**Plant Materials Technical Note
No. 8-1-190**

Disclaimer: This matrix was developed from a species list filled out by seed vendors, where available; otherwise from company websites. The information may be incomplete. This is not a list of recommended species, but a reference tool for locating vendors of desired seed from bioregions within the Mojave, Sonoran and Chihuahuan Deserts. The Natural Resources Conservation Service (NRCS) does not endorse any supplier, nor does it guarantee reliability or quality of the products listed.

Explanation of use: Plants are listed vertically in alphabetical order by common name, and organized into three categories: Grasses, Forbs and Shrubs/Trees. The row of numbers at the top of each page refers to seed vendors who typically sell species checked with an 'X'. Vendor contact information is found on pages 10-11. Current price lists and availability of plant materials may be obtained from suppliers upon request. Origin of material may be available.

Additions or corrections to this list should be forwarded to the Tucson Plant Materials Center: Phone (520) 292-2999; Fax (520) 292-9099.
