

Quercus rubra 'Magic Fire'

Высота	8 - 15 m
Крона	broad oval, eventually round, half-open crown
Кора и ветви	twigs brown-red, bark grey, stays smooth for a long time
Лист	oval, pinnately cleft, yellow and green, 12 - 20 cm
Осенний окрас	желтый, оранжевый
Цветы	golden yellow catkins, 5 - 8 cm, May
Плоды	broad ovoid, 2 - 2.5 cm, cupule with small triangular contiguous scales
Колючки/шипы	None
Ядовитость	неядовитый, обычно
Вид почвы	any, few requirements
Мощение	неустойчив к мощению
Зона зимостойкости	5a (-28,8 до -26,1 °C)
Устойчивость к ветру	good
Прочие виды устойчивости	устойчив к морозам, зона 1 - 6, устойчив к ветру, устойчив к соли для улиц
Применение	промышленные зоны
Форма	штамбовое дерево
Происхождение	Before 2001

Medium-size to large tree with a broad, eventually round crown growing to around 15 m. The young twigs are brown-red and the year-old twigs are particularly striking in winter. The old bark is grey, stays smooth for a long time and is eventually shallow grooved. On emerging, the leaves are golden yellow. They are oval and roughly pinnately cleft with irregular, sharply serrated lobes. In summer the leaf turns from yellow to green, then yellow to yellow-orange in autumn before falling. The blossom and fruit are the same as on the species. The broad ovoid acorns measure 2 to 2.5 cm and are up to a quarter enclosed by the cupule. The cupule itself is covered with small triangular contiguous scales. A tree with few demands, suitable for parks, avenues and wide streets.
