time-tested, superior cultivar. It has tall upright stems topped with attractive cones surrounded by broad spreading pink petals. Like other coneflowers, the blooms will attract butterflies and other insect pollinators. The flowers begin in late spring and last into early fall if deadheaded. However, late in the season, leave the seedheads for birds to enjoy. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant. **\$8.00**

2.5-3' T x 1-1.5' W
Zones 3-8
Pot Size: 2 qt.

Echinacea purpurea 'PowWow White'

Photo from Walter's Gardens, Inc.

'PowWow White' Coneflower — is a vigorous variety of the North American native purple coneflower, however, this one has large white flowers on sturdy stems, plus it is more florific than other selections. Like other coneflowers, the blooms surround a golden cone and attract butterflies and other insect pollinators. The flowers begin in late spring and last into early fall if deadheaded. However, late in the season, leave the seedheads in place for birds to enjoy. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant. **\$8.00**

18-24" T x 12-16" W, Zones 3-8,
Pot Size: 2 qt.

Echinacea purpurea 'Rubenstern'

Ruby Star Echinacea — is a selection of the North American native purple coneflower. It is a favorite at NBG for its bright carmine pink blooms which are more intense in color and larger than other *Echinacea*. Like other coneflowers, the flowers begin blooming in late spring and will continue into fall if deadheaded. However, towards the end of the season stop deadheading so that the birds can enjoy the ripe seeds. The flowers will attract butterflies and other insect pollinators. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant. **\$12.00**

Zones 3-8
Pot Size: #1

Echinacea purpurea 'White Swan'

'White Swan' Coneflower — is a reliable selection of the North American native purple coneflower, and it is one of the better white flowered selections. It has tall upright stems topped with attractive cones surrounded by broad spreading ivory petals. Like other coneflowers, the blooms will attract butterflies and other insect pollinators. The flowers begin in late spring and last into early fall if deadheaded. However, late in the season, leave the seedheads for birds to enjoy. It prefers full to part sun in moist well drained soil. Once established, it can survive the occasional drought; deer resistant. **\$12.00**

Eryngium aquaticum

Marsh Rattlesnake Master — is a Coastal Virginia native that grows naturally in bogs, marshes, and other wet areas. It can also grow in normal garden soil as long as it is kept moist, but once established can also take the occasional drought. The handsome foliage and flowers are great in cut and dried arrangements. The white flowers have a blue or purple tinge and bloom summer through fall, naturalizing easily through seed. The flowers are very attractive to butterflies, other insect pollinators, and birds. Marsh rattlesnake master prefers full to partial sun; deer resistant. **\$12.00**

18-48" T x 36-48" W
Zones 6-8
Pot Size: #1

Eupatorium perfoliatum

Boneset — is a Coastal Virginia native that produces clusters of small white flowers in late summer to fall, which are very attractive to butterflies, bees, and other beneficial insects. A must-have for the pollinator-friendly garden! The ripe seeds are eaten by songbirds. Historically, boneset was also quite valued for its medicinal properties. Prefers full to partial sun in consistently moist soil, tolerates wet soils. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

Euthamia graminifolia

Grass-leaved Goldenrod — is a Virginia native perennial formerly listed as *Solidago graminifolia*. In late summer, flat-topped clusters of golden flowers bloom above grass-like foliage. The flowers are especially attractive to butterflies and other insect pollinators, and later, the seeds will provide food for birds. It prefers full to partial sun in moist well drained soil, but it is also tolerant of poor dry soils. Caution: in ideal, sunny moist soils, this plant will spread vigorously, but if you are planting pollinator and bird buffet, this can certainly be on the menu! **\$10.00**

Pot Size: #1

Eutrochium dubium

Coastal Plain Joe Pye Weed — is a Coastal Virginia native that produces large clusters of pink flowers in summer that last into fall. Butterflies and bees are attracted to the flowers, and once the seeds are ripe, birds relish them. It prefers full sun to partial shade in moist soil. It is mildly salt tolerant, deer resistant, and quite tolerant of soggy soil, but not tolerant of drought. **\$8.00**

3-6' T x 2-4' W
Zones 3-9
Pot Size: 2 qt.

Gaura lindheimeri 'Siskiyou Pink'
North Creek Nurseries

'Siskiyou Pink' Gaura — is the first pink flowered selection of the North American native perennial. Wine-red buds open to rose pink flowers with white stamens, all on wispy, "see-through" stems that move in the breeze. Plants bloom over a long period of time in the summer. Shorter than other varieties and with darker foliage. Occasional white flowers will appear, but they are few. The flowers also attract pollinators. It prefers full to partial sun in well drained lean soil. If the soil is too rich or the site too shady, the plants may tend to flop and will need support. Very tolerant if heat, drought, and deer. **\$12.00**

12-24" T x 12-24" W
Zones 5-9
Pot Size: #1

Hedychium coronarium

Butterfly Ginger — is an exotic Asian perennial that is perfectly hardy in Coastal Virginia. A favorite at NBG, it typically grows 4-6' tall and 2'-3' wide, but will spread with time. The tall foliage stalks will remind you of the tropics, and the white flowers that bloom in late summer will perfume your entire garden with the sweetest fragrance. Individual flowers resemble butterflies, hence the common name. Requires full to partial sun in moist well drained soil; tolerant of heat, humidity, salt, and occasionally wet soils. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

Pot Size: #1

Heliopsis helianthoides 'Tuscan Sun'

'Tuscan Sun' False Sunflower — is a cultivar of a carefree, disease resistant, native Virginia perennial. Bright golden yellow, daisy-like flowers with an orange-gold button center are produced on strong stems. The plant has a compact habit and it blooms in the hottest part of the summer, attracting butterflies and other insect pollinators, while birds will enjoy the seeds. Full to partial sun in moist well drained soil. **\$12.00**

24-36" T x 20-24" W
Zones 3-9
Pot Size: #1

Helianthus tuberosus

Jerusalem Artichoke, a.k.a. Sunchoke — is not actually an artichoke, nor is it native to the Holy Land. Rather, it is in the sunflower family and native to the central U.S., though it has spread vigorously beyond its original boundaries. In part, this spread has been due to human activity. Indigenous peoples valued the plant's tuber as a nutritious (and medicinal) food source, and when Europeans arrived on the continent they ate it as well and further spread the species. In late summer to fall the plant produces showy bright yellow flowers that attract butterflies and other insect pollinators, and later birds will eat the ripened seeds. It prefers full to partial sun in moist soil, but it needs good drainage. Once established it can tolerate drought. Buyer beware — this plant gets big, and if happy, it may spread beyond its intended bounds. If so, just eat it! **\$12.00**

Pot Size: #3

Paeonia 'Paula Fay'

Foxglove Beardtongue — is an elegant native, perennial wildflower that forms upright clumps. This beardtongue has deep green leaves on strong upright stems. In late spring to early summer, plants are topped by showy panicles of tubular snapdragon-like white flowers. Hummingbirds, butterflies, and other insect pollinators are attracted to the flowers, and birds will eat the seeds. Prefers full to partial sun in moist, but well drained soil; drought and deer tolerant. **\$8.00**

3-5' T x 1.5-2' W
Zones 3-8
Pot Size: #1

Penstemon digitalis

'Husker Red' Foxglove Beardtongue — is a native perennial cultivar that is noted for its burgundy-red new growth that matures to a dark green in summer. Like the species, the plant is topped by showy panicles of tubular snapdragon-like white flowers in late spring to early summer. Hummingbirds, butterflies, and other insect pollinators are attracted to the flowers, and birds will eat the seeds. Prefers full to partial sun in moist, but well drained soil; drought and deer tolerant. **\$10.00**

Penstemon 'Midnight Masquerade'

Walters Gardens, Inc

Phlox 'Bedazzled Lavender'
Walter's Gardens, Inc.

'Bedazzled Lavender' Hybrid Spring Phlox — is similar to the old favorite, creeping phlox, but these fragrant flowers bloom about a week earlier and their lavender toned flowers are little larger. The blooms will attract insect pollinators that happen to be active in late winter to early spring. The parents of this hybrid groundcover are North American natives, and the foliage is evergreen and mildew resistant. Prefers full sun in moist well drained soil, but it is drought tolerant once established. **\$6.00**

Phlox 'Fashionably Early Crystal'
Walters Gardens, Inc.

'Fashionably Early Crystal' Hybrid Phlox — is part of a series with North American native parentage whose selections bloom earlier than typical garden phlox (*Phlox paniculata*) as well as having a more spreading habit. They also have exceptional mildew resistance and thick leathery leaves. 'Fashionably Early Crystal' is a taller selection with pure white flowers with a faint light purple eye that appear from early summer well into midsummer with some rebloom in fall. The flowers are fragrant and attract butterflies, bees, and hummingbirds. They prefer full to partial sun in moist well drained soil. **\$12.00**

28-32" T x 26-30" W

Pot Size: #1

Phlox paniculata 'Cover Girl'
GARDEN GIRLS®
Walters Gardens, Inc

'Cover Girl' Tall Garden Phlox — is a cultivar of a Coastal Virginia native, as well as being part of the GARDEN GIRLS® series which is known for its mildew resistant varieties and rebloomers. This selection has fragrant lavender purple flowers with white halos in the center. They will bloom and rebloom from early summer into autumn attracting a variety of insect pollinators and hummingbirds. They do best in full to part sun in moist well drained soil. **\$12.00**

38-42" T x 24-28" W
Zones 3-8
Pot Size: #1

Phlox paniculata 'Jeana'

'Jeana' Phlox — is probably the best garden phlox for disease resistance, and it is a favorite among NBG staff. Large tiered clusters of small, fragrant, lavender pink flowers bloom from mid-summer to early fall, attracting butterflies and hummingbirds aplenty. This Coastal Virginia native prefers full to partial sun in moist well drained soil. **\$12.00**

2-4' T x 2-3' W

Pot Size: #1

Phlox subulata 'Eye Caramba'
Walters Gardens, Inc.

'Eye Caramba' Creeping Phlox — is a cultivar of an old-fashioned, reliable garden favorite that is native to North America including central and western Virginia. It has evergreen foliage and a groundcover-like habit. 'Eye Caramba' has bright pink flowers with red eyes that cover the plant in spring, attracting butterflies and other insect pollinators. It does best in full sun with moist well drained soil, but once established it is quite drought tolerant. It also tolerates deer, rabbits, heat, humidity, and salt, but not shade or continually wet soil. **\$10.00**

4-6" T x 18-20" W

Zones 2-9

Pot Size: 2 qt.

Phlox 'Violet Pinwheels'
Walters Gardens, Inc.

'Violet Pinwheels' Hybrid Phlox — is an evergreen, groundcover phlox, similar to creeping phlox. However, this selection has a more intense violet purple color not seen in any creeping phlox cultivar. The flowers bloom in late winter to early spring and attract insect pollinators. It does best in full sun with moist well drained soil. Tolerant of salt, but not shade or continually wet soil. **\$10.00**

4-5" T x 24-36" W

Zones 4-8

Pot Size: 1 qt.

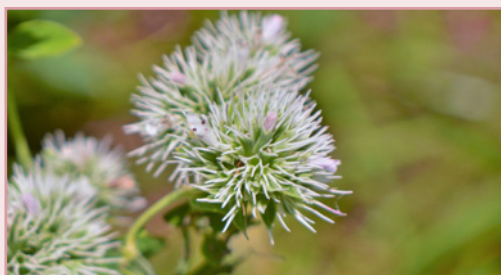

Physostegia virginiana

Obedient Plant — is a North American native, also at home in many parts of Virginia. In late summer it sends up 10" spikes of pink flowers above the foliage that attract a host of insect pollinators and butterflies, as well as hummingbirds. The plant can be considered aggressive or vigorous depending on your perspective, so give it room. It prefers full to partial sun in moist well drained soil; it tolerates a wide range of soil types and is deer resistant. **\$8.00**

3-4' T x 2-3' W

Zones 3-9

Pycnanthemum flexuosum

Appalachian Mountain Mint — despite its common name, is a Coastal Virginia native with rounded clusters of white to lavender flowers that bloom in late summer atop very aromatic foliage. Like other mountain mints, it attracts a wide variety of insect pollinators. Unlike other mountain mint, this one spreads more slowly. It prefers full to partial sun in moist well drained soil; drought tolerant once established and deer resistant. **\$10.00**

2-3' T x 1-3' W

Zones 5-8

Pot Size: #1

Pycnanthemum muticum

Short-toothed Mountain Mint — is a Coastal Virginia native with very minty, aromatic foliage. The actual flowers begin blooming in summer and while not terribly showy, the silvery bracts beneath them are quite handsome. This is one of the best native perennials for attracting beneficial insect species to your garden. In good conditions this plant will spread vigorously. It prefers full to partial sun in moist well drained soil. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

Rudbeckia 'American Gold Rush'

'American Gold Rush' Black-eyed Susan — is a new version of an old-fashioned favorite, and it is a hybrid of our native Rudbeckia. It is noted for its resistance to septoria leaf spot, with a compact dome-like habit, and a profusion of gold and black flowers through the summer. The blooms attract butterflies and other insect pollinators, and birds like the ripe seeds. It prefers full sun in moist well drained soil; once established it can take occasional dry spells. **\$10.00**

Zones 4-9
Pot Size: 2 qt.

Rudbeckia fulgida var. fulgida

Black-eyed Susan (sometimes listed as Orange Coneflower) — is a widespread North American native perennial, including parts of Virginia. This particular variety blooms a little later than other Rudbeckia (July to October), but still has a profusion of cheery yellow, daisy-like flowers surrounding a brown eye. The flowers attract a variety of insect pollinators and birds enjoy the ripe seeds. It also makes a good cut flower. It prefers full to part sun in dry to moist well drained soil; drought tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

24-30" T x 24" W
Zones 5-9
Pot Size: 2 qt.

Rudbeckia laciniata

Cutleaf Coneflower (a.k.a. Green Headed Coneflower) — is a Coastal Virginia native that blooms from summer into fall. The bright yellow, daisy-like petals surround a green cone, which attract butterflies and other insect pollinators. Goldfinches especially relish the ripened seeds. This is a tall plant and a vigorous spreader that may need to be divided frequently unless it is given room to spread. It prefers full to part sun in moist well drained soil; it is very tolerant of heat and humidity, and it is deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

4-7'+ T x 1-3' W
Zones 3-9
Pot Size: 2 qt.

Rudbeckia maxima

Giant Coneflower — is an incredible North American native with big blue-green leaves and impressively tall flower stalks of bright yellow, summer blooming, coneflowers. The flowers are very attractive to butterflies, bees, and other pollinators, and the dried seedheads provide food for various songbirds. Prefers full to partial sun; best in consistently moist soils, but is tolerant of the occasional drought; heat and deer tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

Salvia 'ARCTIC BLAZE™ Purple'

'ARCTIC BLAZE™ Purple' Salvia — is a hybrid of the Texas native autumn sage (*Salvia greggii*). Like its parent, it will bloom from late spring into early autumn with vibrant fuchsia-purple flowers that attract butterflies, other insect pollinators, and hummingbirds. The aromatic foliage generally deters deer and rabbits. Prefers full to partial sun in moist but well drained soil; drought tolerant once established. **\$12.00**

2' T x 3" W
Zones 6-11
Pot Size: #1

Salvia guaranitica 'Black and Blue'

'Black and Blue' Salvia — is a favorite perennial at NBG. It is known for its tall stature and long-blooming, cobalt blue flowers surrounded by striking near-black calyces and stems. It flowers from early summer through fall, deadheading promotes additional flowers. Its intense color and aromatic foliage (reminiscent of licorice) attract attention, including that of butterflies, bees, and hummingbirds! Full sun to part shade in well drained soil; drought tolerant; deer and rabbit resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

2-5' T x 2-5' W
Zones 8-10
Pot Size: #1

Salvia lyrata 'Purple Knockout'

'Purple Knockout' Lyerleaf Sage — is a selection of the Coastal Virginia native that is grown for both its flowers and its foliage, as well as its groundcover-like habit. The shiny burgundy leaves turn to deep purple in summer and then to red in the fall. Spikes of pale lilac blue flowers appear in spring and summer, attracting bees, hummingbirds, and butterflies. The ripe seeds will attract songbirds. Will grow in full sun to partial shade; prefers moist well drained soil, but is drought tolerant once established. This is a vigorous spreader. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

Sedum 'Frosted Fire'

Photo Courtesy of Walter's Gardens, Inc.

'Frosted Fire' Sedum —is a variegated selection with handsome green and creamy white foliage. It also has clusters of butterfly and bee-friendly flowers that open green, age to rosy pink, and in fall turn a handsome light brown, adding winter interest. The seeds are occasionally eaten by birds. Like other sedums, it prefers full sun in lean soil, and it must have good drainage; drought and salt tolerant. **\$8.00**

12-15" T x 18" W
Zones 3-9
Pot Size: 1 qt.

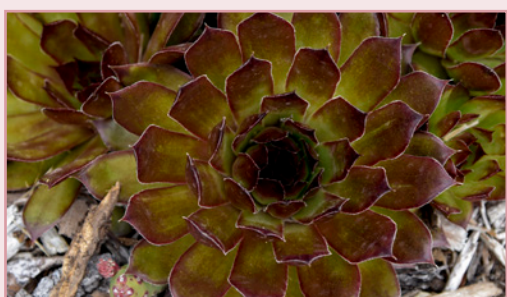

Sedum 'Midnight Velvet'
ROCK 'N GROW®

Walter's Gardens, Inc.

'Midnight Velvet' Sedum — is a tall selection and part of the ROCK 'N GROW® series. It offers dark purple foliage on a domed plant. In late summer, mauve buds open to rose-red flowers that age to dark red, then fade further. The blooms are attractive to butterflies and other insect pollinators. The spent flowerheads can provide interest into fall and early winter, as well as providing a potential meal to birds. Full sun in needed for the best foliage color; needs well drained soil; drought, deer, and salt tolerant. **\$5.00**

22-26" T x 30-32" W
Zones: 3-9
Pot Size: 3 in.

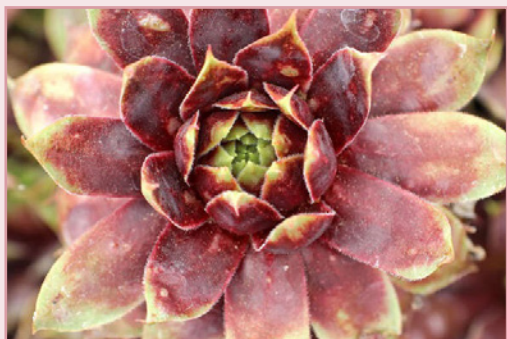

Sempervivum 'Black'

Walters Gardens, Inc.

'Black' Hens and Chicks — is a hardy succulent that has green centers with dark, black red tips, and it is the perfect choice for gravelly, poor soils. As the plants age, the large rosette, a.k.a. the "hen", may die out and be replaced by the "chicks". Plants can be divided easily at any time by pulling up some of the "chicks" and replanting them elsewhere. This plant is particularly effective when planted in the cracks and crevices of stone walls or walkways. It is also very attractive in containers. Must have full sun with dry, well drained soil; tolerant of deer, drought, and salt. Not tolerant of wet soil. **\$12.00**

4-6" T x 6-8" W
Zones 3-8
Pot Size: 2 qt.

Sempervivum 'Killer'

Mountain Crest Gardens

'Killer' Hens and Chicks — is a hardy succulent with large (5") rosettes whose maroon centers and green tips. It is the perfect choice for gravelly, poor soils. As the plants age, the large rosette, a.k.a. the "hen", may die out and be replaced by the "chicks". Plants can be divided easily at any time by pulling up some of the "chicks" and replanting them elsewhere. This plant is particularly effective when planted in the cracks and crevices of stone walls or walkways. It is also very attractive in containers. Must have full sun with dry, well drained soil; tolerant of deer, drought, and salt. Not tolerant of wet soil. **\$12.00**

4-6" T x 6-8" W
Zones 3-8
Pot Size: 2 qt.

Sinningia sellovii

Hardy Orange Gloxinia — is an unusual plant from South America that is perfectly hardy in Coastal Virginia. Throughout the summer and into early fall, tall stalks produce dramatic clusters of coral-orange, bell-shaped flowers that hummingbirds find irresistible. It prefers full sun in lean, well drained soil. Keep moist, but not soggy. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

4.5' T x 2-3' W
Zones 7b-10b
Pot Size: 1 qt.

Sisyrrinchium angustifolium 'Lucerne'
North Creek Nurseries

'Lucerne' Blue-eyed Grass — despite its common name, is not a grass at all, but actually a member of the Iris family, and it is native to all parts of Virginia. 'Lucerne' has bright blue star shaped flowers with gold centers that rise above fine, semi-evergreen, grass-like foliage from May to June. It is also more florific than the straight species and has a more compact habit. The flowers are very attractive to a number of insect pollinators, and songbirds appreciate the ripe seeds. Prefers full sun to partial shade in moist well drained soil; drought tolerant and deer resistant. **\$8.00**

10-12" T x 6-12" W
Zones 5-9
Pot Size: 2 qt.

Solidago shortii 'Solar Cascade'

'Solar Cascade' Goldenrod — is a well behaved clump former with golden yellow blooms in August and September. The flowers attract a variety of insect pollinators, and the ripe seeds attract birds. The species, quite rare in the wild, grows in limited areas along the Ohio River in Kentucky and Illinois, so help perpetuate this plant by planting some in your own garden. It prefers full to partial sun in moist well drained soil, though it is quite drought tolerant once established; deer resistant. **\$12.00**

2-3' T x 1-2' W
Zones 3-8
Pot Size: 2 qt.

Solidago sphacelata 'Golden Fleece'

North Creek Nurseries

'Golden Fleece' Goldenrod — is a more compact, lower growing selection featuring arching, golden-yellow flower spikes that bloom in the late summer. This Virginia native attracts hordes of insect pollinators, and songbirds relish its ripe seeds. Prefers full to partial sun in well drained sandy soil, though it is very tolerant of a wide range of conditions; drought tolerant and deer resistant. If happy, this plant can spread vigorously. **\$12.00**

18-24" T x 24-36" W
Zones 4-9
Pot Size: #1

Stachys monieri 'Hummelo'

North Creek Nurseries

'Hummelo' Betony — bears numerous spikes of small bright violet-purple flowers above compact healthy clumps of oblong, wrinkled, mid-green leaves that are often evergreen. The knee-high flower spikes are showier and somewhat more compact than those of most other forms of common betony. The flowers attract bees, hummingbirds, and butterflies. In time the plant will spread politely to form a colorful groundcover. Prefers full to partial sun in moist well drained soil; drought tolerant once established and deer resistant. **\$12.00**

18-24" T x 18-24" W
Zones 4-8
Pot Size: #1

Stachys officinalis 'Silver Carpet'

'Silver Carpet' Lamb's Ear — is an evergreen groundcover with silvery green, fuzzy foliage. You just want to reach out and touch it! This selection rarely flowers, so the plant puts all of its energy into the foliage. Prefers full sun in moist well drained soil; heat, humidity, and drought tolerant. **\$8.00**

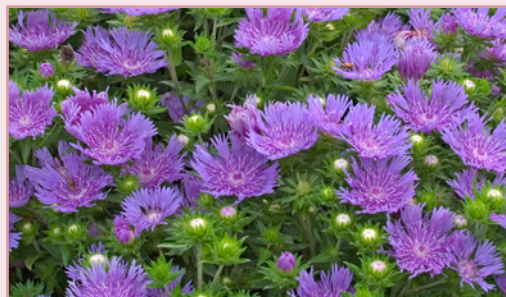

12" T x 12-18" W
Zones 4-9
Pot Size: #2

Stokesia laevis

Stoke's Aster — has cornflower-like, pale, violet blue flowers cover this perennial over a long season from summer into the fall attracting butterflies. It is a Southeastern native giving it great heat and humidity tolerance. Deadheading will extend the bloom season into fall contrasting nicely with fall blooming flowers. Prefers full sun in moist well drained soil; deer and rabbit resistant; drought tolerant once established. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$10.00**

12-24" T x 12-08" W
Zones 5-9
Pot Size: #1

Stokesia laevis 'Peachie's Pick'

Walter's Gardens, Inc.

'Peachie's Pick' Stokes Aster — has cornflower-like rich purply blue flowers that cover the plant over a long season from summer into the fall attracting butterflies and other insect pollinators. It is a compact variety that tends to bloom a little later than the species. Stoke's aster is a Southeastern native giving it great heat and humidity tolerance. Deadheading will extend the bloom season into fall contrasting nicely with fall blooming flowers. Prefers full sun in moist well drained soil; deer and rabbit resistant; drought tolerant once established. **\$12.00**

18" T x 18-24" W
Zones 5-9
Pot Size: #1

Symphyotrichum georgianum

Georgia Aster — is a lovely and rare Southeastern native perennial with violet-purple, fall blooms - some of the most intensely colored of any American aster. Like its cousins, this plant is very attractive to butterflies and other insect pollinators. Songbirds will appreciate the ripened seeds. Threatened in the wild due to habitat loss and fire suppression, you can help this plant survive by planting it in your own garden. Prefers full sun in moist well drained soil; drought tolerant once established. **\$12.00**

1.5-3' T x 3-4' W
Zones 3-9
Pot Size: #1

Symphyotrichum novi-belgii
Showmakers® BLUE BAYOU

BLUE BAYOU New York Aster — is part of the Showmakers® series and is a cultivar of one of our native asters. It is distinct with its very dwarf size and double, violet-blue flowers that like many other asters bloom in late summer to early fall, attracting a variety of insect pollinators. Prefers full to partial sun in moist well drained soil; deer resistant. **\$8.00**

10-12" T x 18" W
Zones 4-8
Pot Size: 2 qt.

Symphyotrichum oblongifolium
'Raydon's Favorite'

'Raydon's Favorite' Aromatic Aster — is a North American native with deep violet-blue flowers in late summer to early fall, which are very attractive to butterflies and other insect pollinators. Songbirds will appreciate the ripened seeds. Prefers full sun, but will tolerate partial sun; needs well drained soil; drought tolerant once established; deer and rabbit resistant. An NBG favorite! **\$12.00**

2-3' T x 3+' W
Zones 4-9
Pot Size: #1

Teucrium chamaedrys

Wall Germander — is a low-growing evergreen sub-shrub and herb in the mint family that is native to Mediterranean regions. In late spring to summer, magenta pink tubular flowers bloom and are attractive to bees and butterflies. This plant tends to spread by underground stems, and is good for erosion control in the right conditions. Sheering after flowering will keep it more tidy. The silver green foliage is very aromatic and can be used for potpourri and to make tea. It needs full sun and must have very well drained soil; drought and deer tolerant. **\$8.00**

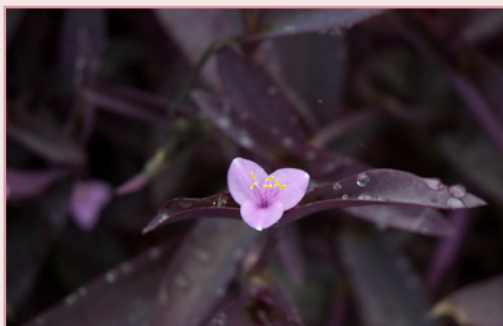

12-18" T x 12-24" W
Zones 5-9
Pot Size: 1 qt.

Thymus serpyllum

Mother of Thyme — is well suited as an evergreen groundcover for areas with full sun and dry well drained soil. The foliage is very aromatic, but there are better thymes for the kitchen. The tiny pink to purple flowers bloom in summer, and the plant forms woody stems. The flowers attract butterflies and other insect pollinators. A great choice for slopes, rock gardens, or to plant between stepping stones. Deer resistant and salt tolerant. **\$12.00**

2-3" T x 10-12" W
Zones 4-9
Pot Size: #1

Tradescantia pallida

Purple Heart — is often sold is a houseplant or as an annual to use in summer containers where its vibrant purple, lance-shaped leaves contrast and compliment other colors. However, it can also be used as an unusual groundcover, and in our climate it is hardy. Although it is grown primarily for its foliage, the small, pink, summer blooming flowers are attractive as well. It will grow in full sun to partial shade, but the best foliage color will be in more sun. It likes moist well drained soil; drought and salt tolerant; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$8.00**

1' T x 1-2' W
Zones 8-11
Pot Size: 1 qt.

Tulbaghia violacea

Society Garlic — is a perennial from South Africa, and gardeners may have trouble finding a perennial that blooms for as long as it blooms. Beginning late spring and going until the first freeze, clusters of lilac pink flowers continuously bloom. The flowers are edible and can be used fresh in salads. The grass-like foliage smells like garlic which is great if you like garlic. If you don't, beware that aroma intensifies with the first cold weather. Easy to grow, this South African, clump forming perennial can take full sun, heat, humidity, drought, salt, and deer. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$12.00**

12-18" T x 12" W
Zones 7b-10
Pot Size: #1

Verbena bonariensis

Purple Top Vervain — goes by many common names, including verbena-on-a-stick, and to see its habit, you can see why. Up to 5' tall wispy stalks are topped with a cluster of pale purple flowers that attract butterflies, bees, and hummingbirds. Birds will later enjoy the ripened seeds. The foliage stays much lower than the skinny flower stalks making this a “see-through” plant that can weave its way around the garden without blocking views. It also makes a great cut flower. Prefers full to part sun in moist well drained soil; tolerant of drought, deer, and poor soil. If it is happy, it can seed around aggressively, but the seedlings are easily pulled. Plant a piece of NBG in your own garden - this offering comes from our collection. **\$8.00**

2-5' T x 1' W
Zones 7-11
Pot Size: 2 qt.

Verbena stricta

Hoary Vervain — is a North American native that is found naturally in much of the mid-west. It is clump forming perennial that spreads easily from seed, and a great choice for sunny, dry gardens. Butterflies and other insect pollinators are attracted to its tall spikes of purple-blue flowers that bloom in summer. Birds and other wildlife will enjoy the seeds. It prefers full sun in well drained soil, avoid soggy soil; drought tolerant. **\$8.00**

2-4' T x 1.5-2' W
Zones 4-8
Pot Size: 3 qt.

Verbena tenuisecta (Purple)

Moss Verbena — is low growing perennial that will carpet your garden with ferny green foliage and blooming mat of flowers from late spring through summer that attract butterflies and other insect pollinators. In its native South America, the flowers can be pink, white, or purple, but we have selected this one for its rich purple blooms. It does best in full sun, but can also take light shade, though it will not have as many blooms there. It also needs moist well drained soil, but once established it can take the occasional drought. Very heat and humidity tolerant. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$6.00**

1-1.5' T x 3-6' W
Zones 6-12
Pot Size: 1 qt.

Vernonia novaboracensis

New York Ironweed — is a tall, low maintenance perennial that is native to much of eastern North America, including Coastal Virginia. Beginning in mid-summer and lasting into early fall it produces clusters of dark purple flowers that attract a host of insect pollinators, and birds will enjoy the ripe seeds. It prefers full to partial sun in moist soil; tolerant of wet soils and deer. This plant gets tall, like the Empire State Building! **\$12.00**

5-8' T x 3-4' W
Zones 5-9
Pot Size: #1

Veronica 'Pink Potion' MAGIC SHOW®

'Pink Potion' Veronica — begins blooming in late spring through mid-summer with spikes of pink flowers that rise above dark green foliage attracting pollinators. Deadheading helps promote additional blooms. It prefers full to partial sun in moist well drained soil. Deer resistant and slightly salt tolerant. **\$12.00**

14-6" T x 18-22" W
Zones 4-8
Pot Size: #1

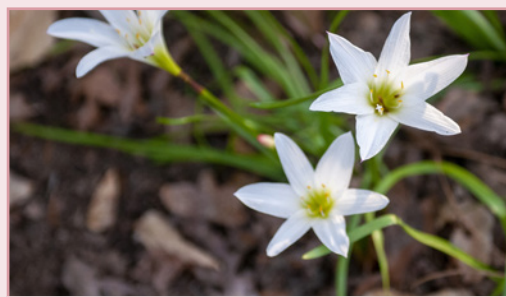

Veronicastrum virginicum

Culver's Root — is native to much of North America, including parts of Virginia (hence its botanical name). In late spring the flower spikes start blooming from the top down with white blossoms that occasionally take on blue or purple tones. Although this plant makes a good cut flower, leave a few on, because the blooms are especially attractive to specialized native bees and other pollinating insects. It prefers full to partial sun in moist well drained soil, though it can withstand occasionally wet soils; deer resistant. **\$12.00**

4-7' T x 2-4' W
Zones 3-8
Pot Size: #1

Zephyranthes atamasco

Atamasco Lily — is a Coastal Virginia native with grass-like foliage and showy, fragrant, trumpet-shaped, white (sometimes pink) flowers that bloom in spring. This ephemeral will go dormant during the summer, but through bulbs it will spread to form colonies. It prefers full sun to light shade in consistently moist to wet soils. Atamasco lily has a very local connection, in that it was one of the first wildflowers mentioned by the Jamestown colonists upon reaching Virginia. **\$12.00**

1-2' T x 6-12" W
Zones 7-10
Pot Size: #1

Zizia aurea

Golden Alexanders — has flat, 3" diameter clusters of tiny, bright yellow flowers that stand above its pleasing green foliage with continual color in early summer. It loves moist soil and performs well in full to partial sun. It's a good nectar source and essential larval food for native butterflies - a must for the pollinator garden. Native to North America, including many parts of Virginia. Tolerant of both occasional wet and dry conditions once established. **\$10.00**

1-2' T&W
Zones 3-8
Pot Size: #1

The horticulture team works hard to take care of our beautiful 175 acres of Garden spaces—and at the same time, provide great plants for sale to the community. A portion of the plants we sell every year come straight from the Garden, usually from what we refer to as a Dig and Divide. Plants that spread rapidly in optimal growing conditions often need to be thinned-out or contained to an area to avoid competing with other plants in a bed. Instead of discarding these otherwise perfectly healthy plants, we give them a second chance in our nursery, where NBG staff and volunteers look after them. Come with NBG Horticulturist Dakayla Calhoun to one of our Dig & Divide hotspots: Statuary Vista.

Dakayla prepares to dig and divide plants, which is best done in the winter when plants are dormant and there is less leafy material to get in the way.

A beautiful clump of [Monarda](#), also known as bee balm, ready to go to the nursery!

After identifying the plant to divide, use a sharp shovel to remove a large section or clump. Once out of the ground, a soil knife can be used to divide the clump into smaller pieces. Here, Dakayla created roughly 6" x 6" divisions of [Monarda didyma 'Jacob Cline.'](#)

Acanthus mollis

Acanthus, or Bear's Breeches — is prized for its bold clumps of shiny green foliage topped with striking, 3-foot-tall spires of white flowers which are clasped by showy purple bracts. It blooms in late spring to early summer. Another name for this plant is the Grecian pattern plant, as it was the inspiration for the Corinthian leaf motif in ancient Greek and Roman architecture, most often seen on Corinthian columns. Although the plant is drought tolerant, it will go dormant in summer without sufficient moisture. This is a great plant for an eye-catching structural element in a part-shade garden. **\$20.00**

3-6' 'T x 2-3' W
Zones 7a-10b
Pot Size #1

Acanthus 'Whitewater'

'Whitewater' Acanthus, or Bear's Breeches — is a variegated form with striking green and white, heavily textured foliage. The late spring to early summer flowers are whiter than those of *Acanthus mollis*, and are blushed with pink and rise above the foliage on taller stalks. Although the plant is drought tolerant, it will go dormant in summer without sufficient moisture. This is an unusual plant that will add an eye-catching structural element to a part-shade garden. **\$25.00**

3-4' 'T x 2-3' W
Zones 7a-10b
Pot Size #1

Alpinia japonica 'Extra Spicy'

'Extra Spicy' Hardy Ginger — can be difficult to find in local garden centers, but it grows well in Coastal Virginia. It thrives in shady gardens where the flower spikes emerge in mid to late summer with gorgeous white blossoms striped with red. However, the foliage is the real attraction, not only is it variegated green and white, but it also fragrant. The plant needs partial to full shade in consistently moist soil; do not let it go dry. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

2-2.5' T&
Zones 7b-1b
Pot Size: #1

Anemone x hybrida 'Montrose'

'Montrose' Japanese Anemone — begins blooming in late summer to early fall as other perennials are shutting down for the season. It produces soft pink flowers on wiry stems above a large mound of dark green, ruffled foliage. Light shade in moist well drained soil; deer and rabbit resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

30-36" T x 24-30" W
Zones 4-8
Pot Size: #1

Anemone x hybrida 'Honorine Jobert'

'Honorine Jobert' Japanese Anemone — is a hybrid that stands out with its attractive white flowers and bright yellow stamens that bloom for weeks. In optimum growing conditions it will spread and naturalize, and it makes a good cut flower as well. This plant was chosen as the 2016 Perennial Plant of the Year. It does best in part shade as foliage tends to burn in hot, dry sunny conditions. Prefers good drainage and moist soil. Deer tolerant. **\$12.00**

3-4' T x 1.5-2' W
Zones 4-9
Pot Size: #1

Aquilegia canadensis

Eastern Red Columbine — is a Coastal Virginia native and a wonderful addition to native plant gardens, woodland gardens, cottage gardens or naturalized areas. Freely self-seeds and will naturalize to form large colonies in optimum growing conditions. Unusual orange and yellow late spring flowers attract hummingbirds, bees, butterflies, and other pollinators, and the seeds will attract birds. While the flower stalks may get tall, the handsome, lacy, fern-like foliage stays lower. Prefers partial shade and moist well drained soil; deer resistant. Truly one of our best native wildflowers! **\$10.00**

1-3' T x 1.5' W
Zones 3-8,
Pot Size: 2 qt.

Aquilegia canadensis 'Pink Lanterns'

'Pink Lanterns' Columbine — is a compact selection of the Coastal Virginia native wildflowers. It has soft pink and white flowers that bloom in late spring attracting a variety of insect pollinators, plus birds and other animals will enjoy the seeds. Prefers partial shade and moist well drained soil; deer resistant. **\$5.00**

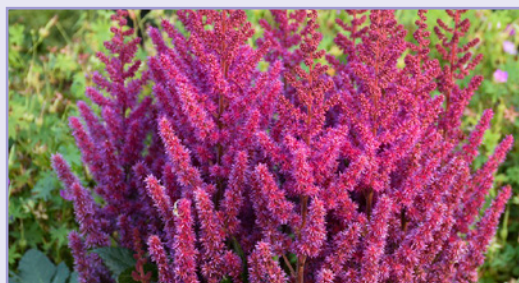

10-12" T&W
Zones 3-8
Pot Size: 2 qt.

Asarum splendens

Chinese Wild Ginger — has silver-splashed, evergreen foliage that can brighten any shady niche. Large glossy heart-shaped foliage conceals unusual purple-brown flowers tucked around the base of the plant in early spring. This is not a culinary ginger, but a showy, vigorous, wide-spreading groundcover for shade. It prefers full to partial shade in consistently moist soil; will need supplemental water during droughts. Deer and rabbit resistant. **\$12.00**

6-8" T x 10-16" W
Zones 5-9
Pot Size: #1

Astilbe chinensis 'Visions'

'Visions' Chinese Astilbe — is a dwarf selection that also blooms a little later in the season than other astilbe. In early to mid-summer, rosy pink, fragrant plumes arise above handsome foliage. The flowers will attract pollinating bees. It will do best in partial shade in moist well drained soil; deer and rabbit resistant. **\$12.00**

14-16" T x 12-15" W
Zones 4-9
Pot Size: #1

Bergenia cordifolia 'Miss Piggy'

'Miss Piggy' Pigsqueak (a.k.a. Heartleaf Bergenia) — is a new selection with a bit larger foliage and a bit showier flowers. In early spring, clusters of bright pink blooms rise above the thick leathery leaves. The flowers attract a few insect pollinators. The foliage is evergreen and takes on red and burgundy tones in cold weather, and it makes an unusual greenery addition to flower arrangements. It will do best in partial shade in moist well drained soil; salt tolerant; deer and rabbit resistant. Kermit sold separately. **\$10.00**

16-18" T x 28-32" W
Zones 4-8
Pot Size: #1

Walters Gardens, Inc.

Bletilla striata 'Alba'

White Flowering Chinese Ground Orchid — has pure white flowers in mid to late spring that will brighten the garden. Its iris-like foliage adds a nice texture to the garden, and the whole plant can act like a groundcover. Most people think of orchids as something for a greenhouse or warm windowsill, but this perennial orchid is hardy planted out in the garden. They prefer light sun to partial shade in moist well drained soil. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

12-18" T x 6-12" W
Zones 5-9
Pot Size: #1

Campanula punctata

Spotted Bellflower — is an Asian perennial with showy bell-shaped flowers that hang down gracefully from the plant's stalks. Its flowers are white to pink with darker spots inside. They begin blooming in late spring to early summer, and they make a good cut flower, and in Korea it is valued as an edible delicacy. Although listed as full to part sun, in hot Southern climates it will likely prefer morning sun/afternoon shade, or bright filtered light. It will need good drainage. It can be a vigorous spreader, and deer will avoid it. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$12.00**

1-2' T x 1.5-2.5' W
Zones 5-9
Pot Size: #1

Carex morrowii 'Ice Dance'

'Ice Dance' Japanese Sedge — has evergreen, variegated green and white, strap-like foliage and it makes a great groundcover, container plant, or something to brighten shady gardens. The spring blooming flowers are beige and insignificant; this plant is grown for its handsome foliage. Although it will grow from sun to shade, it will do best in partial shade in moist well drained soil; deer resistant. **\$10.00**

12-16" T x 18-24" W
Zones 5-9
Pot Size: #1

Carex oshimensis 'Everillo'
EVERCOLOR®

Walters Gardens, Inc.

'Everillo' Japanese Sedge — is part of the EVERCOLOR® series, and an exciting, new sedge for shade. Its lime green leaves gradually deepen to a solid golden yellow. It adds a burst of golden color to mixed container plantings, garden beds, and borders. The evergreen foliage will brighten up the darkest parts of any garden. It prefers partial shade in moist well drained soil; once established it has shown some resistance to drought; deer resistant. **\$12.00**

12-18" T x 28-32" W
Zones 5-9
Pot Size: #1

Carex plantaginea

Plantainleaf Sedge (a.k.a. Seersucker Sedge) — is native in the western part of Virginia where it grows in woodland conditions. The wide bright green foliage is handsome, semi-evergreen, and slightly puckered. The unusual flowers arise on purplish stalks in spring floating above the foliage. It prefers shady areas in moist, rich soil. **\$5.00**

8-10" T&W
Zones 3-7
Pot Size: #1

Chelone lyonii 'Hot Lips'

'Hot Lips' Turtlehead — has cheerful spikes of pink flowers (more colorful than the species) that cover the plant resembling snapdragons. This cultivar is also noted for its reddish stems. The species is native to eastern North America, and it flowers abundantly from August through October attracting hummingbirds, bees, butterflies, and other pollinators. It does best in partial shade or light sun in moist soil, but it is tolerant of wet soil as well as the occasional drought; deer resistant. *Plant a piece of NBG in your own garden, this offering comes from our collections.* **\$10.00**

2-3' T x 1' W
Zones 3-8
Pot Size: 3 qt.

Danae racemosa

Poet's Laurel — is a fabled plant, as it was used to crown the heads of ancient Greek and Roman heroes. It is also fabled among, and prized by flower arrangers as one of the best greens to add in an arrangement as the foliage has an incredibly long vase life. It is notoriously difficult and slow to propagate, making it a challenge to find in local garden centers. However, in the landscape it is easy to grow and one of the best plants where dry shade is a challenge. Long evergreen sprays of dark green foliage form clumps that can appear shrub-like. While the spring flowers are not that showy, they will produce bright red to orange fruit in late fall into winter adding color to the landscape. It prefers partial shade in moist well drained soil. Once established, it is quite drought tolerant. *Plant a piece of NBG in your own garden, this offering comes from our collections.* **\$20.00**

Dryopteris wallichiana 'Jurassic Gold'

'Jurassic Gold' Alpine Wood Fern — is an unusually colorful fern whose new spring fronds emerge a striking golden orange. As they age they go more chartreuse then green. Although they are hardy, they will only be evergreen to semi-evergreen in mild winters. Plant in partial to full shade in moist well drained soil, but they will tolerate the occasional drought, but only after well established. **\$8.00**

18-24" T&W
Zones 5-9
Pot Size: 1 qt.

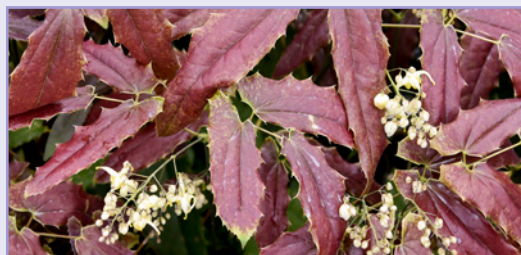

Epimedium 'Pink Champagne'

Walters Gardens, Inc.

'Pink Champagne' Barrenwort — has unusual raspberry pink and white flowers in early spring. As attractive as the flowers are, the mottled green and burgundy, evergreen foliage is also reason enough to grow this plant. Epimediums have become a favorite group of plants at NBG for their ease of growth, the ability to thrive in shade, their spreading groundcover-like habit, and for their ability to tolerate root competition from large trees. Partial to full shade in moist well drained soil is preferred, but once established they are drought tolerant; deer and rabbit resistant. **\$15.00**

18-24" T x 24-36" W
Zones 5-8
Pot Size: 2 qt.

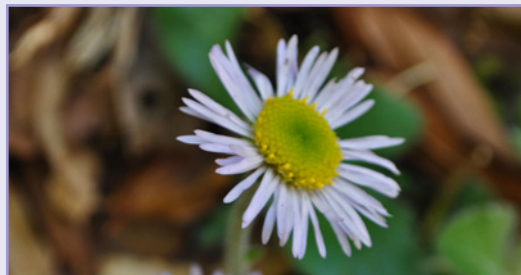

Epimedium wushanense 'Sandy Claws'

Walters Gardens, Inc.

'Sandy Claws' Barrenwort — is another unusual Epimedium with spiny foliage that emerges a rich burgundy color in spring, contrasting nicely with the ivory and yellow flowers. Epimediums have become a favorite group of plants at NBG for their ease of growth, the ability to thrive in shade, their spreading groundcover-like habit, and for their ability to tolerate root competition for large trees. Partial to full shade in moist well drained soil is preferred, but once established they are drought tolerant; deer and rabbit resistant. **\$15.00**

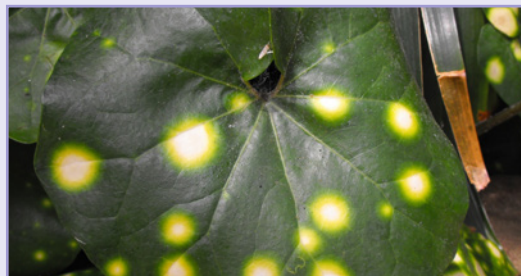

12-16" T x 18-24" W
Zones 6-8
Pot Size: 2 qt.

Erigeron pulchellus 'Lynnhaven Carpet'

'Lynnhaven Carpet' Robin's Plantain — is an outstanding Coastal Virginia native that was first found in a Virginia Beach garden and named for the Lynnhaven River. Beautiful light lavender flowers rise above its relatively large silvery green foliage, which forms a dense, semi-evergreen mat. This is a favorite perennial with NBG staff, mainly for its astonishing ability to thrive in a wide range of challenging conditions. Butterflies and other pollinators will appreciate it as well. 'Lynnhaven Carpet' will grow in sun or shade, but the more sun it gets the more water it needs, happiest in light sun to partial shade. The soil should be moist and well drained, drought tolerant, deer resistant, and pollinator friendly. It also makes a long-lasting cut flower. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

15" T x 10" W

Pot Size: 2 qt.

Farfugium japonicum 'Aureomaculata'

1-2' T&W
Zones 7-9
Pot Size: #3

Leopard Plant — is a semi-evergreen perennial with lush foliage. Each dark green leaf is spotted with gold. Even though this plant is primarily valued for its foliage, it also has late fall, yellow, daisy-like flowers that bloom on tall stalks above the foliage. It likes to be kept moist, and can even take a bit of wet every now and then; deer resistant. **\$25.00**

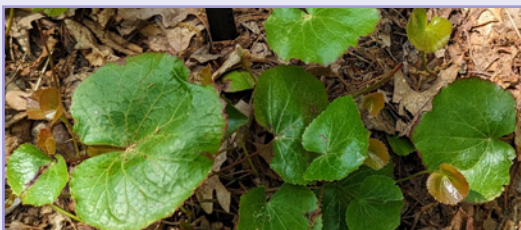

Farfugium japonicum var. giganteum

Giant Leopard Plant — is an unusual version of the spotted leopard plant, but without the spots. Instead, it has oversized, glossy, round, evergreen foliage, and looks as if someone has spent time polishing each leaf. It will really add a striking tropical element to your partially shaded garden. Even though this plant is primarily valued for its foliage, it also has late fall, yellow, daisy-like flowers that bloom on tall stalks above the foliage. It likes to be kept moist, and can even take a bit of wet every now and then; deer resistant. **\$25.00**

Hosta 'Maui Buttercups'

Walters Gardens, Inc.

'Maui Buttercups' Hosta — is a small growing variety with cupped and corrugated gold foliage. Spikes of white flowers rise above the foliage in late spring to early summer and may attract hummingbirds. Prefers partial to full shade in moist well drained soil. **\$12.00**

10" T x 14" W
Zones 3-9
Pot Size: #1

Hosta 'Tears in Heaven'

Walters Gardens, Inc.

'Tears in Heaven' Hosta — is a more upright grower than other blue hostas. The foliage has a cascading habit, and each leaf has an attractive ruffled edge. Spikes of lavender-purple flowers rise above the foliage in late spring to early summer and may attract hummingbirds. Prefers partial to full shade in moist well drained soil. **\$12.00**

15" T&W
Zones 3-9
Pot Size: #1

Hosta 'Trendsetter'

Walters Gardens, Inc.

'Trendsetter' Hosta — is a wide growing hosta with heart shaped leaves, the centers of which are green and margined with yellow. As each leaf ages, the yellow will mellow to cream. Spikes of pale lavender flowers rise above the foliage in late spring to early summer and may attract hummingbirds. Prefers partial to full shade in moist well drained soil. **\$12.00**

12" T x 40" W
Zones 3-9
Pot Size: #1

Iris confusa

Bamboo Iris — is an upright perennial with evergreen fans of sword-like leaves borne on bamboo-like stems which eventually lie flat and root, vigorously spreading. White to very pale blue flowers are delicately fringed and are highlighted with yellow and lavender spots; blooms in mid-spring. Thrives in partial to full shade, though it is tolerant of more sun as well; tolerant of both wet and dry soils. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

2' T&W
Zones 6-10
Pot Size: 1 qt.

Iris cristata 'Powder Blue Giant'

North Creek Nurseries

'Powder Blue Giant' Dwarf Crested Iris — is a more robust cultivar of one of our native irises. 3" flowers (bigger than the species) of delicate light blue with golden crests and deep blue accents bloom in late spring attracting humming birds and bees. Dwarf crested iris are low growing plants that make an excellent groundcover in woodland gardens. Prefers partial to full shade in moist well drained soil; deer resistant. **\$10.00**

6-8" T x 12-15" W
Zones 5-8
Pot Size: 1 qt.

Iris japonica

Fringed Iris — is a vigorous spreader and great choice to use as an evergreen groundcover in shady spots. In early spring, frilly pale blue to white flowers bloom above strappy foliage. Does best in partial shade, but will tolerate more; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our selection.* **\$10.00**

10-12" T x 12-18" W
Zones 7-9
Pot Size: 2 qt.

Lobelia cardinalis

Cardinal Flower — is one of our best-known Coastal Virginia native wildflowers. It adapts well to moist garden conditions, especially in areas beside ponds or water features. It forms an upright mound of green foliage, bearing taller spikes of scarlet-red flowers in mid to late summer, attracting both hummingbirds and butterflies. Not usually long lived, but it will self-seed where happy. Partial sun in moist to wet soil. **\$12.00**

4' T&W
Zones 3-9
Pot Size: #1

Onoclea sensibilis

Sensitive Fern — is a large bright green, deciduous fern that is native to North America including Coastal Virginia. It will add a lush texture to the woodland garden. Prefers partial shade in moist to wet soil; it is not tolerant of drought but is deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

1-2' T x 2-3' W
Zones 2-10
Pot Size: 2 qt.

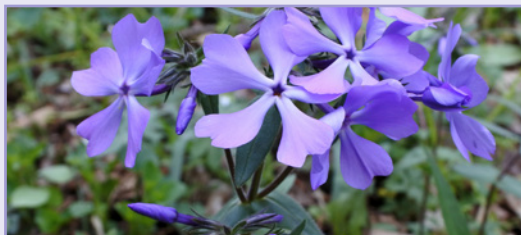

Packera aurea

Golden Ragwort — is a Coastal Virginia native with a thick, mat-like, evergreen habit which makes it a great solution for gardeners with troubling spots. It will grow in sun or shade, deer and rabbits leave it alone, it is great for beneficial pollinators, and it forms a groundcover so thick that weeds will not come up through it. If that's not enough, its bright yellow daisy-like flowers are quite beautiful, and once the seeds are ripe, birds will eat them. Golden ragwort naturally grows along the edge of forests, in ravines, and along roadside ditches. In a garden setting they tend to do best in partial sun with moist soil. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$10.00**

12" T&W
Zones 4-9
Pot Size: 2 qt.

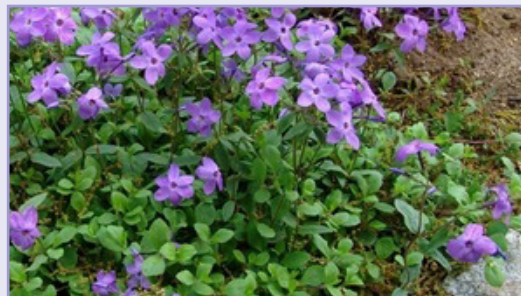

Phlox divaricata 'Blue Moon'

'Blue Moon' Woodland Phlox — has outstanding flower color and very full flower petals, and it bears many fragrant, 5-petaled flowers with the arrival of spring. Enjoy a sea of elegant, violet-blue flowers that attract hummingbirds & butterflies to your garden. Foliage is lance shaped and medium green. A long-lived, carefree Virginia native groundcover. Prefers partial to full shade in moist well drained soil. **\$12.00**

12-18" T x 8-12" W
Zones 3-8
Pot Size: #1

Phlox stolonifera 'Sherwood Purple'

'Sherwood Purple' Creeping Phlox — is a more vigorous and colorful cultivar of a semi-evergreen groundcover native to the Appalachian Mountain region, including Virginia. In spring this selection is covered in violet-blue flowers that attract a variety of insect pollinators, as well as hummingbirds (if they have already arrived). It prefers light to full shade in moist well drained soil where it will spread easily by stolons. Once it is established, it is also very drought tolerant and deer resistant. **\$10.00**

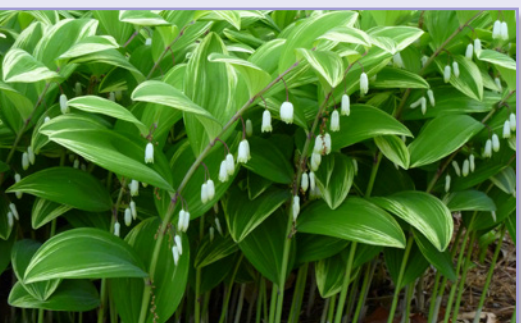

6-10" T x 8-18" W
Zones 5-8
Pot Size: 2 qt.

Podophyllum peltatum

Mayapple — is a unique Coastal Virginia Native for those of you who struggle with what to plant under large pines and oaks in dry, semi-shady conditions. In spring they cover the forest floor with attractive, short, green, umbrella-like foliage protecting large white flowers that attract insect pollinators. By early to mid-summer this ephemeral will begin dormancy, but not before providing eastern box turtles a delicious meal with ripe fruit, which is also edible to other animals and humans. However, unripe mayapple fruit and the foliage are highly toxic. It prefers part to full shade in moist well drained soil; drought tolerant and deer resistant. **\$10.00**

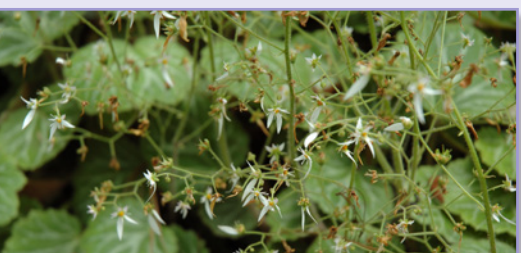

12-18" T x 8-12" W
Zones 3-8
Pot Size: 2 qt.

Polygonatum odoratum 'Variegatum'

Variegated Solomon's Seal — is a virtually trouble-free plant for shady areas with creamy white and green foliage that brightens dark landscapes. Although grown primarily for its foliage, the pendant, fragrant, white flowers that bloom in late spring are a sweet surprise, attracting butterflies and other insect pollinators. Birds enjoy the ripened seeds. This plant will slowly spread to form large patches, and it is easily divided to create more. It prefers partial to full shade in moist well drained soil, but once established it is drought tolerant; deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collection.* **\$10.00**

18-24" T, varying width
Zones 3-8
Pot Size: #1

Saxifraga stolonifera

Strawberry Begonia — is neither a strawberry nor a begonia, rather it is a *saxifrage* from Asia. It has showy rounded dark green leaves with silver veining and maroon undersides. Airy sprays of unique white flowers appear in spring. Plantlets float from long red stems to politely colonize. This plant makes a very striking groundcover for shadier spots. It prefers partial to full shade in moist well drained soil; once established it can take the occasional drought. **\$8.00**

6-8" T x 18" W
Zones 7-10
Pot Size: 2 qt.

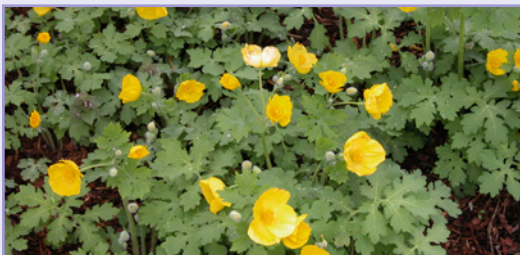

'Ragin Cajun' Spigelia (Indian Pink) — is a new selection of an unusual, hard-to-find perennial native to the southern USA with striking flowers that attract hummingbirds. It typically has a long bloom time from late spring to mid-summer, and can really add life and interest to the landscape. 'Ragin Cajun' differs in its more orange flower color, with the same yellow throats, and its more rounded habit. In this climate it tends to do best in part sun or bright shade in moist well drained soil, but once well established it can tolerate brief droughts. **\$12.00**

20-24" T&W
Zones 5b-9
Pot Size: #1

Spigelia marilandica 'Ragin Cajun'

Walters Gardens, Inc.

Celandine Poppy — is native to eastern North America, but is considered rare in Virginia, only occurring naturally in the far southwest of the state. In late spring, cheery, bright yellow flowers bloom attracting insect pollinators, and later unusual, fuzzy blue-green fruit forms that small mammals like. The handsome foliage is also an attractive blue-green. In moist woodland settings, celandine poppy will self-seed if happy. It needs partial to heavy shade in moist well drained soil; it is tolerant of wet soils, as well as dry, but will go dormant early if it is too dry. **\$12.00**

12-14" T x 9-12" W
Zones 4-9
Pot Size: #1

Stylophorum diphyllum

Blue Wood Aster — is native to much of eastern North America including many parts of Virginia. Unlike other asters, this is one that will grow in shade where it will put forth clouds of soft blue flowers in late summer to early fall. It will attract a number of butterflies as well as a wide variety of other insect pollinators, and the ripe seeds will feed birds. Partial shade in moist well drained soil; deer resistant. **\$10.00**

2-3' T&W
Zones 3-9
Pot Size: #1

Symphyotrichum cordifolium

Southern Shield Fern — is a deciduous Southeastern native (formerly listed as *Thelypteris kunthii*) with gracefully arching fronds that are lime to medium-green in color and grow 2-4' tall and wide. This finely textured fern will politely spread by rhizomes forming lush colonies. Prefers full to partial shade in moist soil, but will tolerate infrequent droughts and occasionally more sun; deer resistant. **\$12.00**

2-4' T&W
Zones 7-10
Pot Size: #1

Thelypteris normalis

'Miyazaki' Toad Lily — has unusual, exotic looking purple speckled flowers that bloom in fall. It also differs from other toad lilies in its shorter, more arching habit, and its clumping nature, rather than spreading. It does best in part to full shade in consistently moist soil. It will tolerate the occasional drought, but will not flower as much. **\$10.00**

18-24" T&W
Zones 5-8
Pot Size: 2 qt.

Tricyrtis hirta 'Miyazaki'

Photo by Sonniá Hill CC BY-NC-SA 2.0 DEED

Woodwardia areolata

Netted Chain Fern — is native to much of eastern North America, including Coastal Virginia. Although this deciduous fern will grow in dense shade, it can take more sun as long as the soil stays moist. A vigorous spreader, if conditions are right it forms large colonies creating ideal cover for small birds, mammals, and reptiles. Prefers part to heavy shade in moist to wet soil; very deer resistant. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$10.00**

x Heucherella 'Red Rover'
FUN AND GAMES®

Walters Gardens, Inc.

'Red Rover' Foamy Bells — is a Heucherella hybrid and part of the FUN AND GAMES® series. It has handsome red foliage in several shades on each deeply lobed leaf. In summer a spike of small white flowers will rise above the foliage that may attract insect pollinators, but the foliage is the star of the show. Heucherella hybrids are crosses between Tiarella and Heuchera species, and this gives them more tolerance to Southern heat and humidity. In our climate they will do best in partial to full shade; they must have soil that stays moist, yet drains well. They also do very well as container plants. **\$8.00**

6-8" T x 18-20" W
Zones 4-9
Pot Size: 1 qt.

Abelia grandiflora 'Minacara1'
FUNSHINE®

Photo courtesy of Proven Winners

FUNSHINE® Glossy Abelia — is one of the most vibrant selections with new growth in shades of gold and orange. Fragrant pale purple flowers bloom most of the summer attracting butterflies, bees, and hummingbirds. Evergreen with a mounded habit, it prefers full to partial sun in moist well drained soil; deer resistant. **\$20.00**

Aronia arbutifolia

Red Chokeberry — is a lovely multi-stemmed shrub, native to Coastal Virginia, with multiple seasons of interest. In late spring, it has fragrant, half-inch white to light pink flowers resembling wild roses. Butterflies and other insect pollinators enjoy the flowers' nectar. Summer foliage is a lustrous dark green and is followed by spectacular fall color ranging from fluorescent crimson to deep reddish-purple. The colorful leaves hold on well into the winter. Bright red fruit ripens in late summer and can persist into winter. They are bitter, but birds and mammals will eat them. They are also very high in antioxidants and can be juiced or made into jam. It prefers full to partial sun, though best fruit production will be in full sun. Prefers moist well drained soil, but they are very tolerant of wet soils. **\$30.00**

Pot Size: #3

Callicarpa americana

American Beautyberry — is one of our best Southeastern and Coastal Virginia native shrubs. Small lavender pink flowers bloom in summer attracting butterflies and other insect pollinators. However, the real show is in the early fall when bright purple berries adorn the branches providing a feast for the eyes and a tasty treat for birds and other wildlife. If you are desperate, the fruit can be eaten fresh, or processed into jelly. The foliage has mosquito repelling properties, and it turns a nice soft yellow in the fall. Prefers full sun in moist soil where it will produce the most fruit, but it will also grow in light shade. Once established it can tolerate both occasional drought and wet soil. Blooms and fruits on new growth, so occasional winter pruning is recommended. **\$25.00**

Thuja occidentalis 'SMNTOBAB'
TATER TOT®

Photo Courtesy of Proven Winners

TATER TOT® Arborvitae — is irresistible with its green globes of cedar-scented, fan-like foliage, plus it is may never need pruning. This dwarf evergreen is perfect for year-round beauty in rock gardens, edging a pathway or even a large container. It prefers full sun to part shade in moist well drained soil, and it can also tolerate occasionally wet soil, but it is not drought tolerant. Isn't it impossible to enjoy only one TATER TOT® **\$20.00**

Viburnum 'Bulk' BRANDYWINE®

Brandywine™ Viburnum — is an improved cultivar of one of our Coastal Virginia native viburnums. Clusters of fragrant, flat-topped, creamy white flowers bloom in late spring attracting pollinators. BRANDYWINE® is best known for its large clusters of round berries that transform from green to shades of vivid pink and blue that birds and small mammals appreciate. Deep green, glossy leaves change to rich, deep red. It is very adaptable and will grow in full sun to a fair amount of shade, and prefers moist soil, and can tolerate wet soil as well. **\$20.00**

Zones 5-9
Pot Size: #1

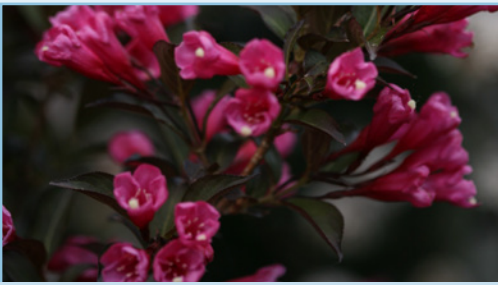

Vitex 'Bailexone' Flip Side®

FLIP SIDE® Chaste Tree — is like other *Vitex* in that it has aromatic foliage and masses of rich lilac-blue flowers in early to mid-summer, attracting the buzz of many pollinators. Deadheading will promote more blooms through early fall. What makes FLIP SIDE® different is that the stems are slightly purple, as are the undersides of the leaves. This coloration makes the whole plant look more purple. *Vitex* prefer full sun in well drained soil and are very tolerant of drought, deer, heat, humidity, and salt. **\$35.00**

Agave americana 'Opal'

'Opal' Century Plant — is a handsome variegated selection with yellow margins surrounding blue-green centers. Like all Agave species, it is monocarpic, meaning that the plant will die once it finishes flowering. However, it can take 15-20 years for it to flower, plus this particular variety sends out pups easily which can be separated and repotted for new plants. 'Opal' is also marginally hardy here, if it has excellent drainage, and we do not have an unusually cold or wet winter. We prefer to use them in summer containers in full sun with sharply draining soil, then bring them in for the winter to a spot where they can get very bright light. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

2-3' T x 2.5-3' W
Zones 8-10
Pot Size: 1 qt.

Begonia 'Mandarin Orange'

'Mandarin Orange' Begonia — is a cane or angel wing begonia. Its handsome foliage, spotted with white dots, looks good all the time, but when the orange flowers bloom the plant is even more beautiful. Indoors it likes a brightly lit location, warm temperatures, and a humid atmosphere. They can be taken outside during the summer, but keep them in shade. The soil should stay moist, but do not allow them to stay soggy. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

18-24" T&W
Zones 10-11
Pot Size: 3 in.

Begonia nelumbiifolia

Lily-pad Begonia — is grown primarily for its large, rounded, dark green foliage, but it also produces attractive clusters of white flowers. Indoors it likes a brightly lit location, warm temperatures, and a humid atmosphere. They can be taken outside during the summer, but they should be transitioned slowly to dappled sun for best flowering, but they also will do well in full shade. The soil should stay moist, but do not allow them to stay soggy. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

18-24" T&W
Zones 10-11
Pot Size: 3 in.

Begonia 'Passing Storm'

'Passing Storm' Begonia — will bring a bit of the dark and stormy into your home. Its mottled leaves are varying shades of gray, purple, greens, and burgundy, often with a pink sheen. It does have small pink flowers, but they hardly compete with that foliage. Indoors it likes a brightly lit location, warm temperatures, and a humid atmosphere. They can be taken outside during the summer, but keep them in shade. The soil should stay moist, but do not allow them to stay soggy. This is a good selection for terrariums. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$8.00**

Monstera adansonii

Swiss Cheese Plant —is aptly named when you take a look at its unusual foliage. This easy to grow houseplant is a climbing vine in its native habitat, and as such lends itself to hanging baskets or to grow on stakes or poles indoors. Bright indirect sun is best, full sun could scald the foliage. It prefers evenly moist, well drained soil, but never sopping wet or bone dry. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$25.00**

3-8' Long by 1-3' W
Zones 10-12
Pot Size: Hanging Basket

Monstera deliciosa

Split-leaf Philodendron — with its exotic foliage and designer good looks, is one of the most popular of all houseplants. Large dark green leaves have random slits and holes, hence the other common name of Swiss cheese plant. In the house it likes bright indirect light with moist, well drained potting soil. In the summer it likes being outdoors where it can enjoy the humidity, but keep it in shade with no direct sun. Under most indoor conditions it typically gets 3' tall by 2-3' wide, though where it occurs naturally in Central America it becomes a large clinging vine. **\$10.00**

3' T x 2-3' W
Zones 10-12
Pot Size: 2 qt.

Orthosiphon aristatus

Cat's Whiskers — has spectacular spikes of white flowers with long filaments that resemble whiskers, and it blooms over a long period during the summer. This is a favorite at NBG in our Butterfly Garden where it indeed attracts butterflies, as well as other insect pollinators and hummingbirds. The foliage has a pleasant minty aroma. This is a hardy shrub in tropical climates, but in Coastal Virginia it needs to be treated as an annual, or it can be brought indoors for winter protection. It does best in full sun to light shade with moist well drained soil. **\$6.00**

3.5' T
Zones 9-12
Pot Size: 1 qt.

Pelargonium (species and hybrids)

Scented Geraniums — come in a variety of “flavors”, and we will offer an assortment. Brushing or bruising the foliage releases their strong scent. The foliage comes in a variety of shapes and textures, and the flowers vary by variety, but are a nice addition. Although they are not winter hardy in our climate, they enjoy our hot summers and can be easily overwintered indoors. They are best grown in containers, in full to part sun, in moist, but never soggy soil. Indoors, give them as much light as you can find. **\$15.00**

Pycnostachys urticifolia

Blue Witch's Hat — will make an unusual addition to your houseplant collection. This South African shrub is covered with clusters of deep blue flowers during the winter. Indoors it will need as much sun as you can give it. During the summer it can be brought outside, but transition it slowly to full sun. Prevent overwatering by allowing the soil to dry down between waterings. **\$8.00**

Salvia sclarea var. *turkestanica*
 'Vatican Pink'

'Vatican Pink' Clary Sage — sends up dramatic, aromatic spires of pink and white flowers in early summer which attract hummingbirds. This selection is more compact than the species, and it is considered a biennial, sending up foliage the first year, then flowers the second. If the spent stalks are cut, it may live to bloom another year or two, or leave the stalks on for self-seeding or to harvest the seeds. Clary sage has a storied history of medical and culinary uses. Prefers full to part sun in well drained soil; drought tolerant and deer resistant. **\$12.00**

Syngonium podophyllum 'Milk Confetti'

'Milk Confetti' Arrowhead Vine — is a trailing tropical houseplant. Pale greenish white leaves are spotted and dashed with pink; it is very showy. Its natural cascading habit makes for a great hanging basket or it can be grown on a trellis. It needs bright indirect light, but no direct sun in a humid environment. The soil needs to stay moist, but not soggy. The plant can be brought outdoors during the summer, but keep in full shade. **\$5.00**

8-10" T x 2-5' Long
Zone 9
Pot Size: 2 in.

Acca swellowiana

Pineapple Guava — has unusual, fragrant, white to pink flowers with crimson red centers, surrounded by silvery green, evergreen foliage. Dark green fruit is flavorful with a taste of mint and pineapple, ripening in late summer when they fall from the plant. These shrubs can be planted to form an attractive evergreen hedge, and they are easily pruned. Although they can be self-pollinating, two are needed for best pollination. They prefer full sun in moist well drained soil; drought, heat, humidity, and salt tolerant. A great choice for coastal landscapes. **\$60.00**

Asimina triloba

Paw Paw — is a Coastal Virginia native, small understory tree or large shrub. Its foliage is the host plant for the zebra swallowtail butterfly. Delicious custard-like fruit ripens in the fall, attracting a variety of birds and mammals. In the fall, the deciduous foliage turns a beautiful golden yellow before dropping. Pollination occurs between two different paw paws. It will grow in full sun to deep shade and prefers moist well drained soil, but is tolerant of occasional wet soil; deer resistant. Something for trivia night at the pub – paw paw produces the largest fruit native to North America. **\$30.00** and **\$75.00**

Peachy Refreshment Recipe

This recipe uses frozen peaches, so a variety like 'Redhaven' is perfect. This is the perfect patio drink after a long day of working in the garden! Enjoy with friends or save the extras as a "freezer door" mix.

Alcoholic version:

- 3 peaches, peeled, pitted, sliced, and frozen
- 1 banana, peeled, sliced, and frozen
- 6 oz coconut rum
- 4 oz triple sec
- 1 cup orange juice

Lemon basil (for garnish)

Non-alcoholic version:

Substitute coconut rum and triple sec for 1 can of coconut milk and 2 extra tablespoons orange juice.

Add all ingredients to a blender with ice and blend until combined. Garnish with frozen fruit and lemon basil.

Prunus persica 'Blushingstar'

Blushingstar Dwarf Peach — bears firm, freestone, white fleshed, late-season (mid-August) fruit with a unique, sweet flavor, and it resists browning when sliced. It is also noted for heavy crops and resistance to bacterial spot. Beautiful spring flowers will attract pollinators. Self-pollinating. It prefers full sun in moist well drained soil. **\$75.00**

Zones 6-9

"In my opinion, everything is better as a cake! I love the way green tea wakes me up, and adding fruity flavors to it enriches the bright flavors. I took inspiration from matcha and chamomile tea cakes to try to turn my favorite tea into my favorite dessert- cake!" — Ray Volkin, NBG Plant Recorder

For (1) 9 inch loaf:

Cake:

- ½ cup unsalted butter
- 6-8 bags of your favorite green tea
- 1 cup milk of choice, room temp
- 1 cup sugar
- ½ tsp salt
- 2 large eggs, room temp
- 1 lemon
- 1 tsp vanilla
- 2 tsp baking powder
- 1 ½ cups AP flour

Icing:

- 1 cup powdered sugar
- ½ cup raspberries, fresh or frozen

Vegan substitutes:

- For 2 large eggs: 1 can's worth of aquafaba from unsalted garbanzo beans
- For butter: 6 tbsp canola oil

Instructions:

1. Add butter to saucepan on medium heat. Once melted, stir in milk until simmering. Remove from heat, add tea bags, and let steep 1 hour or until cool.
2. Preheat oven to 350. Line the bread pan with parchment paper.
3. Add sugar to butter/milk/tea and mix thoroughly. Add vanilla.
4. In a separate bowl, whisk eggs vigorously, until fluffed
5. In a separate bowl, add sifted flour, sugar, the zest of 1 lemon, baking powder, salt, and stir until homogenized. Save the lemon.
6. Add about 1/3 of liquid mixture to dry ingredients. Then stir. Repeat until all ingredients are combined. Carefully fold in egg mixture.
7. Transfer the batter to the pan and bake 40-45 minutes on the middle rack. Let cool
8. Put raspberries into a fine mesh sieve or cheese cloth bundle. Muddle into a container and discard seeds/flesh. Add the juice from the saved lemon and the confectioners sugar until a smooth, thick texture is obtained.
9. Once the cake is cooled to room temp, use a butter knife to break the seal between the edge of the cake and the pan. Slowly pour the icing over the cake while in the pan until thoroughly covered. Let cool 1+ hours in the fridge before enjoying.

Aristolochia tomentosa

Woolly Dutchman's Pipe — is a woody, twining vine native to the southern and central United States. It is covered in large, heart-shaped leaves, parts of which are covered in woolly hairs. This vine is dense and relatively fast growing providing welcome shade to patios and porches in the summer, but being deciduous, it will allow warm sun through during the winter. It has oddly shaped flowers that bloom in mid to late spring that are yellow-green with purple to brown accents. They need an arbor or some other structure to grow on, and are a welcome addition to butterfly gardens as they are a host plant for pipevine swallowtail butterflies. It prefers full to partial sun in moist soil with good drainage. **\$12.00**

North Creek Nurseries

Lonicera sempervirens 'Magnifica'

'Magnifica' Trumpet Honeysuckle — is a popular selection of the Coastal Virginia native honeysuckle featuring sweetly scented, tubular orange flowers that appear from late spring summer into fall. This is a vigorous, fast growing vine that is perfect for covering fences, trellis' or arbors. Hummingbirds, and pollinators love the flowers, and songbirds relish the red fruits. Plant in full to part sun in moist well drained soil; deer and salt resistant. **\$15.00**

8'-10' T & W
 Zones 4-9
 Pot Size: #1

Passiflora 'Incense'

'Incense' Passion Flower —has unusual, showstopping, exotic, summer-blooming flowers that are layered in various shades of purple. Their fragrance lures will lure people in and the butterflies and bees are attracted to the flowers as well. Later in the summer, edible fruit will ripen attracting wildlife. Passion flowers are typically very vigorous climbers that use tendrils to gain height, so make sure there is something for it to climb on. Full to part sun in moist well drained soil; drought tolerant once established. *Plant a piece of NBG in your own garden - this offering comes from our collections.* **\$15.00**

6'-10' T x 5-8' W
 Zones 6-10
 Pot Size: #1

Wisteria frutescens 'Amethyst Falls'

'Amethyst Falls' American Wisteria — is a spectacular, twining, Coastal Virginia native cultivar. It grows at about a third the rate of Asian wisteria, making it better suited for smaller spaces. It is also better behaved and not invasive like Asian selections. Slightly fragrant purple racemes bloom in late spring with a lesser rebloom into summer, and plants produce flowers at an early age. It attracts butterflies, hummingbirds, and other beneficial pollinators. Great in containers for porch or patio, or trained up an arbor or trellis. Full sun to part shade in moist well drained soil; deer resistant. **\$15.00**

15-30' T x 15-30' W
 Zones 5-9
 Pot Size: #1

Wisteria macrostachya 'Blue Moon'

'Blue Moon' Kentucky Wisteria — is a cultivar of a North American native vine and another good alternative to Asian wisteria. Late in spring, it produces 12" long clusters of fragrant, pale violet-blue flowers, and there is some rebloom throughout the summer. The flowers will attract hummingbirds, butterflies, and other insect pollinators. It differs from American wisteria (*Wisteria frutescens*) by having larger flowers and being more cold tolerant (not an issue in Coastal Virginia). It will do best in full sun in moist well drained soil; deer resistant. **\$30.00**

15-25' T x 4-8' W
 Zones 3-9
 Pot Size: #3

Avoid planting your tree in the hottest summer months. For best results, plant when the tree is dormant (usually fall/winter).

Be sure to remove any twine, tape or tags from your tree.

Only stake your tree for stabilization as needed. Secure with wide, flexible material. Do not stake the tree for more than one year.

Mulch between 2" and 4" deep but be sure to have a 1" to 2" clearance between the tree trunk and your mulch.

The top of the tree's root mass should be at or slightly above the existing grade (dotted line.)

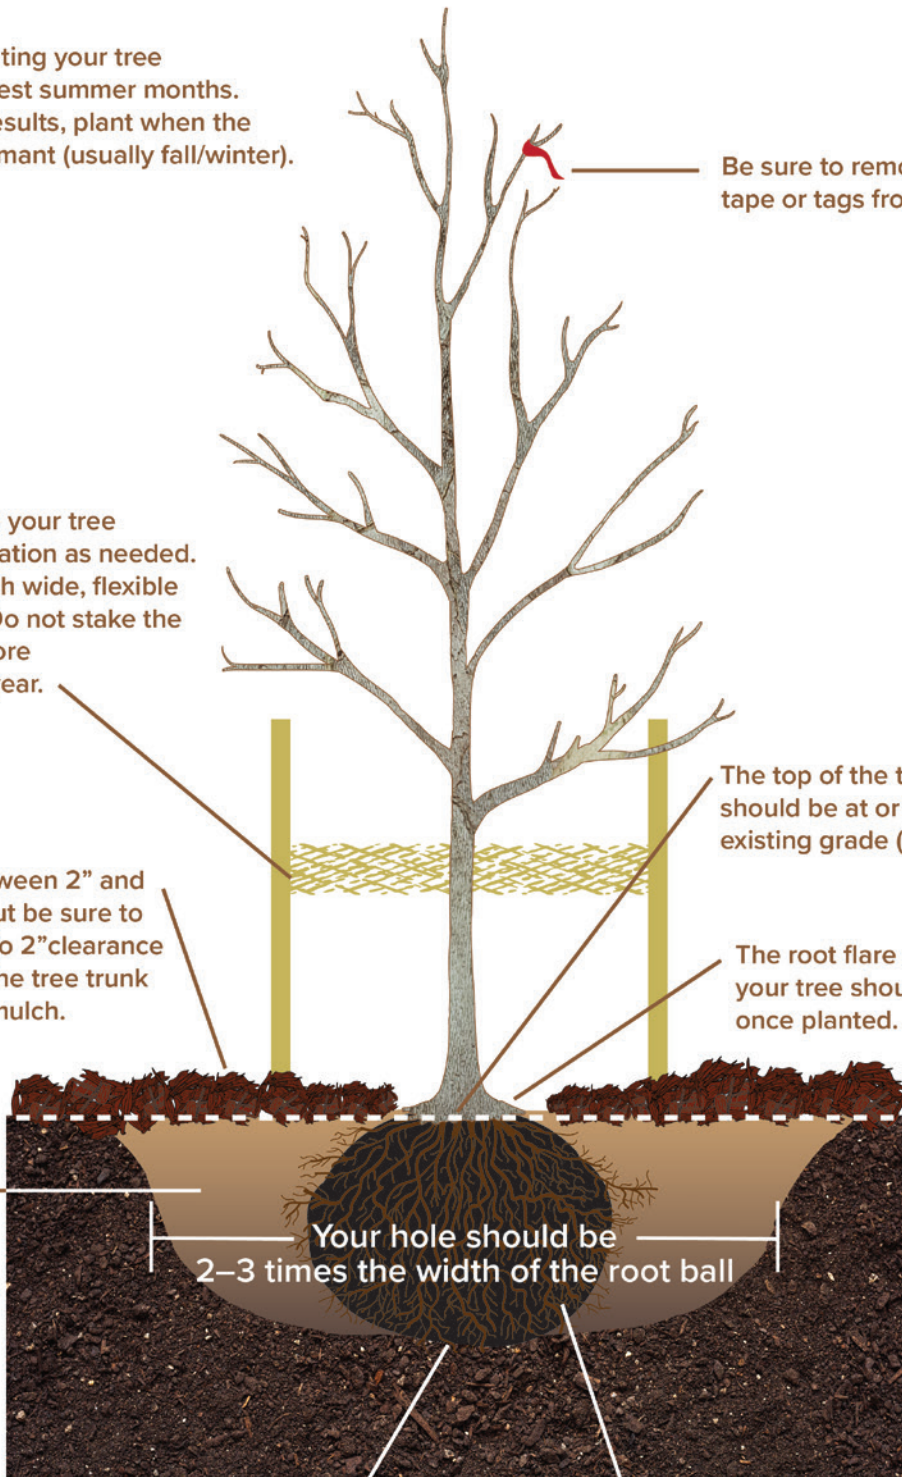

The root flare at the base of your tree should be visible once planted.

Backfill with native solid from the new hole.

Your hole should be 2-3 times the width of the root ball

Make sure your root mass is sitting firm, undisturbed soil at the bottom of your hole.

Carefully remove containers, wrappings, wires and ties from root mass before planting. Unwrap any circling roots. It's ok to aggressively loosen and tease out densely packed roots.

Acer buergerianum

Trident Maple — is a small tree from Asia with tri-lobed, shiny green leaves that turn a fiery red to orange in the fall. Greenish yellow blooms show up in spring attracting a few pollinators. Exfoliating multi-colored bark adds winter interest. Plant in full sun to part shade. This maple is tough - tolerant of wind, salt, drought, air pollution, and soil compaction. The tree is also popular with bonsai enthusiasts. **\$15.00**

20-30' T&W
Zones 5-9
Pot Size: N/A

Acer palmatum (seedlings)

Japanese Maples — are elegant small, understory trees. They have attractive spring foliage that can turn wonderful shades of red, orange, burgundy, or gold in the fall. As seedlings, these will vary in both color, form, and size. Partial shade is best in moist soil that drains well. **\$12.00**

15-25' T x 10-25' W, variable
Zones 5-8
Pot Size: #1

Aesculus pavia

Red Buckeye — is a Coastal Virginia native small tree. It is an early spring bloomer, and its tubular red flowers are an important food source for returning hummingbirds, but they also attract insect pollinators. Plants will begin blooming at a young age, growing slowly to create a small tree. Prefers shade to part shade; tolerant of deer and occasionally wet soils. Leaf drop in late summer is normal. **\$25.00**

12-15' T & W
Zones 4-8
Pot Size: #3

Betula nigra

River Birch — is a wide-spread native tree, including here in Coastal Virginia. It is known for its fast growth rate and ability to withstand wet conditions. It has handsome exfoliating bark, golden yellow fall foliage, and it is a host plant for several butterfly species. The ripe seeds are enjoyed by birds and other wildlife. Prefers full to partial sun in moist to wet soil, and despite this it can also tolerate drought as well, but expect some leaf drop. Deer resistant. **\$30.00**

30-70' T x 40-60' W
Zones 4-9
Pot Size: #3

Carpinus caroliniana

American Hornbeam — is a Coastal Virginia native understory tree with a lot going for it; yellow-green catkins in spring; handsome bark and structure; beautiful fall foliage; and edible nuts that attract wildlife. It is also a host plant for several butterfly species. Prefers full to partial shade in moist well drained soil, but once established it can tolerate wet soil, the occasional drought, and urban conditions. **\$30.00**

20-30' T&W
Zones 3-9
Pot Size: #5-#7

Cercis canadensis

Eastern Redbud — is one of Coastal Virginia's showiest native trees. Early in spring it announces the change of season with dark pink-red buds opening to small pink flowers. It can either be a single trunked tree, or commonly in the wild, multi-trunked. The deciduous foliage emerges a reddish-purple, changing to a dark summer green, then to yellow in fall. Redbuds are a known host plant for certain butterfly larvae. It tends to do best in bright filtered sun to partial shade, but is tolerant of full sun. Redbud flowers are edible and can be sprinkled fresh into salads, or made into a colorful jelly. **\$30.00**

20-30' T x 30' W
Zones 4-9
Pot Size: #3

Chionanthus virginicus

Fringetree — is one of Coastal Virginia's most beautiful native trees, with mildly fragrant white flowers that cover the tree in mid-spring. Male trees have slightly showier flowers, but females have attractive blue-black fruit in summer that attracts birds and other wildlife. Unfortunately, our trees have not been sexed, but all new babies need love, regardless of gender. Deciduous foliage turns golden yellow in the fall. Full sun to partial shade in moist well drained soil, drought tolerant once established. *Plant a piece of NBG in your own garden - this offering comes from our collections. We are offering 2 sizes. The #1 is \$8.00 and the #3 is \$15.00.*

12-20' T&W
Zones 3-9
Pot Size: #1 and #3

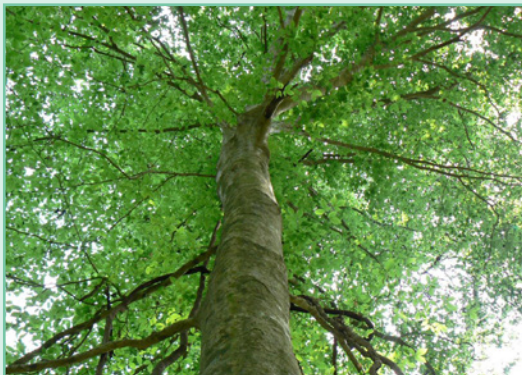

Cornus kousa

Kousa Dogwood — is an Asian tree with four-seasons of interest, and it is a good substitute for our native dogwood with its disease issues. In the spring the leaves come out first, then the beautiful white blooms appear attracting pollinators. In late summer the red fruits form attracting birds and mammals. The fall color is a spectacular mix of red, orange, and yellow. In winter its handsome bark stands out. Prefers filtered sun to part shade in moist well drained soil. **\$30.00**

20-30' T x 15-30' W
Zones 5-8
Pot Size: #3

Fagus grandifolia

American Beech — is one of our forest's most imposing and sturdy trees with handsome smooth bark. They are native throughout much of eastern North America, including Coastal Virginia. The nuts it produces in the fall are edible and are a great benefit to native birds and mammals. It will grow in sun to partial shade in moist, but well drained soil, moderately salt tolerant and deer resistant. American beech is a tree that displays marcescence, which is when the foliage goes dormant and changes color in the fall but remains on the tree through winter. Their rich coppery colored leaves shimmering in the cold wind is poetry. **\$30.00**

60-80' T x 40-80' W
Zones 3-9
Pot Size: #3

Liriodendron tulipifera

Tulip Poplar — is one of the tallest and most beautiful of Coastal Virginia's native trees. The showy green, yellow, and orange flowers resemble unusual tulips. The tree is one of nature's buffets, attracting numerous butterflies, other insect pollinators, hummingbirds, other birds, and mammals. In the fall the foliage turns a beautiful golden yellow. Plant in full sun to partial shade in moist, well-drained soil; tolerant of deer and wet soil. Next time you visit NBG, look for the massive tulip poplar in the center of The Glade; it presides over the entire garden. **\$30.00**

70-150' T x 30-50' W
Zones 4-9
Pot Size: #3

Magnolia stellata 'Royal Star'

'Royal Star' Magnolia's — fragrant, white, star-like double blooms let you know that spring is just around the corner. This deciduous magnolia can either be a large, multi-trunked shrub or a small tree. Prefers full to partial sun in moist well drained soil. **\$60.00**

10-20' T & 8-15' W
Zones 4-9
Pot Size: #7

Magnolia stellata 'Waterlily'

'Waterlily' Star Magnolia — has pink buds that open to fragrant white and pale pink flowers with 20-30 petals per blossom, reminiscent of water lilies. This display takes place in late winter, just when you need to see something bloom. 'Waterlily' is deciduous and can either be a large multi-stemmed shrub or small tree. Full sun in moist well drained soil is preferred. **\$60.00**

10-20' T x 8-15' W
Zones 4-8
Pot Size: #7

Magnolia x 'Ann'

'Ann' Magnolia — is part of the Little Girl series, which were bred for a later bloom time, hopefully avoiding late frost damage to the flowers. 'Ann' has lovely, slightly fragrant purple-red flowers and a shrubbier, multi-stemmed, compact habit making it good for smaller gardens and spaces. Prefers full to partial sun in moist well drained soil; deciduous. **\$45.00**

8-10' T&W
Zones 3-8
Pot Size: #3

Magnolia x 'Jane'

'Jane' Magnolia — like other members of the Little Girl series of hybrid magnolias, blooms a few weeks later avoiding damaging late freezes. Tulip-like flowers are fragrant and purple-red with white centers and bloom in early spring, with occasional summer rebloom. Prefers full sun to partial shade in moist well drained soil; tolerant of urban conditions and heat. **\$45.00**

10-15' T x 8-10' W
Zones 4-8
Pot Size: #3

Quercus alba

White Oak — is a long-lived shade tree and a native of Coastal Virginia. It is also a keystone species for the area, and an important host plant for many butterfly species. Its acorns are a valuable food source for wildlife. It can get 80' tall or more with wide spreading branches that form an upright, broad-rounded crown. The leaves are dark green to slightly blue-green in summer, brown and wine-red to orange-red in the fall. Plant in full sun, tolerant of different soil types, as well as heat, drought, salt, and deer. Not tolerant of wet soils. **\$30.00**

80-100' T x 50-80' W
Zones 3-9
Pot Size: #3

Quercus bicolor

Swamp White Oak — gets its botanical name from the two-toned color of its leaves, green on top, and silvery underneath. In the fall it can turn to shades of yellow, bronze, or burgundy. Like most native oaks it is a keystone species of great value to pollinators, birds, and mammals. It prefers full sun in moist soil, it is also adaptable to occasional drought or freshwater flooding; deer resistant. **\$30.00**

50-60' T&W
Zones 4a-8b
Pot Size: #3

Photo Courtesy of JCRA
Taxodium distichum 'Falling Waters'

'Falling Waters' Weeping Bald Cypress — has an unusual habit that will act as a piece of living sculpture in your garden. Unlike most cone-bearing trees, it is deciduous, but before its needles drop in the fall they turn a beautiful russet orange. The new foliage in spring is a bright fresh green. Hardy and tough, this tree will adapt to a wide range of soil types, whether wet and swampy, dry, or salty; deer resistant. Full sun to part shade. **\$130.00**

10-20' T x 8-15' W
Zones 4-9
Pot Size: #7

Photo Courtesy of JCRA
Taxodium distichum 'Peve Minaret'

'Peve Minaret' Bald Cypress — is a dwarf version of our native bald cypress with much denser foliage. Unlike most cone-bearing trees, bald-cypress is deciduous, but before its needles drop in the fall they turn a beautiful russet orange. The new foliage in spring is a bright fresh green. Hardy and tough, this tree will adapt to a wide range of soil types, whether wet and swampy, dry, or salty; deer resistant. Full sun to part shade. **\$130.00**

10' T x 6' W
Zones 4-9
Pot Size: #7

Zanthoxylum clava-herculis

Hercules Club — is a Coastal Virginia native that can grow where it is too harsh for other trees. The visually insignificant flowers are attractive to pollinators, and the seeds are eaten by birds and mammals. The tree is the host plant for giant swallowtail butterflies. Also known as the toothache tree, the foliage has numbing properties when chewed. The most distinctive aspect of this tree is its striking, blunt thorns along the trunk, making it no fun to climb. Prefers full to part sun in moist well drained soil; heat, humidity, and drought tolerant. **\$30.00**

30-40' T x 12-15' W
Zones 7-9
Pot Size: #3
